

Catfish Processing

ISSN: 1948-2701

Released October 22, 2012, by the National Agricultural Statistics Service (NASS), Agricultural Statistics Board, United States Department of Agriculture (USDA).

Catfish Processing Down 19 Percent from Last Year

Farm-raised catfish processed during September 2012 totaled 24.5 million pounds round weight, down 19 percent from September 2011. The average price paid to producers was 79.3 cents per pound for September 2012, down 0.5 cent from last month and 48.2 cents below a year ago.

Net pounds of processed fish sold during September 2012 totaled 13.4 million pounds, up slightly from the comparable month in 2011. Sales of fresh fish, at 4.97 million pounds, were up 20 percent from September 2011 and represented 37 percent of total sales. Frozen fish sales, at 8.45 million pounds, were down 9 percent from a year ago and accounted for the remaining 63 percent of total fish sales. Sales of whole fish represented 19 percent of the total fish sold, fillets accounted for 60 percent, and the remaining 21 percent were mostly steaks, nuggets, and value added products. The total end of the month inventory increased 2 percent from last month and was up 19 percent from a year ago.

The total fresh and frozen average price for September 2012 was \$2.79, down 93 cents from a year ago. The September 2012 average price received by processors for total fresh fish was \$2.78 per pound, down 94 cents from last year. Prices for fresh whole fish were \$1.89 per pound, down 76 cents from September 2011. Prices for fresh fillets were down \$1.16 from a year ago at \$3.72 per pound. Total frozen fish averaged \$2.79 per pound, down 93 cents from September 2011. Prices for frozen whole dressed fish were down 31 cents at \$2.86 and frozen fillets at \$3.11 per pound were down \$1.42 from a year ago.

Imports for consumption of *Ictalurus* spp., *Pangasius* spp., and other catfish of the order Siluriformes for August 2012 totaled 23.7 million pounds, up 29 percent from the amount imported in August 2011. Imports were from Brazil, Canada, China, French Polynesia, Iceland, New Zealand, the Philippines, Thailand, and Vietnam. The *Ictalurus* spp. imports totaled 84.0 thousand pounds, which were from China.

Fresh catfish fillet exports totaled 95.2 thousand pounds, with 57.2 thousand pounds going to Canada and the rest going to the Islands of Turks and Caicos and Vietnam. Exports of frozen catfish fillets reported for August 2012 totaled 5.5 thousand pounds, going to the Bahamas and the Republic of Equatorial Guinea.

Import and export data are compiled by the United States Census Bureau.

Statistical Methodology

Survey Procedures: Survey data for catfish processing are collected from approximately 17 processors. All participating processors must meet the minimum criteria of having a capacity to process at least 2,000 pounds live weight of catfish per 8-hour shift. The survey is conducted entirely by National Agricultural Statistics Service (NASS) Headquarters staff in Washington, D.C. However, NASS field offices are responsible for informing Headquarters staff of any new processing operations in their state to ensure complete survey coverage. Processors are contacted either by mail, telephone, fax or internet. Diligent effort is made to ensure that all operations are accounted for in the estimate.

Estimating Procedures: The *Catfish Processing* report refers strictly to farm-raised fish and excludes wild captured fish. Prior to summarization, questionnaires are compared with the previous month's reports for comparable placement of data, reasonable price levels, and a reasonable inventory carryover given the sales and processing totals reported. Estimates are made for those processors whose reports are not available in time to be included in the release. These plants are identified by an asterisk on page 6 of this release. Estimates are normally based on the processor's previous report and current conditions. Published totals are a straight summation of the individual reports and estimated data. Price items are weighted by the associated volumes to compute weighted average prices. The published price for total whole fish, however, reflects an adjustment to the round and gutted only price to bring it to an equivalent dressed weight price.

If a plant uses a fiscal accounting system, prorating is used to convert reported data to a calendar month basis. Only national level estimates are published due to the limited number of plants involved.

One unique feature of the *Catfish Processing* report is the listing of cooperating processors by name on each month's release. This feature originally was used to solicit industry cooperation in maintaining coverage, but it has continued because of the processors' overall acceptance of this policy.

Import and export data for catfish, which are compiled by the United States Census Bureau, are also included in this report.

Revision Policy: Revisions may be necessary in the previous month's publication based on late reports received from plants. These revisions are made to improve month to month relationships. In February, all monthly estimates for the previous year are reviewed and subject to revision. This review is primarily based on data that may have been received after the original estimates were published.

Reliability: Estimates are based on a census of all known active processors and, therefore, have no sampling variability. However, estimates may be subject to errors such as omissions, duplication, and mistakes in reporting, recording, and processing of the data. These errors are minimized through strict quality controls in the edit and summarization process, and a careful review of all reported data for consistency and reasonableness.

Processing data were compiled in cooperation with the following processors:

America's Catch, Inc.	Heartland Catfish
Carolina Classics Catfish, LLC	Lake's Farm Raised Catfish, Inc.
Consolidated Catfish Producers, LLC	Pride of the Pond
Delta Supreme Fish Processors	Prime Line, Inc.
Fish Breeders of Idaho, Inc.	Seabrook Seafood, Inc.
Freshwater Farms Products, LLC	Simmons Farm Raised Catfish, Inc.
Guidry Catfish, Inc.	SouthFresh Farms
Harings Pride Catfish	Superior Fish Products
Harvest Select Catfish, Inc.	

Terms and Definitions Used for Catfish Processing Estimates

Average Price Paid to Producers: Refers to the price of fish delivered to the processing plant door. Price includes charges for any services provided by the processing plant, such as seining and hauling, but does not include any adjustments based on year-end settlements.

Fillets: Boned sides of the fish, cut lengthwise away from the backbone. Includes regular, shank, and strip fillets; excludes any breaded products.

Fresh Fish: Fish intended for immediate consumption. Also referred to as ice-packed.

Frozen Fish: Fish which are individually quick frozen and glazed (IQF) or individually bagged and bulk frozen.

Ictalurus spp.: All species under this genus, which includes channel catfish, blue catfish, and other catfish species.

Nuggets: Small fillets cuts from below the rib section of the fish and usually includes weight of breading and added ingredients.

Other Products: Includes steaks, nuggets, and all other products not separately reported including the weight of breading and added ingredients.

Pangasius spp.: All species under this genus, which includes basa, tra, stuchi catfish, and other catfish species.

Round & Guttled Only: Fish with no processing done or viscera only removed.

Round Weight: The term for a fish's live weight.

Siluriformes: The scientific order which contains all families of catfish.

Steaks: Cross-section cuts from larger dressed fish.

Strips: Finger size pieces of fish cut from fillets and usually includes breading or added ingredients.

Whole Dressed: Weight of whole fish with only head, viscera, and skin removed. Generally, 60 percent of the live weight remains as dressed fish.
