Dry Weather Helps this Year's Fall Harvest

For the week ending, November 28, 2010, the days suitable for fieldwork were **6.0** days in Maryland and **6.8** days in Delaware. Soil moisture ratings in Maryland and Delaware were mostly adequate. One crop reporter in Delaware reported: *"Producers are relieved that this year's fall harvest has been better than 2009's wet fall. Small grains appear to be off to a good start. Some late planted grain may be susceptible to cold damage depending on conditions this winter."*

Hay supplies were primarily adequate in Maryland and Delaware. Pasture conditions for both Maryland and Delaware rated fair to good. The fourth cutting of other hay was 85 percent complete in Maryland and 95 percent in Delaware while the fourth cutting of alfalfa hay was 100 percent complete in both Maryland and Delaware. The fifth cutting of alfalfa hay was 64 percent complete in Maryland and 45 percent complete in Delaware. In Maryland, soybean reports indicate 98 percent harvested while Delaware reports soybeans are 100 percent harvested. Soybean condition was primarily fair to good in both states. Winter wheat was 100 percent planted and 99 percent emerged in Maryland and 100 percent planted and 98 percent emerged in Delaware. Both barley and winter wheat condition rated primarily good to excellent in both states.
