Texas milk production totaled 887 million pounds during April 2014, up 8.7 percent from last year's production of 816 million pounds. March 2014 production totaled 894 million pounds.

The number of milk cows during April averaged 447 thousand head, up 2 thousand head from the March 2014 number. Production per cow averaged 1,985 pounds during April, 25 pounds lower than March 2014.

Texas Monthly Milk Production

U.S. Highlights: Milk production in the 23 states participating in the monthly survey totaled 16.3 billion pounds during April 2014, up 1.2 percent from production in these same states during April 2013. March revised production, at 16.7 billion pounds, was up 1.1 percent from March 2013. The March revision represented an increase of 6 million pounds or less than 0.1 percent from last month's preliminary production estimate.

Production per cow averaged 1,911 pounds for April. This is the highest production per cow for the month of April since the 23 State series began in 2003. The average number of milk cows in the 23 states was 8.53 million head, 10 thousand head higher than March 2014.
