AGRICULTURAL SUMMARY: By the end of the week, 20 percent of Durum wheat had matured compared with 35 percent last year, according to the Mountain Regional Field Office of the National Agricultural Statistics Service, USDA. Durum wheat conditions were rated mostly excellent to good. Thirty-six percent of barley had matured compared with 58 percent last year. Barley conditions were rated mostly good. Seventy-one percent of cotton has been planted compared with 57 percent last year, and 56 percent has emerged compared to 44 percent last year. Alfalfa conditions were rated mostly excellent to good depending on location last week, with harvesting taking place on over three-quarters of the alfalfa acreage across the State. For the entire State, pasture and range conditions were rated mostly fair to good. No severe drought conditions were reported in the State during the last week. Reporters in the Northern part of the State noted concerns that high temperatures in the 80 and 90 degrees could affect soil moisture and range conditions in the coming week, while the warm weather has helped to improve crop progress in the southern part of the State.
