## VEGETABLE FINAL ESTIMATES

USDA's National Agricultural Statistics Service has published final estimates for Vegetables, including revisions made by the Agricultural Statistics Board (ASB), for the production years 2013 through 2017. Vegetable acreage, yield, production, price, and value data were published during calendar years 2013-2017 in periodic ASB reports. Data included in these final publications provide a historic record and a benchmark for current estimates.

Revisions were made after a thorough review of the original survey data and all additional data now available. Other data considered included marketing agreement records, recorded truck and rail movement, quantities inspected, and quantities used by processors. The current acreages were evaluated with historic totals to ensure comparability with past relationships. The 2013-2017 vegetable estimates are considered final and will not be revised again.

The estimates can be accessed using the QuickStats online database, found here: [http://www.nass.usda.gov/Quick\\_Stats/](http://www.nass.usda.gov/Quick_Stats/)
