# **Comments from Cooperative Extension Service County Agents**

"Row crop planting should start next week in the county. Hay fields were being sprayed for winter weeds and some fertilizer was starting to go out on Bermuda grass. Spring calving continued on most farms."

- Kevin Lawson, Faulkner County

"Due to wet conditions, very little, if any, fieldwork was accomplished last week and we received more rain last night."

- Ernest Bradley, Lee County

"Weekend rainfall limited fieldwork and spring planting. Corn was emerging along with rice. Herbicides were being applied to planted crops. Warmer weather improved pasture conditions."

- Brent Griffin, Prairie County

"Last week some producers experienced less than ideal corn stands due to wet and cool field conditions. Minimal planting was accomplished due to wet fields."

- Andrew Sayger, Monroe County

"Got another strong rain over the weekend, but warm sunny days during the week are keeping producers moving on higher ground. Gardens are delayed due to unseasonably cool nights and fear of late frost. Winter forages are doing well and reducing the burden on short hay supplies. It is still too wet to work ground with heavy equipment, but spraying with 4-wheel recreational vehicles is possible."

- Glenda Sutherlin, Union County

"Farmers received two to three days of good weather between rains to work ground and get corn and rice planted. Our earliest planted corn started emerging last week."

- Dave Freeze, Greene County
