

Arkansas Crop Progress and Condition

Delta Region - Arkansas Field Office

10800 Financial Centre Parkway, Suite 110 Little Rock, Arkansas 72211
(501) 228-9926 · FAX (855) 270-2705 · www.nass.usda.gov

Cooperating with the Arkansas Department of Agriculture

This report contains the results from the **Crop Progress and Condition** weekly survey. The survey is completed by county extension agents' visual observations and contact with producers in their county. These data are also posted on our web site at <https://www.nass.usda.gov/ar> and in a more detailed report at <https://www.nass.usda.gov>. Thanks to all of the county extension agents who responded to this survey.

Week Ending: November 12, 2023

Released: November 13, 2023

According to the National Agricultural Statistics Service in Arkansas, there were 5.0 days suitable for fieldwork for the **week ending Sunday, November 12, 2023**. Topsoil moisture supplies were 5 percent very short, 17 percent short, 59 percent adequate, and 19 percent surplus. Subsoil moisture supplies were 8 percent very short, 21 percent short, 55 percent adequate, and 16 percent surplus.

Arkansas Subsoil Moisture Map for the week of October 30 – November 5, 2023

The Soil Moisture Active Passive (SMAP) provides measurements of soil moisture in the root zone as a weekly average, represented by pixels. Each pixel represents 9 by 9 kilometer plot or about 20,000 acres. The SMAP data measures soil moisture in cubic centimeters of water/cubic centimeters of soil. The scale represents the percent of water in a given volume of soil. More information and additional mapping is available at <https://nassgeo.csiss.gmu.edu/CropCASMA/>.
