Little Rock, AR – The U.S. Department of Agriculture’s National Agricultural Statistics Service (NASS) is conducting the Cash Rents and Leases survey starting on February 7, 2022. The survey provides the basis for estimates of the current year’s cash rents paid for irrigated cropland, non-irrigated cropland, and permanent pasture. Over 240,000 producers across the U.S., including nearly 6,000 producers in Arkansas, have been selected to complete the survey, which can be completed online by March 1, 2022, at agcounts.usda.gov, by mail, or by phone.

“Survey responses from as many farm operations as possible ensure cash rental rates accurately represent your locality,” said Eugene Young, Director, Delta Regional Field Office. “By responding, producers help the farming community and ensure USDA bases its decisions on the most accurate data.” Information from this survey is also used in the Farm Service Agency (FSA) Conservation Reserve Program (CRP) as an alternative soil rental rate prior to finalizing new rates each year.

In accordance with federal law, NASS keeps survey responses confidential. Survey results will be available in aggregate form only to ensure that no individual producer or operation can be identified. NASS will publish the survey results on August 26, 2022, at quickstats.nass.usda.gov/. For more information on NASS surveys and reports, call the NASS Delta Regional Field Office at (800) 327-2970.

###

NASS is the federal statistical agency responsible for producing official data about U.S. agriculture and is committed to providing timely, accurate and useful statistics in service to U.S. agriculture.

USDA is an equal opportunity provider, employer, and lender.
