

2010 California Almond Acreage Report

Cooperating with the California Department of Food and Agriculture

California Field Office · P.O. Box 1258 · Sacramento, CA 95812 · (916) 498-5161 · (916) 498-5186 Fax · www.nass.usda.gov/ca

Released: April 28, 2011 - 12:00 p.m. PDT

RESULTS

California's 2010 almond acreage is estimated at 825,000 acres, up 2 percent from the 2009 acreage of 810,000. Of the total acreage for 2010, 740,000 acres were bearing and 85,000 acres were non-bearing. Preliminary bearing acreage for 2011 is estimated at 750,000 acres.

Nonpareil continued to be the leading variety, followed by Butte, Carmel and Monterey. Padre and Aldrich varieties showed significant acreage increases.

Kern, Fresno, Merced and Stanislaus were the leading counties. These four counties had 64 percent of the total bearing acreage, unchanged from the previous year.

OBJECTIVES

The California Field Office of the USDA's National Agricultural Statistics Service (NASS) conducts an annual acreage survey of California almond growers. The purpose of this survey is to provide annual almond acreage with information on new plantings and removals. It is a continuation of a long series of industry funded almond acreage surveys.

Users are cautioned that this report consists of two parts:

- Estimated almond acreage -- bearing, non-bearing, and total.
- Detailed data by variety, year planted, and county -- as voluntarily reported by almond growers and maintained in the NASS data base.

With perfect information, the estimated almond acreage and the detailed data would be the same. However, differences exist for the following reasons:

- A voluntary survey of approximately 6,000 almond growers is unlikely to ever attain 100 percent completeness.
- It is difficult for USDA, NASS to detect growers that are planting almonds for the first time.

The detailed data reflects tree removals from over 15,000 acres (mostly older trees) during the past twelve months. Of this number, a significant amount of acreage was harvested in 2010 prior to being pushed out, and that acreage has already been removed from the detailed data.

PROCEDURES

The major source of the almond detailed data was a questionnaire mailed to all almond growers included on the NASS data base. The mailing was made in early October 2010. The questionnaire contained previously reported crop, variety, and acreage information preprinted. Producers were asked to update the information with new plantings, removals, and any other corrections; new growers were mailed a blank questionnaire. Growers were given six weeks to respond by mail. Telephone and field follow-up was then undertaken. Data collection ended in April 2011.

To arrive at the estimated almond acreage, the NASS almond acreage data base was compared with pesticide application data maintained by County Agricultural Commissioners and the California Department of Pesticide Regulation.

ACKNOWLEDGMENTS

The USDA, NASS, California Field Office sincerely appreciates the many farm operators, owners, and management firms providing the information. A special thanks is due the Almond Board of California for funding.

Appreciation is due the following office staff for the hundreds of hours spent collecting and processing survey information: Kelly Albelo, Peggy Gibson, Pearl Gonzalez, Katherine Graham, Jeff Olson, Lupe Oropeza, Cordia Weems, and Sheryl Zazzi.
