SURVEY METHODS

The California Department of Food and Agriculture partners with the Pacific Regional Field Office of the USDA's National Agricultural Statistics Service (NASS) to conduct an annual acreage survey of California grape growers. The purpose of this survey is to provide annual grape acreage with information on new plantings and removals. It is a continuation of a long series of industry-funded grape acreage surveys.

This report consists of two parts:

- Estimated grape acreage -- bearing, non-bearing, and total.
- Detailed data by variety, and year planted -- as voluntarily reported by grape growers and maintained in our database.

With perfect information, the estimated grape acreage and the detailed data would be the same. However, this will never be the case for the following reasons:

- A voluntary survey of approximately 8,800 grape growers is unlikely to ever attain 100 percent completeness.
- It is difficult to detect growers who are planting grapes for the first time.
- The detailed data reflects vine removals from about 27,000 acres during the past twelve months. Of this number, significant acreage was harvested in 2014 prior to being pulled out. As a result, harvested acreage removed in 2014 is included in the estimated acreage, but excluded from the detailed data.

PROCEDURES

The major source of the grape detailed data was a questionnaire mailed to all grape growers from our database. The mailing was made in late November 2014 to approximately 8,800 grape growers. The questionnaire contained previously reported crop, variety, and acreage information preprinted. Producers were asked to update the information with new plantings, removals, and any other corrections; new growers were mailed a blank questionnaire. Growers were given six weeks to respond by mail. A telephone follow-up was then undertaken. Field personnel personally visited large growers who did not respond by mail.

To arrive at the estimated grape acreage, the grape acreage data base was compared with data provided from the pesticide application data maintained by County Agricultural Commissioners and the Department of Pesticide Regulation.

DATA CLARIFICATIONS

Bearing and Non-bearing Acreage: For purposes of this publication, all varieties are considered non-bearing for three years (i.e., acres planted in 2011 would not be bearing until 2014). The only exceptions are the Thompson Seedless variety and all table type grapes in Imperial and Riverside counties, which are of bearing age after one year.

Grafting: Graftings on bearing acres are recorded as planted in the previous year (i.e., Chardonnay grafted in 2009 onto a 1982 variety is recorded as planted in 2008). This assumes that grafted vines will actually bear a full crop in two years as opposed to three years for a newly planted vine.

Varieties: Data are provided for each variety with 50 or more total acres standing in 2014. Acreage for all other varieties are combined in "Other" categories. Care was taken to properly identify each block reported with a recognized varietal name.

Rootstock: Most of the rootstock shown was planted in the past three years. However, some earlier plantings are included. When rootstock was budded over, the year of planting assigned to that block of grapes was the year preceding the budding. For instance, if a 2008 rootstock planting was budded over in 2010, the year of planting assigned to the selected variety was 2009. (See Grafting.) Nursery rootstock is not included.

Period Covered: The primary intent of the 2014 survey was to record removals of grapes since the 2013 harvest and new planting of grapes during 2014. Acreage abandoned in 2014 was excluded from bearing acreage. Planting activity is accounted for on a calendar-year basis.

Grape Crush Districts: Grape acreage data is also published by grape crush districts (Table 12). A map with descriptions of those districts is located on the inside front cover.

RESULTS

California's 2014 grape acreage totaled 928,000 acres. Of the total grape acreage, 865,000 were bearing while 63,000 were non-bearing. The wine-type grape acreage is estimated at 615,000 acres. Of the total acres, 565,000 were bearing and 50,000 were non-bearing. Table-type grape acreage totaled 121,000 acres with 110,000 bearing and 11,000 non-bearing. Acreage of raisin-type grapes totaled 192,000 acres, of which 190,000 were bearing and 2,000 were non-bearing.

The leading wine-type varieties continued to be Chardonnay and Cabernet Sauvignon. Flame Seedless was the leading table-type grape variety. Thompson Seedless continued to be the leading raisin-type variety and was utilized for raisins, fresh market, concentrate, and wine.

ESTIMATED GRAPE ACREAGE 1/ 2/				
Type	2012	2013	2014	Percent Change
Raisin	203,000	203,000	192,000	-5.4

ACKNOWLEDGMENTS

We sincerely thank the many farm operators, owners, and management firms providing the information. Funding was provided by an assessment on wine grapes plus funding from the California Table Grape Commission and the Raisin Administrative Committee.

Several County Agricultural Commissioners provided a significant number of individual grower changes. We would particularly acknowledge the work of the Merced, Napa, and Sonoma county staff.

*Synonyms for variety names are shown on Page 5.

1/ Totals may not add due to rounding.

2/ Non-bearing years are 2012, 2013 and 2014. Thompson Seedless and all table grapes begin bearing after one non-bearing year in Riverside and Imperial counties.

*Synonyms for variety names are shown on Page 5.

1/ Totals may not add due to rounding.

2/ Non-bearing years are 2012, 2013, and 2014. Thompson Seedless and all table grapes begin bearing after one non-bearing year in Riverside and Imperial counties.

*Synonyms for variety names are shown on Page 5.

1/ Totals may not add due to rounding.

2/ Non-bearing years are 2012, 2013, and 2014. Thompson Seedless and all table grapes begin bearing after one non-bearing year in Riverside and Imperial counties.
