### RESULTS

The wine-type grape acreage is estimated at 540,000 acres. Of the total acres, 510,000 were bearing and 30,000 were non-bearing. Table-type grape acreage totaled 118,000 acres with 115,000 bearing and 3,000 non-bearing.

The leading wine-type varieties continued to be Cabernet Sauvignon and Chardonnay. Flame Seedless was the leading table-type grape variety.

### OBJECTIVES

The USDA's National Agricultural Statistics Service (NASS) Pacific Regional Office partners with California Department of Food and Agriculture and the California Table Grape Commission to conduct an annual acreage survey of California grape growers. The purpose of this survey is to provide annual grape acreage with information on new plantings and removals. It is a continuation of a long series of industry-funded grape acreage surveys.

This report consists of two parts:

- Estimated grape acreage -- bearing, non-bearing, and total.
- Detailed data by variety, and year planted -- as voluntarily reported by grape growers and maintained in our list of grape vineyards.

With perfect information, the estimated grape acreage and the detailed data would be the same. However, this will never be the case for the following reasons:

- A voluntary survey of approximately 6,500 grape growers is unlikely to attain 100 percent completeness.
- It is difficult to detect growers who are planting grapes for the first time.
- The detailed data reflects vine removals from over 21,000 acres during the past twelve months. Of this number, significant acreage was harvested in 2025 prior to being pulled out. As a result, harvested acreage removed in 2025 is included in the estimated acreage for 2025, but excluded from the detailed data.

### PROCEDURES

The major source of the grape detailed data was a questionnaire mailed to table and wine grape growers from our list of grape vineyards. The mailing was made in October 2025 to approximately 6,500 grape growers. The questionnaire contained previously reported crop, variety, and acreage information preprinted. Producers were asked to update the information with new plantings, removals, and any other corrections; new growers were mailed a blank questionnaire. This report includes responses from growers received through the middle of April 2026.

### ACKNOWLEDGMENTS

We sincerely thank the many farm operators, owners, and management firms providing the information. Funding was provided by an assessment on wine grapes plus funding from the California Table Grape Commission.
