CALIFORNIA DEPARTMENT OF FOOD AND AGRICULTURE

Sacramento, California

James G. Youde, Acting Director

# DEFINITION OF DISTRICTS

### NORTH COAST

1. Mendocino and Lake Counties
2. Sonoma and Marin Counties
3. Napa County
4. Solano County

### CENTRAL COAST

5. Northern Section: Alameda, Contra Costa, San Mateo, Santa Clara and Santa Cruz Counties.
6. Southern Section: Monterey, San Benito, San Luis Obispo and Santa Barbara Counties.

### CENTRAL VALLEY

7. Lodi Area: From the Eight Mile Road in San Joaquin County north including all of the grape producing counties in the Sacramento Valley and the Foothill Counties of Amador, Calaveras, El Dorado, Nevada and Placer.
8. Modesto Area: From the Eight Mile Road in San Joaquin County south including Merced, Tuolumne, and Stanislaus Counties.
9. Central San Joaquin Valley: Includes Madera and Fresno Counties; and Kings and Tulare Counties north of Nevada Avenue - Avenue 192.
10. Southern San Joaquin Valley: Includes Kings and Tulare Counties south of Nevada Avenue - Avenue 192; and all of Kern County.

### SOUTHERN CALIFORNIA

11. Includes the counties of Los Angeles, Orange, Riverside, San Bernardino and San Diego.

## GRAPE CRUSH REPORT

Information contained in this report was supplied by vintners to fulfill the reporting requirements of Senate Bill No. 1609.

This report includes all grape tonnage crushed and all tonnage purchased and priced as of February 25, 1977 by California vintners. Data by varieties are shown for eleven grape reporting districts as well as for the State totals. In some cases, individual variety price information and tons purchased have been omitted for one or more districts to avoid disclosure of individual operations. However, these prices and tons are included in the State averages and totals.

Total grapes crushed in 1976 was 2,210,654 tons which is a 1.9 percent increase over the 1975 total crush of 2,169,000 tons. The weighted average degrees brix for all grapes crushed in 1976 was 20.9 which is slightly lower than last year's 21.2 degrees brix. This reduction was probably due to the unusually wet fall weather.

The reported weighted average degrees brix for grapes purchased was 21.0. The weighted average price per ton for grapes reported as having a final price was \$116.08 for all varieties. This is 28 percent higher than the 1975 price of \$90.50. Weighted average price for raisin type grapes was \$84.72 per ton, table type grapes was \$83.04 per ton, and wine type was \$135.35 per ton.

### DEFINITIONS

Tonnage Crushed: Totals reported reflect the quantity crushed by variety and Grape Reporting District where the grapes were grown. Minor tonnages are not reported at the district level, but are included in the State total. Packing-house culls are included in "all raisin grape" and "all table grape" totals. Mixed lots of wine grapes are included in "other wine grape" totals.

Tonnage Purchased: Purchased tonnage reflects totals by variety and district where grown for all grapes with final prices not subject to change. Minor tonnages are not reported at the district level, but are included in the State total. Grapes pooled by cooperatives and those grown by wineries and used for their own production are not included in purchases.

Weighted Average Prices: Prices reflect actual weighted averages of final prices not subject to further revision. Prices do not include grower returns for tonnage pooled by cooperatives or returns for grapes grown by wineries and used for their own production. Adjustments for sugar calculations and any bonuses or allowances are included.

The weighted average prices reported by variety and district are final prices for grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy. Final prices for grape distilling material other than beverage brandy are shown separately.

Prices are equivalent to delivered basis in the area grown including normal within-area hauling allowances. Purchases made on a roadside basis include the usual hauling allowance for local delivery in the area grown. Out-of-area purchases made on a delivered basis do not include extra hauling costs for delivery outside the area.

Base Prices: Base prices in this report are subject to adjustments to reflect quality of grapes when delivered. Adjustments principally reflect sugar content, but may reflect other quality factors such as defects or material other than grapes.

Average Degrees Brix: Degrees brix for tonnage crushed are weighted averages based on reports from cooperatives and independently owned wineries. Degrees brix for purchased grapes are weighted averages based on tonnage where price is final and not subject to change.

Brix Adjustment Factors: The brix adjustment factors determine adjustments to base prices to compensate for sugar variations. In this report, adjustments are expressed in dollars per ton, or percent of base price per degree variance from the established brix base. Occasional lots are traded on price per degree brix as delivered.
