

1997 California Pistachio Acreage Survey

Released: August 19, 1997
12:00 NOON PDT

CALIFORNIA AGRICULTURAL
STATISTICS SERVICE

OBJECTIVES

The California Agricultural Statistics Service (CASS) conducted a pistachio acreage survey to provide the California Pistachio Commission (CPC) with current acreage, variety, and year of plant data.

PROCEDURES

Survey preparation began in February 1997. Key pistachio industry sources evaluated and provided input regarding survey structure and questionnaire design. Particular attention was focused on replants and rootstock. The CASS grower list was updated using CPC, Agricultural Commissioner Pesticide Permits, nurseries, and other industry sources. The acreage questionnaire was mailed to the updated grower list on May 16, 1997. After an allowance of three weeks for a mail return, CASS personnel contacted non-respondents by telephone. Field personnel made personal visits to large growers and to those CASS could not contact via mail or telephone. Survey data continued to be edited and included up to an extended cutoff of July 29.

RESULTS

The pistachio industry showed strong support for the survey. Nearly 100 percent of the growers responded to the survey.

The attached summary tables show the results of the 1997 acreage survey. These data are for dissemination to the pistachio industry and other interested parties. Only State totals have been published; individual reports remain confidential.

Total 1997 acreage is 82,435 (65,373 bearing and 17,062 non-bearing). Kern is the leading county with a total of 31,270 acres in 1997 (24,222 bearing and 7,048 non-bearing). Madera is second with 19,603 acres (17,517 bearing and 2,086 non-bearing). The next largest are as follows: Tulare, 7,687 acres; Kings, 7,338; Fresno, 6,764 acres; Merced, 4,737 acres.

Many of the original orchards planted on the Atlantica rootstock were dying because of verticillium wilt. This was particularly true in the old cotton ground of Kern County. To remedy the problem, wilt resistant rootstock such as Pioneer Gold I and II were developed. Since that time most of the pistachios planted have been grafted to Pioneer Gold rootstock. As of 1997, 42,739 acres (28,715 bearing and 14,024 non-bearing) were planted to Kerman/Pioneer Gold I and 29,132 acres (28,670 bearing and 462 non-bearing) were planted to Kerman/Atlantica. Kerman/Pioneer Gold II had 2,496 acres planted.

ACKNOWLEDGEMENTS

A special thanks goes to the pistachio farm operators and owners who provided information on their operations. Likewise, thanks to the CPC for their funding and support of this special acreage update survey. We also want to acknowledge Cindy Claypoole, from our office, for coordinating the survey, assisting the growers and/or operators in completing the questionnaires, and processing the data.
