UNITED STATES

November Prices Received Index Up 4.6 Percent

The November Prices Received Index 2011 Base (Agricultural Production), at 88.6, increased 4.6 percent from October and 0.2 percent from November 2018. At 82.6, the Crop Production Index was up 1.7 percent from last month but down 1.8 percent from the previous year. The Livestock Production Index, at 96.6, increased 7.0 percent from October and 4.2 percent from November last year. Producers received higher prices during November for market eggs, lettuce, cattle, and milk but lower prices for corn, broilers, apples, and hogs. In addition to prices, the indexes are influenced by the volume change of commodities producers market. In November, there was increased monthly movement for corn, milk, cattle, and cotton and decreased marketing of soybeans, grapes, wheat, and lettuce.

November Prices Paid Index Up 0.3 Percent

The November Prices Paid Index for Commodities and Services, Interest, Taxes, and Farm Wage Rates (PPITW), at 110.4, is up 0.3 percent from October 2019 and 0.5 percent from November 2018. Higher prices in November for feeder cattle, herbicides, supplements, and feeder pigs more than offset lower prices for feed grains, other machinery, mixed fertilizer, and concentrates.
