October Prices Received Index Down 1.7 Percent

The October Prices Received Index 2011 Base (Agricultural Production), at 106.8, decreased 1.7 percent from September but increased 20 percent from October 2020. At 106.0, the Crop Production Index was down 2.1 percent from last month but up 21 percent from the previous year. The Livestock Production Index, at 108.1, decreased 0.8 percent from September, but increased 20 percent from October last year. Producers received lower prices during October for corn, hogs, market eggs, and broilers, and higher prices for lettuce, milk, sweet corn, and broccoli. In addition to prices, the volume change of commodities marketed also influences the indexes. In October, there was increased monthly movement for soybeans, corn, cotton, and calves and decreased marketing of cattle, milk, broilers, and wheat.

October Prices Paid Index Up 0.8 Percent

The October Prices Paid Index for Commodities and Services, Interest, Taxes, and Farm Wage Rates (PPITW), at 117.7, is up 0.8 percent from September 2021 and 7.9 percent from October 2020. Higher prices for feeder cattle, supplements, mixed fertilizer, and diesel more than offset lower prices in October for feed grains, complete feeds, concentrates, and milk cows.
