HONEY AND LAND VALUES FINAL ESTIMATES

USDA's National Agricultural Statistics Service has published final estimates for Honey and Agricultural Land Values, including revisions made by the Agricultural Statistics Board (ASB), for the production years 2018-2022 and 2019-2023, respectively. Honey data were published during calendar years 2018-2022 in periodic ASB reports. Agricultural Land Values data were published during calendar years 2019-2023. Data included in these final publications provide a historic record and a benchmark for current estimates.

Revisions were made after a thorough review of the original survey data and all additional data now available, including the 2022 Census of Agriculture. The 2018-2022 honey estimates and the 2019-2023 Agricultural Land Values estimates are considered final and will not be revised again.

The estimates can be accessed using the QuickStats online database, found here: http://www.nass.usda.gov/Quick_Stats/. If you have any questions, please feel free to contact your USDA NASS State Statistician at 1-800-392-3202:
