

Maryland & Delaware

Weekly Crop and Weather Report

CW0409

04/27/2009

Wet Field Conditions Hamper Corn Planting

For the week ending, April 26, 2009, the days suitable for fieldwork were **3.8** days in Maryland and **2.8** days in Delaware. Soil moistures reported adequate in both States. One crop reporter on Lower Eastern Shore reported “*Very high heat at the end of the week – record breaking. Farmers were making use of the clear weather to get their corn in. Some complaints of flooded/sloppy field conditions now – with farmers worried about their corn crops being planted timely.*”

Hay supplies were short to adequate throughout Maryland and Delaware. **Corn** planting progressed with 7 percent of the crop in the ground for Maryland and 9 percent for Delaware. **Potato** planting made good progress with 62 and 83 percent planted respectively in Maryland and Delaware. **Green Pea** planting is nearly complete with 75 and 84 percent planted respectively in Maryland and Delaware. Fruits continued to bloom with **peaches** clearing the 40 percent mark and **strawberries** exceeding 55 percent in both States. **Small grains** were in fair to good condition, with **barley** surpassing 20 percent headed in both States and **winter wheat** at 6 percent headed in Maryland. Some farmers with small grain fields are scouting for sawflies, armyworms, and aphids. **Pasture** conditions were good in both states.

CROP PROGRESS FOR WEEK ENDING APRIL 26, 2009

Item	Maryland				Delaware			
	This	Last	Last	5 Year	This	Last	Last	5 Year
