2021 Delaware Farms and Land in Farms

The number of farms in Delaware for 2021 is estimated at 2,300 farms, unchanged from previous year, according to Shareefah Williams, state statistician of USDA's National Agricultural Statistics Service Delaware Field Office. Total land in farms, at 530 thousand acres, is unchanged from 2020. The average farm size for 2021 is 230 acres, also unchanged from the previous year.

Farm numbers and land in farms are differentiated by six economic sales classes. Farms and ranches are classified into these six sales classes by summing the sales of agricultural products and government program payments. Sales class breaks occur at \$10,000, \$100,000, \$250,000, \$500,000, and \$1,000,000. In 2021, the National Agricultural Statistics Service (NASS) implemented a statistical modeling approach to generate survey indications. This approach was in response to the impacts of the COVID-19 pandemic on data collection processes and the suspension of in-person data collection.
