Delaware September crop forecast

DOVER, DE ---The USDA-NASS has released the crop production forecast for September, according to Shareefah Williams, state statistician of the USDA's National Agricultural Statistics Service (NASS), Delaware Field Office. The latest survey, which was conducted during the last week of August and the first week of September, included the following commodities:

Corn production is forecast at 31.6 million bushels, up 11% from 2022. Based on conditions as of September 1, yields are forecast to average 184.0 bushels per acre, 14 bushels above the 2022 average. Area harvested for grain is forecast at 172 thousand acres, up 3% from 2022.

Soybean production is forecast at 6.66 million bushels, down 2% from 2022. Based on September 1 conditions, yield is forecast to average 45.0 bushels per acre, 2 bushels above last year. Area for harvest is forecast at 148 thousand acres, down 10 thousand acres from 2022.

Production forecasts are released monthly and do not reflect final production estimates. The next production forecast will be issued October 12, 2023.
