

# Florida Citrus Harvesting Season

## U.S. and Florida Citrus Production

United States citrus utilized production for the 2022-2023 season totaled 4.90 million tons, down 12 percent from the 2021-2022 season. California accounted for 79 percent of total United States citrus production; Florida totaled 17 percent, and Texas and Arizona produced the remaining 4 percent.

Florida's share of U.S. citrus production in 2022-2023 is 18.1 million boxes, down 60 percent from the previous season's 45.3 million boxes.

Florida's orange production, at 15.8 million boxes, is down 62 percent from the previous season. Grapefruit utilization in Florida, at 1.81 million boxes, is down 46 percent from last season's utilization. Tangerine and tangelo production in 2022-2023 is down 36 percent from the previous season.

## County Production

The top 5 citrus producing counties were Polk (3.52 million boxes), Highlands (2.78 million boxes), DeSoto (2.26 million boxes), St. Lucie (2.10 million boxes), and Hendry (1.87 million boxes). Together they account for 69 percent of the state's total citrus production. Oranges constituted 87 percent of the citrus production, grapefruit accounted for 10 percent, and tangerines and tangelos represented 3 percent.

Estimates of county production are prepared from objective survey data used in forecasting citrus crop production. The apportionment of final harvest to the counties is based on bearing trees, an estimate of the average fruit per tree, and the drop and size surveys. Sample size used in these surveys and the distribution of the sample groves around the state are chosen to minimize error in the estimates of production and are not to be considered as precise for the counties as at the state level.

## Citrus Value

The value of the 2022-2023 United States citrus crop was down 13 percent from last season, to \$2.58 billion, (packinghouse-door equivalent). Orange value of production decreased 36 percent from last season and grapefruit value is up 8 percent. Tangerine and mandarin value of production is up 14 percent from last season and lemon value of production is up 5 percent from last season.

Florida's \$194 million preliminary on-tree value of the 2022-2023 citrus crop is 61 percent less than the \$501 million revised value for 2021-2022.

### Citrus Value of Sales On-Tree – Florida: Crop Years 2013-2014 through 2022-2023

Crop year	Value <sup>1</sup> (1,000 dollars)	Crop year	Value <sup>1</sup> (1,000 dollars)
2013-2014.....	1,173,181	2018-2019.....	902,374
2014-2015.....	1,049,743	2019-2020.....	696,170
2015-2016.....	947,542	2020-2021.....	612,716
2016-2017.....	926,934	2021-2022 <sup>2</sup> .....	500,583
2017-2018.....	636,747	2022-2023 <sup>3</sup> .....	193,949

<sup>1</sup> Does not include lemons.

<sup>2</sup> Revised.

<sup>3</sup> Preliminary.

## Citrus Foreign Exports

Fresh fruit exports totaled 467 thousand <sup>4</sup>/<sub>5</sub>-bushel cartons. Belgium received most of Florida's grapefruit exports. Canada accounted for most of Florida's orange and tangerine exports. A total of 675 thousand gallons of Frozen Concentrated Orange Juice (FCOJ) were exported in the 2022-2023 season.

## Frozen Concentrate

Final Frozen Concentrated Orange Juice (FCOJ) yield, as reported by the Florida Department of Citrus, was 1.09461 gallons per box of 42° Brix concentrate, a decrease from the 2021-2022 season. The early-midseason portion of the crop finalized at 1.07542 gallons per box. The late crop yielded 1.10026 gallons per box.

No Frozen Concentrate Grapefruit Juice (FCGJ) yield was reported.

The final Frozen Concentrated Tangerine Juice (FCTJ) yield of 1.29746 gallons per box of 42° Brix concentrate was more than the previous season's final of 1.24565 gallons per box.

### Citrus Average Price Delivered-in Processed Fruit – Florida: Crop Year 2022-2023

Variety	Price per box (dollars)	Price per pound of solids (dollars)
All oranges.....	11.511326	2.366031
Early-midseason.....	10.555343	2.259045
Valencia.....	12.102029	2.428002
All grapefruit.....	15.106848	3.432529

## Tree Inventory

Results of the annual Commercial Citrus Inventory show total citrus acreage is 332,256 acres, down 11 percent from the last annual survey. The net loss of 43,046 acres is 11,000 acres more than what was lost the previous season. New plantings at 6,203 acres are down from the previous season. All citrus trees, at 50.3 million, are down 10 percent from the previous season.

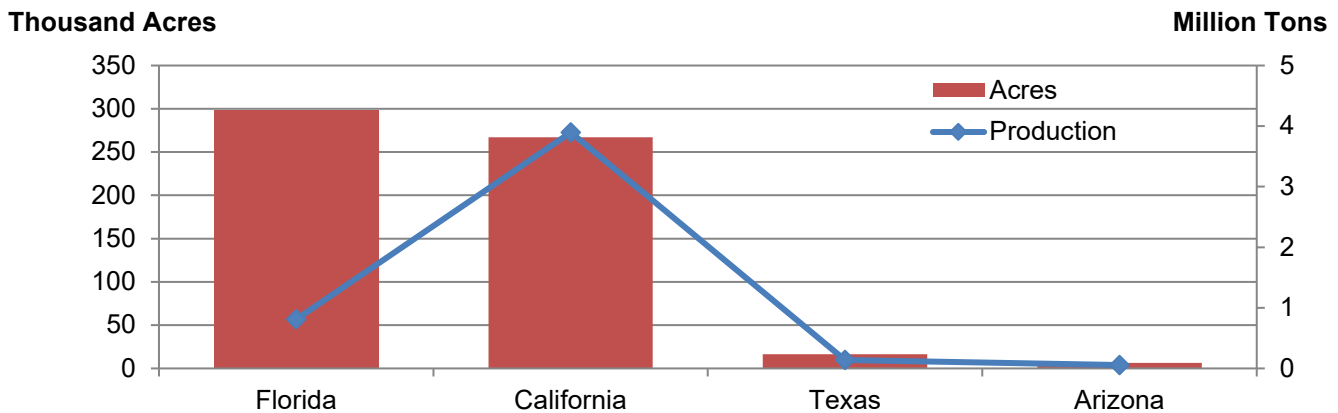

All 24 published counties included in the survey showed decreases in acreage. Hendry County lost the most acreage, down 11,073 acres from the previous season. Desoto County remains the leader in acreage with 60,845 acres.

**Orange** acreage is now at 303,284 acres, down 12 percent from the previous season. Valencia acreage accounts for 62 percent of the total orange acreage, non-Valencia acreage represents 36 percent, and the remaining orange acreage is unidentified.

**Grapefruit** acreage is now at 15,887 acres, down 12 percent from the previous season. White grapefruit (including seedy) is 11 percent of the total with 1,774 acres, while red grapefruit is 88 percent of the total with 14,054 acres. The remaining grapefruit acreage is unidentified.

**Specialty fruit** acreage, at 13,085 acres, is down 4 percent from the previous season. Tangerines and tangelos account for 60 percent of the specialty fruit, with 7,802 acres. The remaining acreage includes true lemons and other citrus acreage, with a total of 5,283 acres, or 40 percent.

### Leading Citrus States: Bearing Acreage and Production, Crop Year 2022-2023

### Citrus Box Approximate Net Weight by Fruit Type – States: Crop Year 2022-2023

State	Orange (pounds)	Grapefruit (pounds)	Tangerine (pounds)	Lemon (pounds)
FL .....	<sup>1</sup> 90	85	<sup>2</sup> 95	90

**Avocados in Florida**

The 2023 production of Florida avocados decreased 269,0000 bushels, or 41 percent, when compared to the 2022 harvest season. Bearing acreage is down 500 acres from the previous season. The price per bushel is \$27.78, up 26 percent from the 2022 harvest crop. The total value of crop production is \$10.7 million, a decrease of 25 percent from the previous season.

In Florida, there are about 25 major and 25 minor varieties grown commercially among the 600 varieties in the state. There are three “races” – West Indian/Antillean, Guatemalan and Mexican. Florida avocados are Antillean and hybrids. Florida common varieties include ‘Donnie’, ‘Dupuis’, ‘Hardee’, ‘Pollock’, ‘Simmonds’, ‘Russell’, ‘Lula’, ‘Choquette’ and ‘Monroe’. Florida avocados have a lower fat content than those from other states and countries. They are typically larger than avocados from California and are available from June through the end of February.
