# FLORIDA AGRICULTURE BY THE NUMBERS

Florida Department of Agriculture and Consumer Services  
Adam H. Putnam, Commissioner

## Dear Friends of Agriculture,

Agriculture is one of the strongest pillars of Florida's economy, generating more than \$120 billion in annual economic impact and supporting more than 2 million jobs.

The complexion of Florida's agriculture industry continues to evolve in light of challenges facing our citrus industry with fresh market vegetables, fruits and livestock industries increasing their contributions to the state's overall agricultural cash value.

2014 was a great year for many Fresh From Florida commodities. Bell peppers (\$164 million), hay (\$133 million), peanuts (\$145 million), potatoes (\$131 million) and honey (\$31 million) all had higher production value than in 2013. Florida leads the United States in production value of fresh market snap beans, fresh market cucumbers, cucumbers for pickles, grapefruit, oranges, squash, sugarcane, fresh market tomatoes and watermelons.

This publication, produced by the Florida Department of Agriculture and Consumer Services, is a compilation of useful data and information that summarizes Florida's agriculture impact to our state. Collectively, these figures demonstrate the extent that Florida agriculture feeds and enriches the lives of Floridians, people throughout the United States and around the world.

Find these figures and more in this 2014 edition of Florida Agriculture by the Numbers.

Sincerely,

A handwritten signature in black ink that reads "Adam H. Putnam".

Adam H. Putnam  
Commissioner of Agriculture

## ACKNOWLEDGMENT

The acreage, production, and value statistics in this publication are the official State and USDA estimates prepared by the National Agricultural Statistics Service (NASS), Florida Field Office in cooperation with the Florida Department of Agriculture and Consumer Services. These estimates are current as of September 2015 and may be revised later in the year or in the following year if additional data becomes available. Any revisions made to these estimates, as well as estimates made after September 2015, are included in reports posted to the website shown below and available from the NASS Florida Field Office.

Most of the data used to develop these estimates were provided voluntarily by growers, shippers, and processors and the US Department of Agriculture sincerely appreciates their cooperation. The Florida Tomato Committee, the Florida Fruit and Vegetable Association, Florida Department of Citrus, floriculture and nursery producers, sales agencies, and transportation firms have provided valuable assistance and data throughout the season. The Florida Department of Agriculture and Consumer Services Bureau of State Farmers Markets and the County Agricultural Agents of the University of Florida Cooperative Extension Service were also very helpful in supplying area and county estimates.

The individuals and organizations who comprise the Florida agricultural industry need reliable and accurate estimates of production to make informed and knowledgeable decisions. Increasing unpredictability of commodity prices and competition from global markets make accurate and unbiased estimates even more important. Farmers, agribusinesses, producers groups, educators, researchers, legislators and the media all need these estimates to develop sound policies and to promote Florida agricultural products.

I want to express my sincere gratitude to our dedicated staff of statisticians, support personnel, citrus field staff, and field and telephone enumerators. They are the ones who have worked hard to collect, review, summarize this important data and publish the results.

All NASS reports are available free of charge at:

State Statistician  
USDA-NASS Florida Field Office

## FLORIDA AGRICULTURE BY THE NUMBERS

Florida Agriculture by the Numbers has been published to provide you with reliable, comprehensive information and data on Florida agriculture. People worldwide use the basics of food, fiber and forestry products daily. Florida's producers contribute greatly to the bounty enjoyed in Florida, the United States and beyond. The following pages tell their story of productivity, innovation and delivery.

This reference book is divided by sections for ease of use. The Agricultural Overview Section provides a general overview of Florida agriculture. The Agricultural Statistics Section presents comparative performances of major commodity groups and benchmark economic data. The Groups Directory Section offers contact information for a variety of agricultural related entities. Both public and private organizations are listed. The Department Contacts Section identifies the Florida Department of Agriculture and Consumers Services' divisions with contact information.

As is occasionally the case when analyzing agricultural and economic data, numbers in rows or columns do not always sum exactly. This usually occurs when large numbers are abbreviated or when composite prices are compiled. The difference in these cases is a rounding margin. The rounding of numbers occurs in these pages when space is a consideration.

Whether you are using this book to learn more about Florida agriculture, as a reference for contact information or for any other use, Florida Agriculture by the Numbers will definitely serve as an excellent reference source throughout the year. Together, these sections provide a valuable insight to Florida agriculture and its impact on Florida's economy.

We are pleased to present Florida Agriculture by the Numbers. If you need additional information or assistance, please call the Division of Marketing and Development at (850) 617-7300.

# FLORIDA AGRICULTURE OVERVIEW

Florida's 47,600 farms and ranches, utilized 9.50 million acres, and continue to produce a wide variety of safe and dependable food products. From the citrus groves and the nurseries in central and southern Florida, to the vegetables in various regions around the State, to the cattle and calves throughout the State, these farms and ranches provide Florida with a large and stable economic base.

## In 2014 Florida ranked nationally:

- **1st** in value of production for fresh market tomatoes, watermelons, grapefruit, fresh market snap beans, squash, sugarcane, oranges, fresh market cucumbers and cucumbers for pickles.
- **2nd** in value of production for greenhouse/nursery products, strawberries, fresh market sweet corn, bell peppers, spring potatoes, peanuts, tangerines, and avocados.
- **3rd** in value of production for honey and fresh market cabbage.

## In 2014, in terms of total value of production, Florida accounted for:

**60%** of the total U.S. value for **Oranges** (\$1.17 billion)

**58%** of the total U.S. value for **Grapefruit** (\$117 million)

**39%** of the total U.S. value for **Fresh Market Tomatoes** (\$437 million)

**39%** of the total U.S. value for **Fresh Market Cucumbers** (\$65.3 million)

**35%** of the total U.S. value for **Snap Beans** (\$77.4 million)

**27%** of the total U.S. value for **Bell Peppers** (\$164 million)

**21%** of the total U.S. value for **Squash** (\$40.6 million)

**19%** of the total U.S. value for **Watermelons** (\$80.1 million)

**18%** of the total U.S. value for **Sweet Corn** (\$130 million)

**9%** of the total U.S. value for **Tangerines** (\$47.8 million)

Source: USDA/NASS – Florida Field Office

Florida citrus growers in 2013-2014 produced 104.7 million boxes of oranges (95 percent of which were used for orange juice) and 15.7 million boxes of grapefruit (57 percent of which were used for grapefruit juice). Fruit sales exceeded \$1.57 billion.

Florida growers harvested vegetables for fresh market, potatoes, sweet potatoes, strawberries, and blueberries from 200,600 acres in 2014. The value of vegetable crops exceeded \$1.55 billion. Florida ranks second to California in the total value of published fresh market vegetable production.

Livestock and Products in 2013 produced cash receipts of \$1.97 billion. Poultry farms generated \$408 million in sales with \$238 million from broilers and \$166 million from eggs.

On January 1, 2015 there were 1.7 million head of cattle on farms and ranches in Florida, including 916,000 head of beef cows and 124,000 head of milk cows. Florida ranked 12th in the number of layers on farms in 2014. Florida's poultry farmers maintained an average of 8.6 million layers in 2014 (producing 2.39 billion eggs) and produced 66.7 million broilers.

The total cash receipts for nursery and greenhouse products in Florida were just over \$1.62 billion in 2013.

# 2013 FLORIDA CASH RECEIPTS

# FLORIDA CASH RECEIPTS - 2013

The Economic Research Service, (ERS), USDA, reports that receipts from Florida agricultural products in 2013 totaled to \$8.45 billion. This is an increase of 3 percent from 2012.

All crops accounted for 76.7 percent of total cash receipts. As in previous years, the leading crop commodities

were greenhouse/nursery (19.2 percent), oranges (14.7 percent), sugarcane (8.0 percent), and tomatoes (5.4 percent). The leading livestock commodities were cattle and calves (7.9 percent of all cash receipts), dairy products (6.7 percent), and poultry and eggs (4.8 percent).

## Cash Receipts, by Commodity Groups and Selected Commodities – Florida: 2013

[2013 preliminary. Percent's for individual commodities may not add to totals in some groups because of rounding]

Commodity	2013	Percent of Total
	Cash Receipts (1,000 Dollars)	
Total Cash Receipts from Farm Marketings	8,453,604	100
All Crops	6,481,702	76.7

# FARMS AND LAND IN FARMS

# FARMS AND LAND IN FARMS

Florida had 47,600 commercial farms in 2014, using a total of 9,500,000 acres. There were 5,500 farms with sales exceeding \$100,000.

The average farm size was 200 acres. Florida ranks 18th among all States in number of farms and 32nd in land in farms.

## Farms and Acreage by Year and by Economic Sales Class

Florida: 2002 - 2014

Year	Number of Farms				Total Acres (1,000 acres)				Average Farm Size (acres)
	Total	\$1,000 - \$9,999	\$10,000 - \$99,999	\$100,000 & over	Total	\$1,000 - \$9,999	\$10,000 - \$99,999	\$100,000 & over	
2002	44,000	27,600	11,000	5,400	10,300	1,700	2,350	6,250	234
2003	44,000	27,600	11,000	5,400	10,040	1,600	2,300	6,140	228
2004	43,200	27,000	10,700	5,500	9,830	1,600	2,100	6,130	228
2005	42,000	26,000	10,600	5,400	9,570	1,500	2,000	6,070	228
2006	41,000	24,700	10,600	5,700	9,460	1,400	2,000	6,060	231
2007	47,500	29,500	12,700	5,300	9,300	1,400	2,000	5,900	196
2008	47,500	29,300	12,900	5,300	9,300	1,410	1,970	5,920	195
2009	47,700	29,200	13,200	5,300	9,350	1,410	1,910	6,030	195
2010	47,600	29,000	13,300	5,300	9,400	1,400	1,900	6,100	195
2011	47,700	29,000	13,300	5,400	9,450	1,420	1,810	6,220	195

## Value Added to the U.S. Economy by the Agricultural Sector via the Production of Goods and Services

Florida: 2011-2013

Item <sup>1</sup>	2011 (thousand dollars)	2012 (thousand dollars)	2013 (thousand dollars)
Value of crop production	6,762,510	6,402,936	6,422,106
Value of livestock production	1,431,008	1,912,623	1,973,115
Farm-related income	650,934	647,929	589,948
Value of agricultural sector production	8,844,452	8,963,487	8,985,169
less: Purchased inputs	4,403,273	4,594,250	4,304,097
Farm origin	1,096,897	1,060,188	1,198,434
Manufactured inputs	1,238,604	1,282,710	1,338,540
plus: Net government transactions	-134,933	-180,902	-120,335
+ Direct Government payments	175,096	69,139	71,090
- Motor vehicle registration and licensing fees	10,029	10,040	11,425
- Property taxes	300,000	240,000	180,000
Gross value added	4,306,246	4,188,335	4,560,737
less: Capital consumption	488,784	437,611	482,424
Net value added	3,817,462	3,750,724	4,078,313
Less: Payments to stakeholders	1,710,662	1,474,844	1,679,911
Employee compensation (total hired labor)	1,158,462	1,162,944	1,393,562
Net rent received by Non-operator landlords	92,424	23,922	-9,673
Real estate and Non-real estate interest	459,776	287,978	296,023
<b>Net Farm Income</b>	<b>2,106,800</b>	<b>2,275,880</b>	<b>2,398,402</b>

1 Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

### Net Farm Income

Leading States: 2013

State	Net farm income (million dollars)	State	Net farm income (million dollars)
1. California	12,112,873	10. Wisconsin	3,917,541

### Florida Cash Rents

2013-2014

# CITRUS

# CITRUS HIGHLIGHTS

## U.S. and Florida Production

U.S. citrus utilized production for the 2013-2014 season totaled 9.4 million tons, down 15 percent from the 2012-2013 season. Florida accounted for 59 percent of total United States citrus production, while California totaled 37 percent, and Texas and Arizona combined produced the remaining 4 percent. Total utilized citrus production was down from the previous year in all citrus reporting states except Arizona, which was unchanged.

Florida's share of U.S. citrus production was 124 million boxes in the 2013-2014 season, down 21 percent from the previous season's 156.2 million boxes. Production decreased for all citrus varieties when compared to last season.

Florida's all orange production decreased by 22 percent to 104.6 million boxes. All grapefruit production is down 15 percent to 15.7 million boxes. Production of Honey tangerines is down 16 percent and early tangerine production is down 8 percent, resulting in a 12 percent decrease in all tangerines. Tangelo production is down 12 percent.

## Production by Area and County

Each production area and county showed a decrease in citrus production compared to 2012-2013. The top 5 citrus producing counties were Polk (19.9 million boxes), Hendry (16.3 million boxes), Highlands (14.9 million boxes), DeSoto (13.7 million boxes), and Hardee (10.5 million boxes). Polk County had the largest loss in production (4.7 million boxes). By percentage, Sarasota County had the greatest decrease, with 46 percent fewer boxes produced. By production area, the Western area showed the greatest loss in both actual production (10.1 million boxes) and percentage (25 percent fewer boxes), while the Indian River changed the least, with a decrease of 1.1 million boxes.

Estimates of county production are prepared from objective survey data used in forecasting citrus crop production. The apportionment of final harvest to the counties is based on bearing trees, an estimate of the average fruit per tree, and the drop and size surveys. Sample size used in these surveys and the distribution of the sample groves around the State are chosen to minimize error in the estimates of production and are not to be considered as accurate for the counties as at the State or area levels.

## Value

The value of the 2013-2014 United States citrus crop was up 7 percent from last season, at \$3.39 billion (packinghouse-door equivalent). Orange value of production decreased 5 percent from last season while grapefruit value is down 10 percent. Tangerine and mandarin value of production is 27 percent higher than last season and lemon value of production is up 62 percent. Tangelo value decreased 24 percent from the previous season.

Florida's \$946 million preliminary on-tree value of the 2013-2014 citrus crop is 19 percent less than the revised value of \$1.16 billion for 2012-2013. The price per box is higher for oranges, white grapefruit, and tangerines, but lower for colored grapefruit and tangelos. Only the tangerines have a higher value this season.

## Citrus Value of Sales On-Tree by Crop Year

Florida: 2004-2005 through 2013-2014

Crop year	Value <sup>1</sup> (1,000 dollars)
2004-2005	754,169
2005-2006	1,024,610
2006-2007	1,499,112
2007-2008	1,283,994
2008-2009	1,046,735
2009-2010	1,131,107
2010-2011	1,368,626
2011-2012	1,640,423
2012-2013 <sup>2</sup>	1,164,763
2013-2014 <sup>3</sup>	946,454

<sup>1</sup> Excludes lemons.

<sup>2</sup> Revised.

<sup>3</sup> Preliminary.

## Citrus Box Weights, Approximate Net Weight by Fruit Type

States: Crop Year 2013-2014

State	Orange	Grapefruit	Tangerine	Lemon	Lime
FL	(1) 90	85	95	90	88
CA	(2) 80	(3) 80	(2) 80	(4) 80	(X)
TX	85	80	(X)	(X)	(X)
AZ	(X)	(X)	(2) 80	(4) 80	(X)

X Not applicable.

<sup>1</sup> Includes Temples and tangelos at 90 pounds.

<sup>2</sup> Was 75 pounds prior to the 2010-2011 season.

<sup>3</sup> Was 67 pounds from the 1993-1994 to 2009-2010 season.

<sup>4</sup> Was 76 pounds prior to the 2010-2011 season.

## Foreign Exports

Fresh fruit exports totaled 7.8 million 4/5 bushel cartons. Japan accounted for the majority of Florida grapefruit exports. Canada received most of Florida's orange and specialty fresh fruit exports. A total of 12.3 million gallons of Frozen Concentrated Orange Juice (FCOJ), and 2.9 million gallons of Frozen Concentrated Grapefruit Juice (FCGJ) were exported in the 2013-2014 season.

## Frozen Concentrate

Final Frozen Concentrated Orange Juice (FCOJ) yield, as reported by the Florida Department of Citrus, was 1.569080 gallons per box of 42° Brix concentrate. A record FCOJ yield of 1.673141 gallons per box was set in the 2007-2008 season. The early-midseason portion of the crop finalized at 1.521318 gallons per box. The late crop yielded 1.642463 gallons per box.

The final Frozen Concentrated Grapefruit Juice (FCGJ) yield was 1.213862 gallons per box of 40° Brix concentrate, down slightly from last season's final of 1.218634 gallons per box. A record FCGJ yield of 1.364660 gallons was set in 2006-2007.

The final Frozen Concentrated Tangerine Juice (FCTJ) yield of 1.383379 gallons per box of 42° Brix concentrate was lower than last season's final of 1.469707 gallons per box. A record FCTJ yield of 1.757423 gallons was set in the 1992-1993 season.

## Citrus Average Price Delivered-in Processed Fruit

Florida: Crop Year 2013-2014

Variety	Price per box (dollars)	Price per pound of solids (dollars)
All oranges	9.956066	1.592656
Early-midseason	8.803857	1.466951
Valencia	11.232011	1.720636
All grapefruit	5.502753	1.244038
White	6.619484	1.508122
Colored	4.378551	0.982265

SOURCE: Florida Department of Citrus

## Tree Inventory

Results of the annual Commercial Citrus Inventory show total citrus acreage is 515,147, down 2 percent from the last survey and the lowest in a series which began in 1966. Compared to the previous inventory, new plantings increased but the higher gross loss resulted in a net decrease of 9,493 acres.

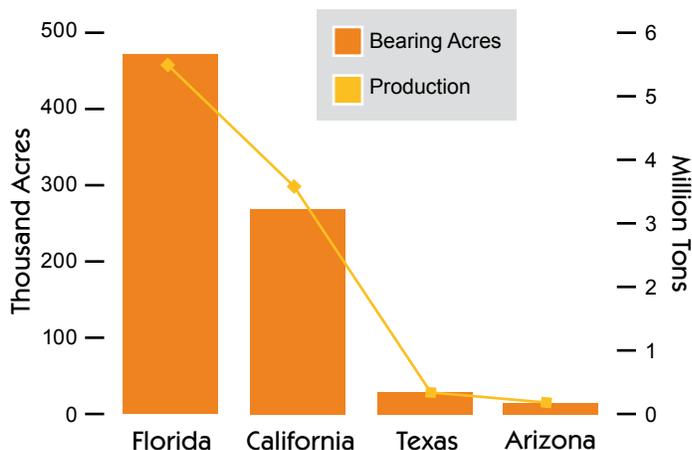

Of the 29 counties included in the survey, 22 recorded decreases in acreage, 6 showed increases, and 1 was unchanged. St. Lucie County, down 3,869 acres, has suffered the greatest loss this year, while Martin County lost the highest percentage with a 27 percent reduction. Desoto County has recorded gains in the last 7 surveys and this year's gain of 917 acres is the most of any county. Polk County remains the leader with 81,810 acres.

Orange acreage declined for the tenth consecutive survey to 452,364, replacing the record low of 459,311 acres tallied last year. Grapefruit acreage fell to a new low of 45,922. Specialty acreage continued to decline to a record low of 16,861 and represents only 3.3 percent of the total citrus acreage.

Total citrus trees have declined steadily from the peak in 1998 to 68.1 million. Polk County continues to lead with 10 million trees, followed by Hendry County with 9.5 million, DeSoto County with 8.9 million, and Highlands County with 7.9 million trees. The total is composed of oranges, 89 percent; grapefruit, almost 8 percent; and the remainder, including specialty and other citrus, at nearly 4 percent. Bearing trees decreased about 2 percent to 62.9 million while non-bearing trees increased over 15 percent to nearly 5.2 million since the previous survey.

# AVOCADOS IN FLORIDA

Florida avocado bearing acreage, yield per acre, production, price per bushel, and value of production data are not available for the 2012-2013 crop year due to temporary USDA program cuts. The 2013-2014 production of Florida avocados decreased 15,000 bushels, or 1 percent, when compared to the 2011-2012 harvest season. Bearing acreage is estimated at 7,000 acres, down 5 percent from 2011-2012, and the least since the 2007-2008 season. The price per bushel is \$21.89, up 5 percent from the 2011-2012 crop year. Total value of crop production is \$24.4 million, an increase of 4 percent from the 2011-2012 season.

In Florida, most early season varieties of avocados are West Indian types, whereas midseason and late varieties are mostly Guatemalan-West Indian hybrids or Guatemalan types. Commercial production is primarily in Miami-Dade and Collier counties. Florida avocados have a lower fat content than those from other states and countries, are typically larger than avocados from California, and are available from June through the end of February.

# FIELD CROPS

# 2014 FIELD CROPS HIGHLIGHTS

## Value

The 2014 total value of production for corn, cotton, cottonseed, hay, peanuts, pecans, soybeans and wheat totaled \$385 million, an increase of 1% from the previous year's total of \$380 million. The total value of corn production decreased 59 percent and was valued at \$19.4 million. The value of soybean production (\$14.2 million) decreased 2 percent. Peanut value of production (\$145 million) increased 16 percent, and hay (\$133 million) increased by 21 percent.

## Acres and Production

Acres harvested in 2014 for corn, cotton, hay, peanuts, soybeans and wheat totaled 679 thousand acres, down 1 percent from the 685 thousand acres harvested in 2013. Harvested acreage for soybeans (37,000), peanuts (167,000) and hay (320,000) increased. Decreased acreage was estimated for wheat (10,000), corn (40,000), and cotton (105,000). Production increased for cotton (14%), hay (26%), soybeans (29%), peanuts (29%), and cottonseed (58%). Production declined for corn (-48%), and wheat (-65%).

## Sugarcane

Florida producers harvested 412 thousand acres of sugarcane for sugar and seed in 2014, down 1 percent from 2013. Production was up 10 percent in 2014 from 2013. The value of production for the 2013 crop was \$505 million, down 25 percent from the 2012 total of \$677 million.

## Crop Weather

In **January** 2014, Florida had extremely low temperatures in the Panhandle and north Florida. Hard freezes occurred in central Florida, with low temperatures ranging from 14 to 24 degrees. Limited rain was received across the State throughout the month. Farmers in the northern part of the State were completing the harvest of soybeans. Planting of oats, wheat, rye, and winter grazing was ongoing. Rain was beneficial to earlier plantings. Sugarcane harvest proceeded as scheduled in Hendry, Palm Beach, and Glades counties.

In **February**, the month started with icy, wet weather which hampered field work and crop growth in the Panhandle. Sugarcane harvest was also delayed in Hendry, Palm Beach, and Glades counties due to rain. By month's end farmers in Washington and Gadsden counties were preparing ground for peanut and corn planting.

In **March**, the Panhandle and north Florida had low temperatures in the 30s. South Florida high temperatures ranged from 78 degrees to 90 degrees. By the end of the month, field corn planting had started in the Panhandle. Most fields in the Panhandle were too wet to work. Levy County farmers started planting peanuts while Dixie County farmers prepared fields for peanuts.

In **April**, most soil in the Panhandle was completely saturated, bringing field work to a standstill. Defuniak Springs (Walton County) received the most rain during the month at 11.25 inches. North Florida farmers continued planting corn and peanuts. As the month progressed, various portions of the Panhandle were able to begin planting corn, peanuts, and cotton.

In **May**, Governor Rick Scott declared a state of emergency in the following counties due to excessive rain; Escambia, Santa Rosa, Okaloosa, Walton, Holmes, Washington, Bay, Jackson, Calhoun, Gulf, Liberty, Franklin, Gadsden, Leon, Wakulla, Jefferson, Madison, Taylor, Hamilton, Suwannee, Lafayette, Dixie, Columbia, Gilchrist, Levy, and Alachua. Farmers in the Panhandle and north Florida were behind schedule on planting field crops due to the excessive rain. But by the month's end, peanut planting was 72 percent complete, ahead of last year's and the 5-year average of 68 percent.

In **June**, farmers experienced rain delays in harvesting winter wheat and oats early in the month. By mid-month, planting of peanuts was completed. Peanuts were in good condition and 39 percent pegged by the end of the month.

In **July**, Florida was drought free almost all month. By the second week of the month, Army worms were causing damage in forages, soybeans, and peanuts. Wet weather hindered haying throughout the State. Peanut pegging was at 89 percent, ahead of the previous year and the 5-year average. Rice harvesting began in Palm Beach County. Temperatures ranged from the low 50s to highs in the upper 90s.

In **August**, Florida experienced scattered showers and high temperatures. Army worms continued to cause damage to pastures, soybeans, and peanuts. Peanut pegging was completed by the end of the month. Sugarcane had grown to 8-10 feet tall. Extreme heat index warnings at the end of the month made for unsuitable working conditions across the State.

In **September**, hay, corn, and peanut harvest began in the Panhandle, north, and central Florida. Army worms were still a problem in parts of the Panhandle as were white mold on peanuts. By the end of the month, some areas saw peanut quality declining due to weather, disease, and pests. Sugarcane planting was underway in Glades and Hendry counties.

In **October**, frequent rain at the beginning of the month made field work difficult. Peanut harvesting was at 31 percent, below the 5-year average. Cotton was harvested in the Panhandle and hay continued to be harvested. Farmers in the Panhandle were planting rye grass, oats, and winter grazing. By the end of the month, peanut harvest was at 83 percent complete, slightly above the 5-year average.

In **November**, temperatures ranged from night time lows in the 20s to daytime highs in the upper 80s. The month started out dry but the end of the month had some areas receiving between three and seven inches of rain. Peanut harvest was completed in November, cotton and soybean harvest was near completion.

In **December**, the month started out very dry but wrapped up very wet in the northern part of the State. Quincy (Gadsden County) reported 9.43 inches of rain the last week of the month. Sugarcane harvesting continued through the entire month. By month's end, winter wheat and rye for grazing was rated in excellent growing condition.

# Field Crops Acreage, Yield, Production, and Value by Crop Years

Florida: 2005-2014

[All 2014 estimates are preliminary]

Crop and year	Area		Yield (bushels)	Production (1,000 bushels)	Season average price (dollars)	Value of production (1,000 dollars)

# FLORIDA AGRICULTURAL STATISTICS DISTRICTS

# LIVESTOCK AND PRODUCTS

# LIVESTOCK HIGHLIGHTS

## Dairy

Florida dairies produced 2.51 billion pounds of milk in 2014, up from 2.38 billion pounds produced during 2013. Annual milk production per cow was 20,382 pounds, up from 19,374 pounds per cow in 2013. On January 1, 2015, there were 124,000 milk cows on Florida farms and commercial dairies, an increase of 1,000 from 2014. Florida ranked 19th among States in number of milk cows.

Cash receipts from marketings of Florida milk in 2014 totaled \$705 million, up from \$560 million in 2013. In 2014, the highest price of replacement milk cows was \$2,190 per head in October 2014, compared to \$1,560 in January 2014.

## Beef

All cattle and calves on Florida farms and ranches as of January 1, 2015, including dairy cattle, totaled 1.7 million head, up 30,000 from 2014. Beef cows in Florida were 916,000 head, up 9,000 head from 2014. Nationally, Florida ranked 10th in beef cows and 16th in total cattle. Calves born during 2014 totaled 830,000, unchanged from a year earlier.

Cash receipts from cattle and calf marketings were \$868 million in 2014, up from \$653 million in 2013.

## Poultry

Hens and pullets of laying age on farms in December 2014 were 9 million birds, compared to 8.56 million birds in December 2013. Florida egg production from December 1, 2013 to November 30, 2014, was 2.39 million eggs, an increase from the previous year's production of 2.2 million eggs.

The total value of Florida egg production in 2014 was \$219 million, up from \$167 million in 2013. The value of broilers produced in Florida during 2014 totaled \$246 million, up from \$238 million a year earlier.

Florida liveweight broiler production in 2014 totaled 387 million pounds, down from 393 million pounds produced in 2013. Broilers produced in Florida during 2014 totaled 67.0 million birds, up from 64.4 million birds in 2013. Broilers hatched in Florida were 67 million chicks, up from 52.5 million chicks in 2013.

## Hogs

The hog inventory in Florida in December 1, 2014 was 17,000 head. There were 29,000 head of hogs marketed in Florida in 2014, up from 28,000 head in 2013. There were 40,700 head slaughtered in 2014, down from 76,000 head in 2013. Cash receipts from hogs in 2014 were \$3.12 million.

## Beef and Dairy Cows that have Calved and Replacement Heifers

Florida: January 1, 2006-2015

### Florida Broilers Production vs. Value of Production

## Hogs and Pigs Number on Farms and Inventory Value

Florida: 2005-2014

Year	Number on farms – December 1			Market hogs and pigs				Total Inventory value (1,000 dollars)
	Total Head (1,000 head)	Breeding (1,000 head)	Market (1,000 head)	Under 50 Pounds (1,000 head)	50-119 Pounds (1,000 head)	120-179 Pounds (1,000 head)	180 Pounds and over (1,000 head)	
2005	20	4	16	8	4	2	2	2,000
2006	20	4	16	7	4	4	1	1,860
2007	20	5	15	7	5	2	1	1,520
2008	20	5	15	6	6	2	1	1,860
2009	20	5	15	6	5	3	1	1,740
2010	15	3	12	4	4	2	2	1,650
2011	16	4	12	4	4	2	2	2,080
2012	15	3.5	11.5	4	3.5	2	2	1,800
2013	15	3.5	11.5	4	3.5	2	2	2,175
2014	17	4	13	4	5	2	2	2,550

## Hogs and Pigs Number on Farms and Inventory Value

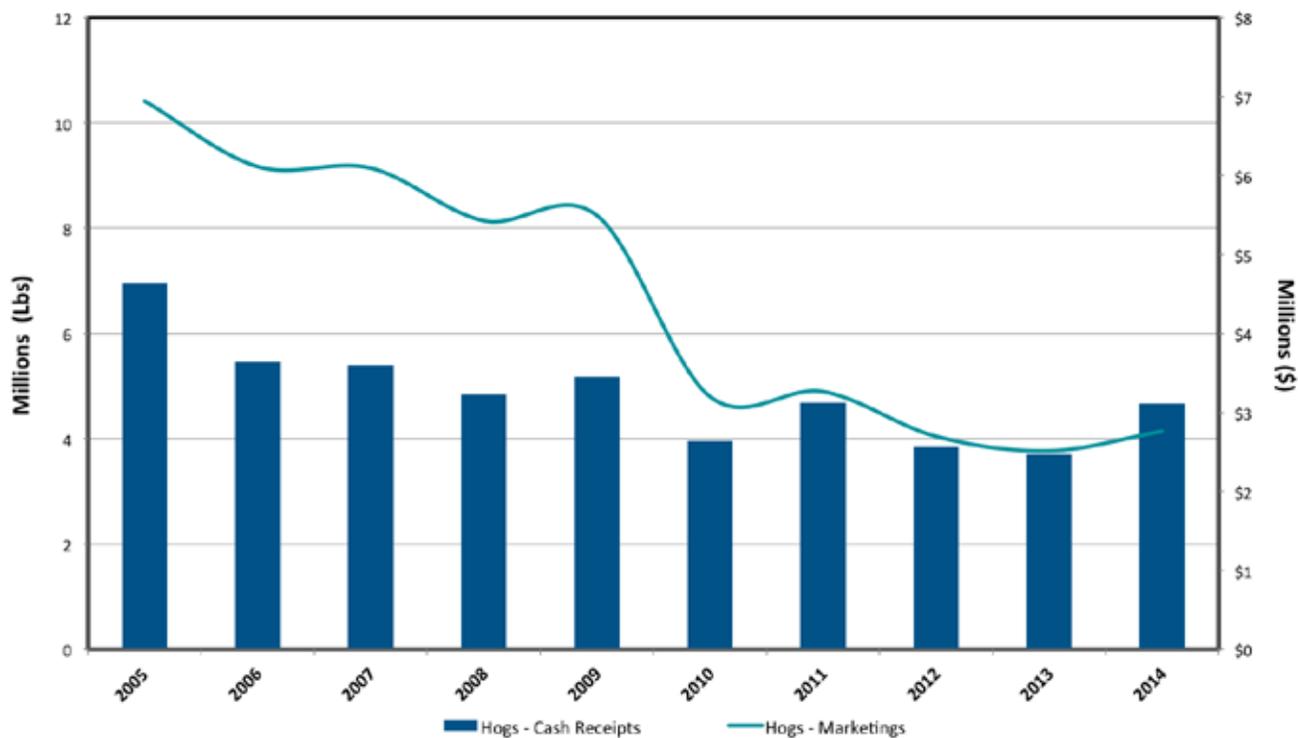

Florida: 2005-2014

Year	Inventory December 1 of Previous Year (1,000 head)	Sows farrowing (1,000 head)	Pig crop (1,000 head)	Inshipments (1,000 head)	Marketings <sup>1</sup> (1,000 head)	Farm Slaughter (1,000 head)	Deaths (1,000 head)
2005	20	8	58	18	71	1.0	3.5
2006	20	8	56	15	67	1.0	3.0
2007	20	8	56	15	67	1.0	3.0
2008	20	8	56	11	62	1.0	4.0
2009	20	7	54	9	58	1.0	4.0
2010	20	4	28	3	33	1.0	2.0
2011	16	4	28	10	34	0.7	2.3
2012	16	4	24	6	29	0.7	1.3
2013	15	4	26	6	28	0.7	2.9
2014	17	4	28	6	29	0.7	1.9

<sup>1</sup> Includes custom slaughter for use on farms where produced, but excludes inter-farm sales within State.

## Florida Hogs Marketings vs. Cash Receipts

\*Marketings exclude custom slaughter for use on farms where produced and inter-farms sales within the State.  
Cash receipts derived from marketings and sales of farm slaughter.

## Hogs Inventory December 1, Annual Marketings, Cash Receipts, and Gross Income

Florida: 2005-2014

Year	Head (1,000 head)	Marketings <sup>1</sup> (1,000 pounds)	Price per 100 pounds (dollars)	Cash receipts <sup>2</sup> (1,000 dollars)	Gross income <sup>3</sup> (1,000 dollars)
2005	20	10,411	44.50	4,642	4,704
2006	20	9,169	39.40	3,643	3,695
2007	20	9,140	39.10	3,596	3,651
2008	20	8,140	39.40	3,226	3,279
2009	20	8,240	41.80	3,447	3,507
2010	15	4,800	55.10	2,640	2,788
2011	16	4,894	(4)	3,125	3,259
2012	15	4,043	(4)	2,561	2,694
2013	15	3,770	(4)	2,471	2,583
2014	17	4,140	(4)	3,115	3,248

<sup>1</sup> Excludes custom slaughter for use on farms where produced and interfarm sales within the State.

<sup>2</sup> Receipts from marketings and sale of farm slaughter.

<sup>3</sup> Cash receipts plus the value of home consumption.

<sup>4</sup> State level not available due to program change.

## Commercial Hogs Slaughter Head, Average Live Weight, and Total Live Weight

Florida: 2005-2014

[Includes slaughter under Federal inspection, excludes farm slaughter]

Year	Head	Average live weight (pounds)	Total live weight (pounds)
2005	95,500	133	12,657,000
2006	95,900	132	12,643,000
2007	88,400	145	12,794,000
2008	82,700	135	11,166,000
2009	82,500	143	11,809,000
2010	76,800	133	10,212,000
2011	94,900	122	11,563,000
2012	66,900	138	9,176,000
2013	76,000	127	9,589,000
2014	40,700	163	6,617,000

# VEGETABLES, MELONS AND BERRIES

# 2014 SEASON VEGETABLE HIGHLIGHTS

Beginning in 2012 year, NASS began estimating vegetable production on a calendar year basis. Data included in this publication reflects vegetable acreage, yield, production, and value for January 1, 2014 through December 31, 2014.

## Value

The 2014 value of production for the published major berries, Irish potatoes, vegetable crops, and watermelons totaled \$1.55 billion, down 13 percent from the 2013 value of \$1.78 billion. The ranking from the highest to lowest value of the berry, Irish potato, vegetables, and watermelon crops are: (1) tomatoes, (2) strawberries, (3) bell peppers, (4) potatoes, (5) sweet corn, (6) watermelons, (7) snap beans, (8) cucumbers, (9) blueberries, (10) cabbage, and (11) squash. The crops that increased in percentage and value were (+16%) bell peppers and (+9%) potatoes. Crops that decreased in value and percentage included (-4%) tomatoes, (-8%) strawberries, (-15%) cucumbers, (-15%) sweet corn, (-17%) blueberries, (-20%) cabbage, (-42%) squash, (-44%) snap beans, and (-49%) watermelon.

## Acreage

The harvested acreage for 2014 for the published major berries, potatoes, vegetable crops, and watermelons totaled 200,600 acres, down 5 percent from the 211,900 acres harvested the previous year. Crops with increased acreage and percentages included (6%) cabbage, and (3%) strawberries. Crops with less acreage and percentage decreased included (-1%) potatoes, (-2%) watermelons, (-3%) tomatoes, (-3%) bell peppers, (-8%) snap beans, (-12%) cucumbers, (-13%) squash, and (-14%) sweet corn. Blueberries and sweet potatoes remained the same.

## Production

Production in 2014 of the published major berries, potatoes, vegetable crops, and watermelons totaled 39.8 million hundredweight, down 6 percent from the 42.2 million hundredweight the prior calendar year. Crops with increased percentage and production were (41%) sweet potatoes, (9%) cabbage, (3%) tomatoes, and (2%) cucumbers. Bell peppers were up slightly. Commodities with percentage decreases and less production were (-1%) potatoes, (-11%) strawberries, (-17%) sweet corn, (-18%) squash, (-18%) blueberries, (-23%) snap beans and (-23%) watermelon.

## Weather for the 2014 growing season

In **January** 2014, frost damage, fungal diseases, and crop losses were evident on strawberries, collards, and turnips in north Florida. Cabbage and potatoes were planted in Flagler, St. Johns, Bradford, and Putnam counties; sweet corn, squash, beans, and peppers in Miami-Dade County; and tomatoes in Manatee County. Cold winds in southwest Florida required replanting of okra, sweet potatoes, green beans, and strawberries. By the end of the month, harvesting of cabbage began in Okeechobee County and harvesting of winter vegetables progressed in Miami-Dade County.

In **February**, varying degrees of losses on vegetables and strawberries were reported throughout the State due to freezing temperatures. Planting of potatoes was behind schedule due to wet conditions. Cabbage and strawberry harvesting began early in the month. Soil preparation for watermelons was underway in Suwannee County. Rain and foggy weather increased disease in vegetables in southwest Florida with late blight reported on tomatoes and potatoes. Miami-Dade County farmers harvested green beans, tomatoes, squash, peppers, eggplant, sweet corn, Chinese vegetables, and boniato (Cuban sweet potatoes) during the month.

In **March**, Dixie, Levy, and Suwannee county farmers started planting watermelons and by the end of the month planting was complete. Flagler and Putnam county farmers finished planting potatoes during the month, harvesting of cabbage continued all month long. Southwest and south Florida farmers were busy all month harvesting green beans, cucumbers, collards, eggplant, herbs, kale, peppers, squash, and tomatoes.

In **April**, field work came to a standstill due to excessive rain. Gulf County farmers had to replant some vegetables and watermelons due to saturated fields. Bradford County farmers picked strawberries. Blueberry and watermelon harvesting was underway in Charlotte, Glades, and Hendry counties. Late in April, potato harvesting began in Flagler, Putnam, and St. Johns counties.

In **May**, Flagler and Putnam county farmers harvested potatoes, cabbage, and leafy greens. Strawberry harvest was completed in Bradford County and blueberry growers in Charlotte and Glades counties were moving to u-pick harvest mode as their season finished. By the end of the month farmers in the Panhandle, north, and central Florida were harvesting watermelons, green beans, sweet corn, and potatoes. Vegetable producers in southwest Florida cleaned up fields as the season neared an end.

In **June**, central and south Florida received large amounts of rain during the month. Flooded fields delayed planting early in the month. Rice planting was almost complete. Farmers harvested potatoes, cantaloupe, tomatoes, sweet corn, and watermelon by the end of the month.

In **July**, rainfall varied greatly across the State. Watermelon harvest in the Panhandle and north Florida was completed in July. Farmers in Gadsden County started planting their fall tomato crop. In Bradford County peppers and lettuce were planted under cover. In south Florida, Hendry County farmers began land preparation for fall planting.

In **August**, southwest Florida started the month with scattered showers most days. By the end of the month they experienced a very hot, mostly dry week which enabled them to start planting melons, tomatoes, peppers, and squash, and to continue land preparation for fall planting. Polk County farmers prepared fields for strawberry planting. Harvesting of okra, squash, black-eyed peas, pink-eye peas, and purple hull peas started in Bradford County.

In **September**, southwest Florida received significant rainfall, which disrupted agricultural activities. Vegetable growers ran pumps to maintain favorable water levels in fields. Flagler and Putnam county growers began planting leafy greens; Bradford County growers began planting winter vegetables and strawberries; Palm Beach County farmers planted sweet corn, snap beans and lettuce; and Miami-Dade County producers planted green beans, squash, peppers, tomato, bitter melon, boniato, and malanga. Tomato harvest was in full swing in Gadsden County.

In **October**, wet weather had vegetable growers battling disease in some locations throughout the State. Bradford, Flagler, and Putnam county farmers were planting cabbage. Strawberries in Manatee County were established and harvesting of tomatoes, cucumbers, and peppers continued. Vegetable harvest began across southwest Florida with light quantities of eggplant, herbs, and squash going to market.

In **November**, farms across the State ran irrigation on their vegetables due to the lack of rain. Tomato harvest in Gadsden County was completed due to low temperatures. Cabbage and collards were planted in Flagler and Putnam counties. Growers in southwest Florida harvested green beans, cucumbers, eggplant, herbs, peppers, squash, tomatoes, and watermelon during the entire month.

In **December**, farmers in Flagler and Putnam counties began planting cabbage and cold weather vegetable crops. Some u-pick strawberry fields opened in Orange County. Cool weather reduced yields on cucumbers, peppers, tomatoes, and squash in southwest Florida. Spring season vegetable crop planting began in southwest Florida.

## DEFINITIONS AND EXPLANATIONS

**Planted Acreage** is the total acreage which has been planted for harvest during the crop year. Acreage lost and replanted to the same crop in time for harvest in the same quarter is counted only once. Acreage harvested and planted again to the same crop is counted twice.

**Harvested Acreage** is the acreage partially or completely harvested. Acreage lost before or at maturity through natural or economic causes is not included in the acreage for harvest.

**Yield** is the average production per harvested acre of merchantable quality harvested and sold or utilized for human consumption.

**Production** is the quantity actually harvested and sold or utilized for human consumption.

**Unit Value** for fresh market sales is the equivalent price received, f.o.b. shipping point basis and encompasses all grades and sizes marketed or utilized. Included are packing charges, selling charges, precooling, top ice, or other costs which contribute to the value of the product at shipping point. The value per unit for quantities sold to processors is the average value paid for usable quantities, on a "delivered to plant door" basis. This value includes transportation and other normal costs incident to delivery at plant door.

**Total Value** is the equivalent value of production sold or utilized based on the unit value. Cullage and other quantities not sold or utilized because of natural or economic factors are excluded.

**Other Counties** include harvested acreage for all counties for which either published data would result in the disclosure of individual operations or acreage totals for specific commodities of minor importance in the State.

**Production And Price Unit** - The official USDA vegetable crop estimates are published on a weight basis. For this bulletin, the official estimates for most vegetable crops have been converted to hundredweight. If changes in container weights are necessary, all data pertaining to the production of the commodity in question are revised to maintain comparability between years. The table on the next page gives the net weight used per container and the number of containers per hundredweight for Florida produce.

## CONFIDENTIALITY OF COLLECTED DATA

All information collected from individual agricultural producers is held strictly confidential. Data provided by individual producers or other agricultural firms is used only to compile and publish statistics at the county, state, and national levels. Statistics at the county and state level are not published if they will potentially disclose information about an individual or operation. In addition, all names and addresses obtained by this office are held confidential.

## Florida Produce

[Most common unit, estimated net weight, and units per hundredweight, 2014 crop season]

Commodity	Unit	Estimated net weight (pounds)	Number of units per cwt
Snap Beans	Bushel	30	3.333
Blueberries	Flat	11	9.090
Cabbage	Crate	50	2.000

## 2014 United States Fresh Market Vegetable Production Down 1 Percent from 2013

Fresh market vegetable and melon production for the 24 selected crops estimated in 2014 totaled 413 million hundredweight, down 1 percent from last year. Harvested area covered 1.58 million acres, down 3 percent from 2013. Value of the 2014 crop is estimated at 10.9 billion dollars, down 5 percent from the year prior. The three largest crops, in terms of production, were onions, head lettuce, and watermelons, which combined to account for

36 percent of the total production. Tomatoes, head lettuce, and onions claim the highest values, accounting for 29 percent of the total value when combined.

For the 24 selected vegetables and melons estimated in 2014, California continues to be the leading fresh market state, accounting for 47 percent of the harvested area, 52 percent of production, and 60 percent of the value.

### Fresh Market Vegetable

Leading States: 2014

Rank	Area harvested		Production		Value	
	State	Percent of total	State	Percent of total	State	Percent of total
1	California	46.8	California	51.8	California	59.6
2	Florida	9.5	Arizona	7.7	Florida	9.6
3	Arizona	6.9	Florida	7.1	Arizona	6.3
4	Georgia	5.5	Washington	4.2	Georgia	3.7
5	New York	3.7	Georgia	3.9	New York	2.7

### Principal Fresh Market Vegetables Planted, Harvested, Production and Value

Florida: 2012-2014

[Only includes estimates for the selected crops in the NASS annual program. These crops are not estimated for all States that might produce them. See the 2007 Census of Agriculture for a comprehensive tally of total vegetable acres by State. Includes processing total for dual usage crops (asparagus, broccoli, and cauliflower)]

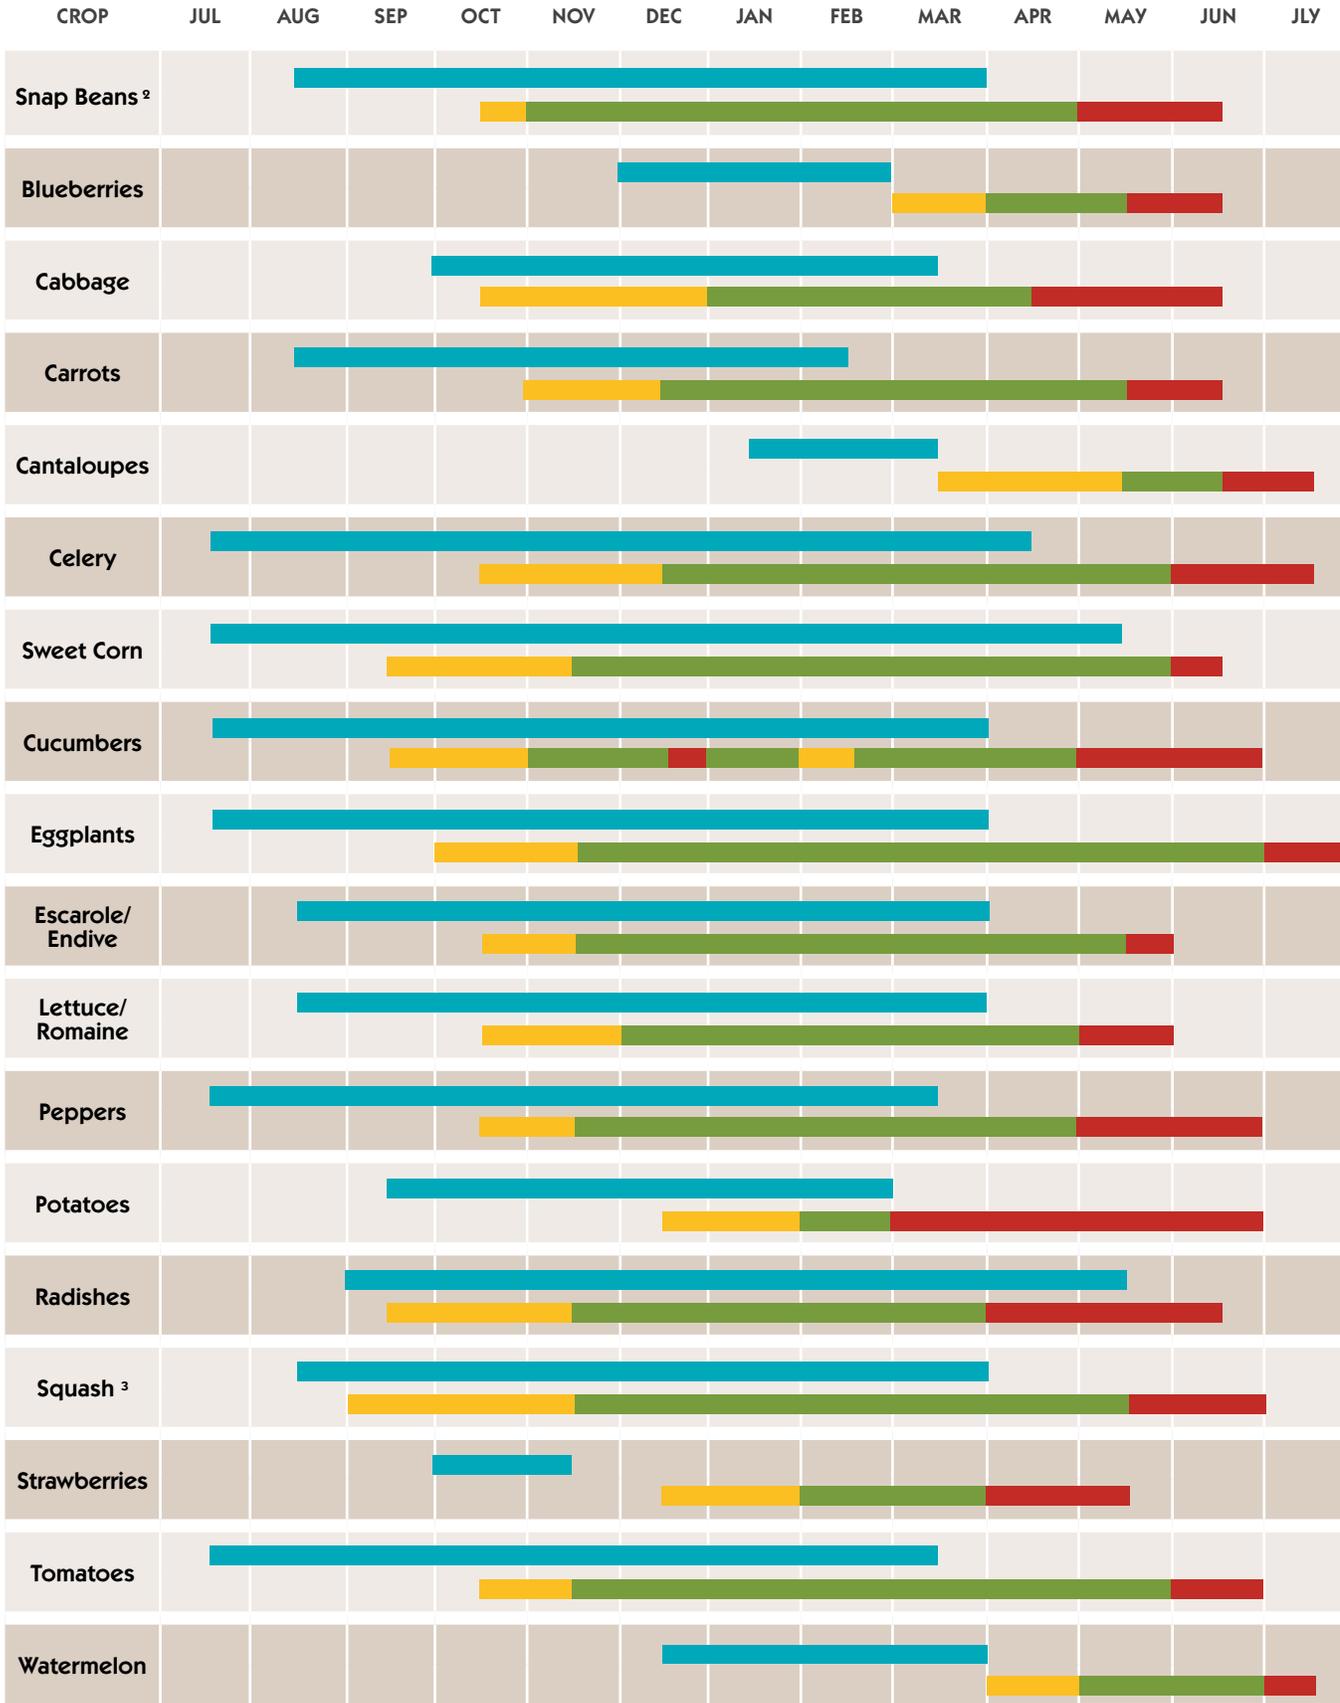

Year	Area planted (acres)	Area harvested (acres)	Production (1,000 cwt)	Value of production (1,000 dollars)
2012	169,600	157,600	33,238	959,976
2013	173,000	161,600	31,727	1,253,028
2014	164,400	150,200	29,317	1,044,635

# FLORIDA 2014 FLORICULTURE

Florida ranked 2nd in the U.S. for production of floriculture crops and provide 22.2% of the United States' supply. In 2014, the State's wholesale value of floriculture crops increased \$3.5 million over 2013 totals. Total greenhouse and nursery cash value sales of \$1.62 billion comprised 19.2% of Florida's total cash receipts for 2013.

The number of producers fell slightly to 597, down by 98 operators from 2013. Open ground cultivated areas increased by 72 acres while total covered areas increased by 280 sq. ft.

## Floriculture Producers, Production Areas, and Expanded Wholesale Value for Operations with \$10,000+ Sales

Florida: 2005-2014

Year	Number of producers <sup>1</sup>	Total covered area (1,000 square feet)	Open ground (acres)	Expanded wholesale value <sup>2</sup> (1,000 dollars)
2005	932	382,551	8,736	956,580
2006	832	347,187	8,344	804,854
2007	869	346,769	8,918	967,944
2008	887	316,974	6,587	763,566
2009	811	322,637	9,805	814,895
2010	749	307,854	6,538	826,077
2011	702	287,463	5,881	835,233
2012	711	295,284	4,055	896,280
2013	695	299,000	4,484	886,447
2014 <sup>3</sup>	597	299,280	5,206	889,950

<sup>1</sup> Does not include woody ornamentals, trees, shrubs, and sod.

<sup>2</sup> Value of all crops grown with sales of \$10,000 or more, combines the wholesale value of sales as reported by operations with \$100,000 or more and an estimated value for operations with sales between \$10,000 and \$99,000. This is derived by multiplying the number of producers in each range of sales by the mid-point of the sales range.

<sup>3</sup> Preliminary.

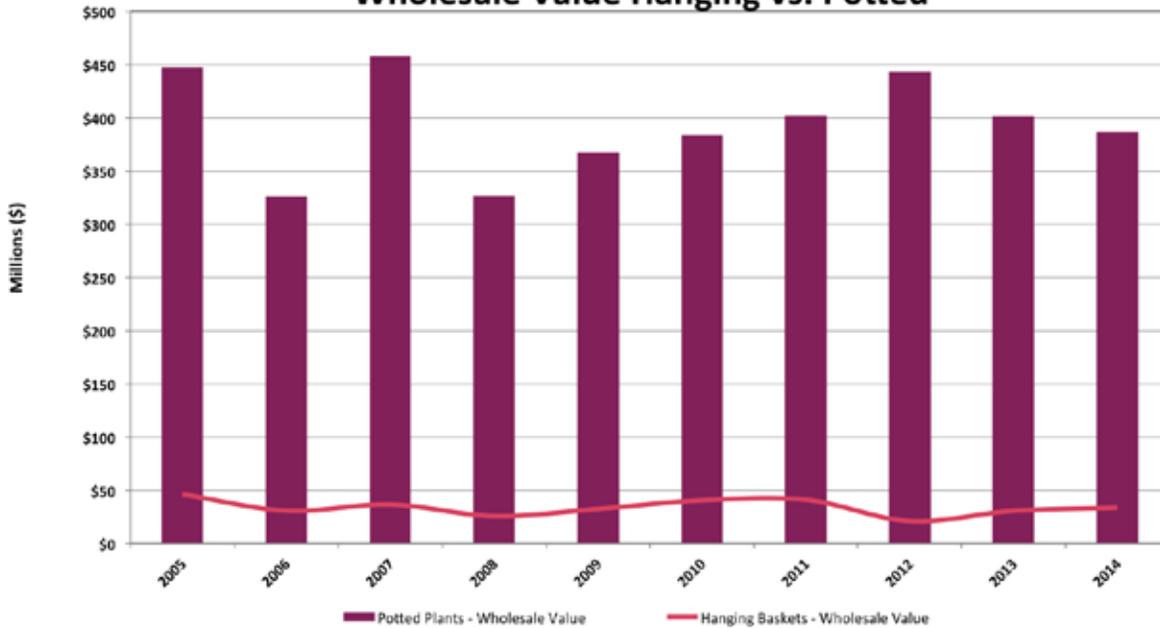

## Florida Floriculture Wholesale Value

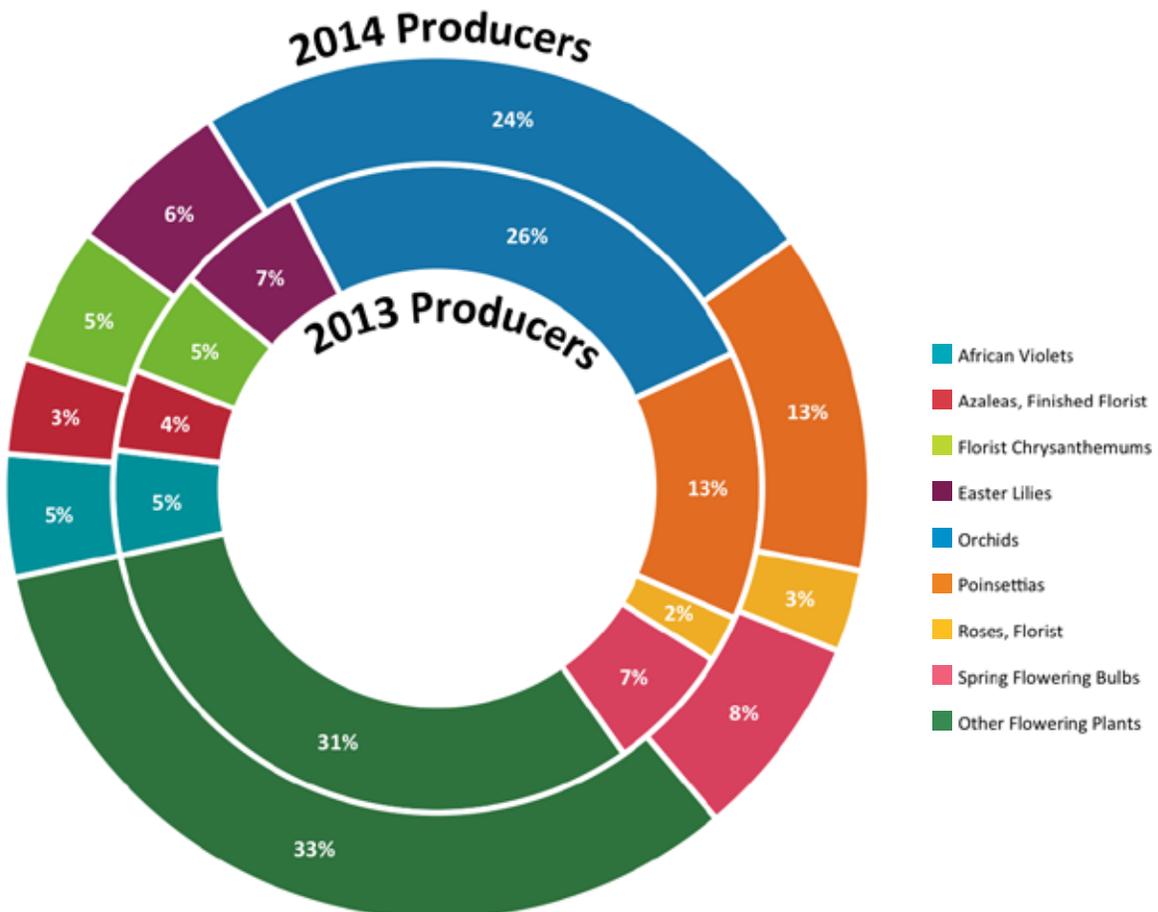

(Survey of producers with sales over \$10,000. Does not include woody ornamentals, trees, shrubs, and sod.)

## Florida Foliage Plants Wholesale Value Hanging vs. Potted

## Florida Potted Flowering Plants Number of Producers in 2013 & 2014

## Foliage Plants Producers and Value for Operations with \$100,000+ Sales

Florida: 2005-2014

Year	Hanging baskets		Potted plants	
	Producers	Value of all sales at wholesale <sup>1</sup> (1,000 dollars)	Producers	Value of all sales at wholesale <sup>1</sup> (1,000 dollars)
2005	123	46,301	319	447,727

2014 <sup>2</sup>	67	75	31,084	(3)	31,084	27,609

<sup>1</sup> Equivalent wholesale value of all sales.  
<sup>2</sup> Preliminary.  
<sup>3</sup> Bunches are not comparable as units differ depending on crop variety.

# BEEES AND HONEY COLONIES

# FLORIDA HONEY PRODUCTION

In 2014, there were 245,000 honey producing colonies in Florida, an 11.4% increase over 2013. Honey production (14.7 million pounds) and value of production (\$30.6 million) increased by 9.5% and 12.2% respectively.

Producers received an average \$2.08/pound, up 5 cents from 2013. Each colony yielded on average 60 pounds of honey, down 1.6% from 2013.

## Honey Number of Colonies, Yield, Production, Price, Value, and Stocks

Florida: 2005-2014

[Producers with 5 or more colonies. Colonies which produced honey in more than one State were counted in each State]

Year	Honey producing colonies <sup>1</sup> (1,000 colonies)	Yield per colony (pounds)	Production (1,000 pounds)	Average price per pound <sup>2</sup> (cents)	Value of production <sup>3</sup> (1,000 dollars)	Stocks December 15 <sup>4</sup> (1,000 pounds)
2005	160	86	13,760	87	11,971	2,477
2006	170	81	13,770	100	13,770	1,790
2007	160	71	11,360	99	11,246	1,363
2008	150	79	11,850	132	15,642	1,304
2009	170	68	11,560	142	16,415	1,618
2010	200	69	13,800	156	21,528	1,794
2011	180	61	10,980	168	18,446	988
2012	193	64	12,352	184	22,728	1,235
2013	220	61	13,420	203	27,243	1,074
2014	245	60	14,700	208	30,576	1,029

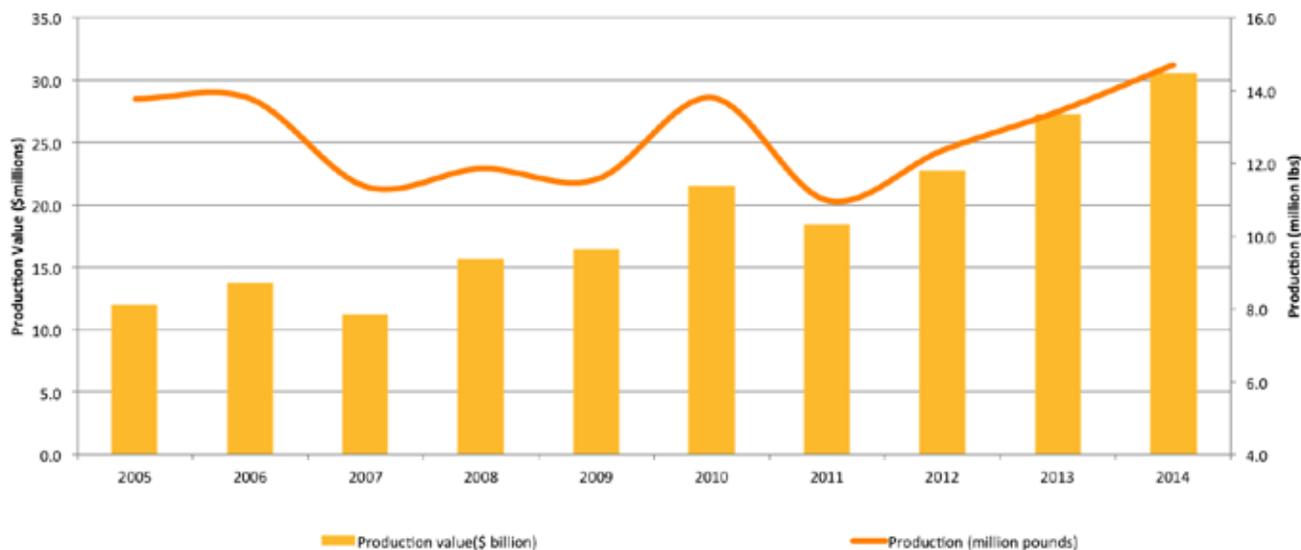

1 Honey producing colonies are the maximum number of colonies from which honey was taken during the year. It is possible to take honey from colonies which did not survive the entire year.

2 Average price per pound based on expanded sales.

3 Value of production is equal to production multiplied by average price per pound.

4 Stocks held by producers.

Florida Honey  
Production vs Production Value

# AQUACULTURE AND SEAFOOD

# AQUACULTURE

Florida aquaculture producers reported sales in 2012 of \$69 million based upon a survey conducted for the Florida Department of Agriculture and Consumer Services, Division of Aquaculture. This survey was administered by the Florida Agricultural Statistics Service.

Reported sales in 2012 were above those of \$66 million reported in 2005, the last time this survey was conducted. There were 686 operations that reported being in business during 2012; of those, 404 operations reported appreciable sales. The operations without sales reflect either new operations, which have not yet sold a product,

or operations in business that did not market any product in 2012.

Florida aquaculturists produced animals or plants for ornamental, food or miscellaneous markets. Ornamental sales totaled \$35.5 million and consisted of freshwater or marine animals and plants that included freshwater fish, crayfish or marine fish, corals, live rock, snails, and shrimp sold to the aquarium or water garden markets. Sales of aquaculture products for human consumption totaled \$24.1 million and included freshwater or marine fish, clams, oysters, shrimp, prawns, alligators, and turtles.

## Aquaculture Value of Sales

Florida: 2012 and 2005

Item	Value of Sales		Operations with Sales	
	2012 (dollars)	2005 (dollars)	2012	2005
Ornamental Fish	27,269,000	33,232,000	101	133

# FORESTRY

# FLORIDA FORESTRY ECONOMIC HIGHLIGHTS

## Economic Output

Of Florida's 17.3 million acres of forest land, 15.4 million acres of timberlands supported economic activities. These economic activities generated \$16.34 billion in total output impacts in 2013. This was 1.6% less than 2012 output impacts, but still 18% more than in 2008 at the lowest point in the recent economic recession (Fig. 1).

**The Economic Impacts of Forestry, Wood & Paper Product Manufacturing Industries in Florida, 2003 - 2013**

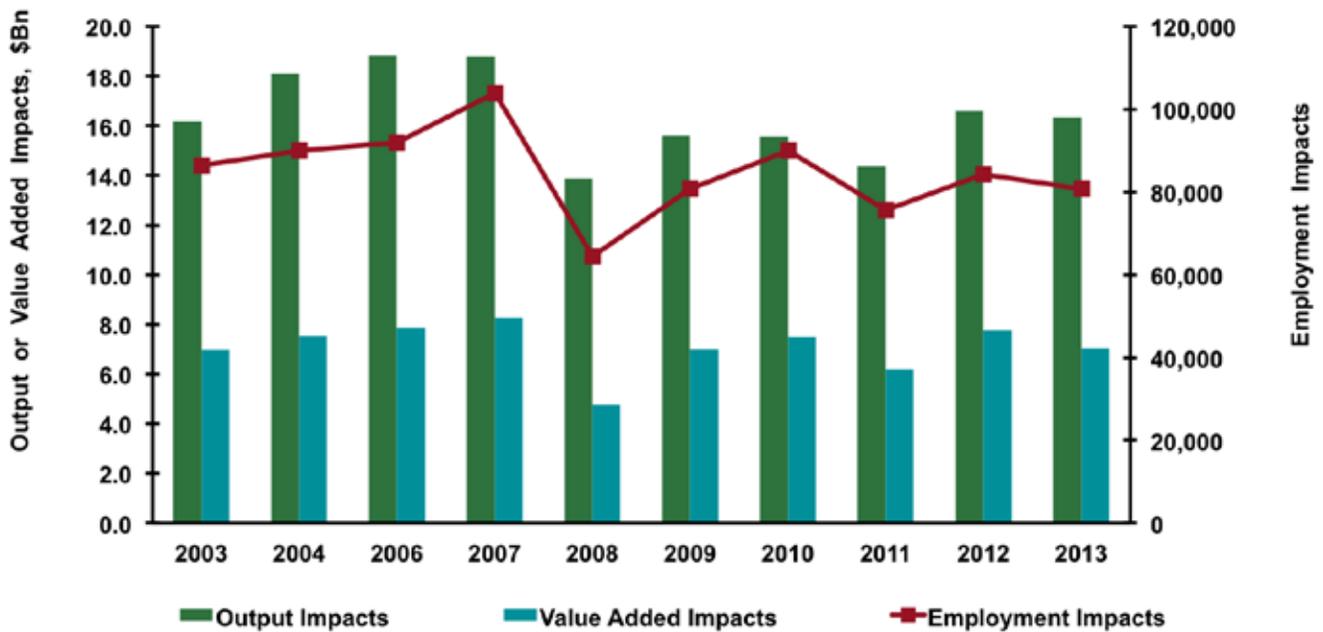

Figure 1. Economic impacts of forestry, wood and paper product manufacturing industries in Florida between 2003 and 2013.

## Employment

2013 employment impacts were 80,665 full and part-time jobs, which was 3,600 fewer jobs than in 2012. The 2013 employment in forestry and forest products industry represented a 25% increase over 2008 employment at the lowest point of the Great Recession.

## Value Added

At \$7.06 billion, value added impacts were 9% lower in 2013 than 2012 (Fig. 1), but still 49% higher than in 2008 at the lowest point of the recent recession.

## Compensation

In 2013, the pulp and paper products industry supported 73% of income paid to the labor force employed in forestry and related industries. At 12%, secondary wood products sector was the next largest in terms of income paid out to workers. Forest management and logging generated 11% of income paid, while lumber, veneer and panels manufacturing paid the remaining 4% of wages and benefits in forestry-related occupations in 2013 (Fig. 2). In dollar terms, forestry, wood and paper products industries had an income impact of \$4.15 billion in 2013, which was 8% less than in 2012, but still nearly 31% more than in 2008 at the bottom of the recent recession.

### Florida Forestry, Wood & Paper Product Income Impact Distribution by Industry Sector 2013

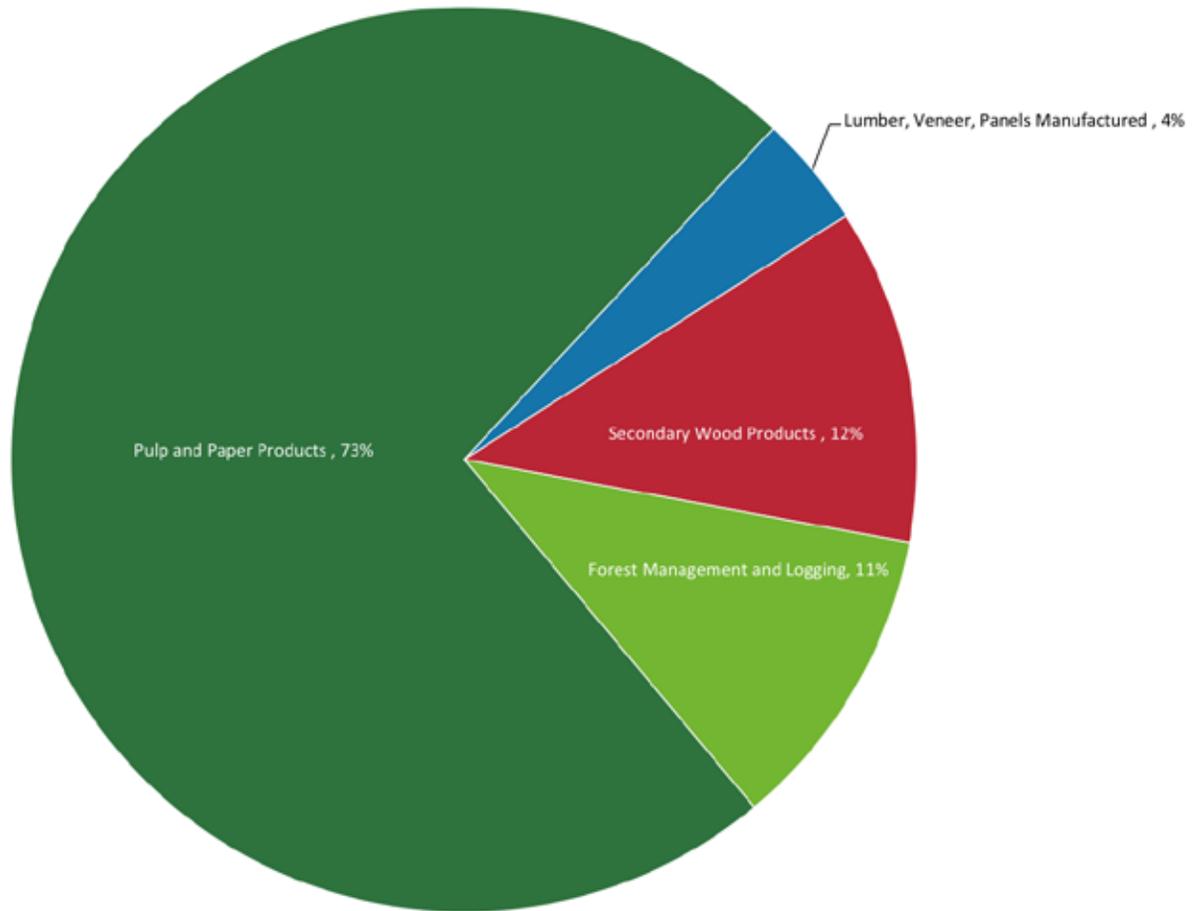

Figure 2. Labor income impacts distribution among forestry, wood and paper product industry sectors in Florida, 2013.

## Export Value

At \$6.14 billion in 2013, the export value of Florida's forest products to out-of-state destinations increased 4% since 2012 (Fig. 3). The export value for 2013 was 56% higher than exports in 2008 at the lowest point in the recession of 2007-09.

### Exports of Florida Forest Products to Out-of-State Destinations, 2003 - 2013

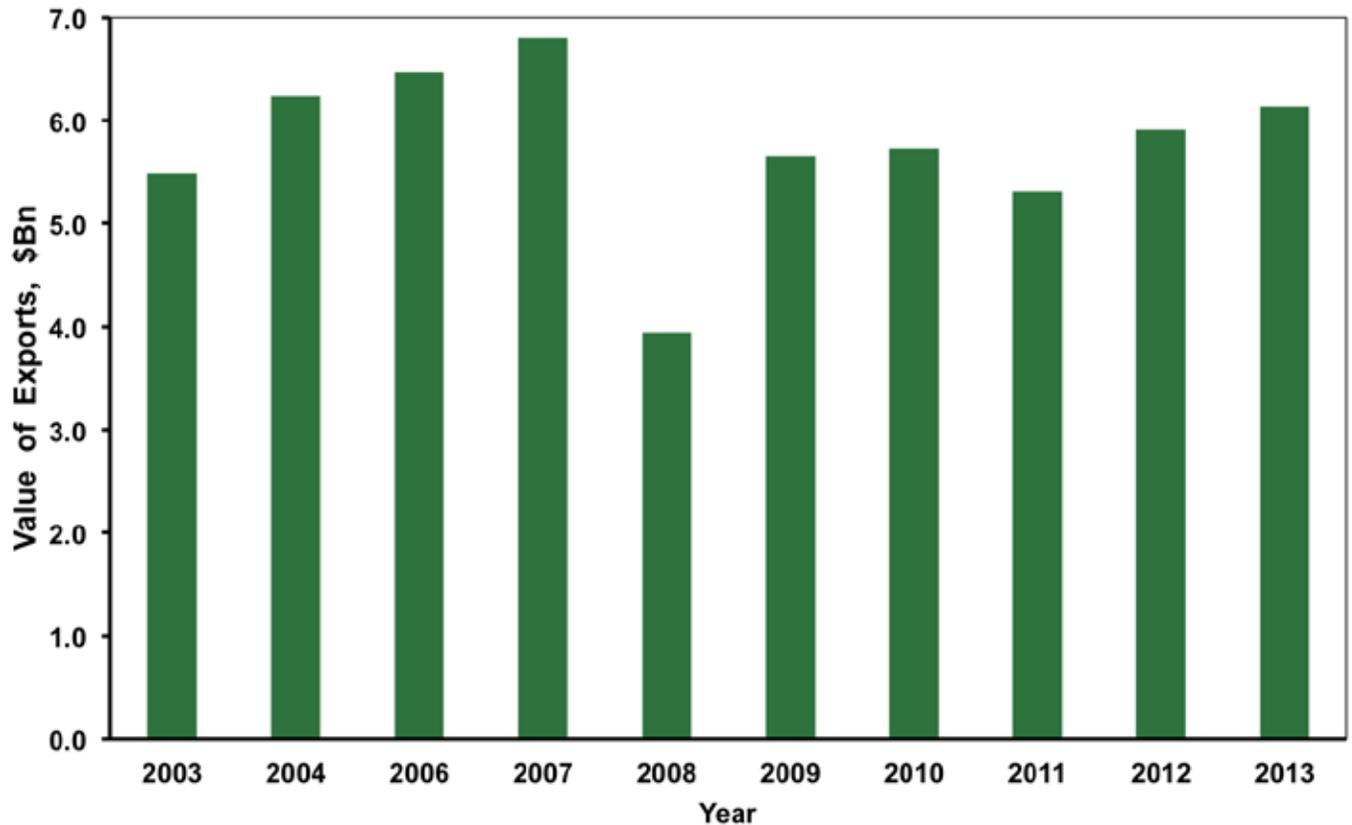

Figure 3. Export value of Florida's forest products to out-of-state destinations between 2003 and 2013.

## Fiscal Impacts

In 2013, tax impacts on production and imports of forestry and forest products industries in Florida were \$483 million. Of that amount, \$382 million was generated by pulp and paper sector, \$45 million by forest tract management and logging activities, \$41 million by secondary products manufacturing and \$15 million by the lumber, veneer and panel manufacturing industries.

Total other property income impacts, such as interests, rents, royalties and dividends, were \$2.43 billion in 2013. The largest share again was generated by pulp and paper manufacturing at \$1.74 billion. Forest tract management and logging activities generated \$269 million, the secondary forest products sector \$264 million and lumber/ veneer/panels manufacturing generated \$156 million.

## Forest Ownership

In 2014, Florida timberland ownership, which supports the forest products industry was 71% private (67% non-industrial, and 4% forest industry), 18% state and local, and 11% federal government (Fig. 4). That translates into 11.0 million acres in private ownerships, 2.8 million acres in state and local, and 1.7 million acres in federal government ownerships.

## Total Timberland 15.4 Million Acres

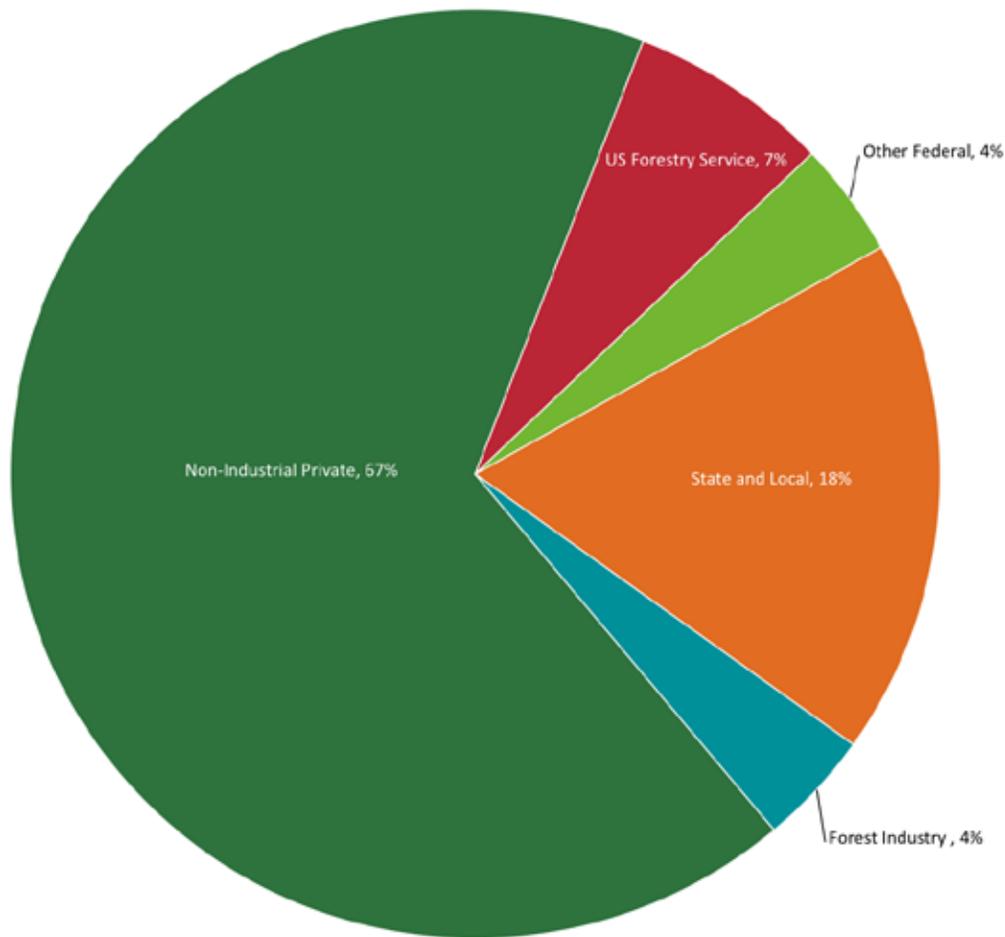

Figure 4. Florida timberland ownership by major ownership sectors, 2014.

### Forest Distribution

Although forests cover about 50% of the state's land area, Florida's forest lands are located mostly north of Orlando (Fig. 5). In the northern half of the State most counties are at least 50% forested, whereas peninsular Florida south of Marion County is less than 50% forested. Liberty County in northwest Florida is the most forested with forest lands covering more than 90% of its area. On the other hand, four counties in the southeast tip of Florida have less than 10% of their area covered in forests (Fig. 5).

Figure 5. Florida forest lands as percentage of county surface area  
2014

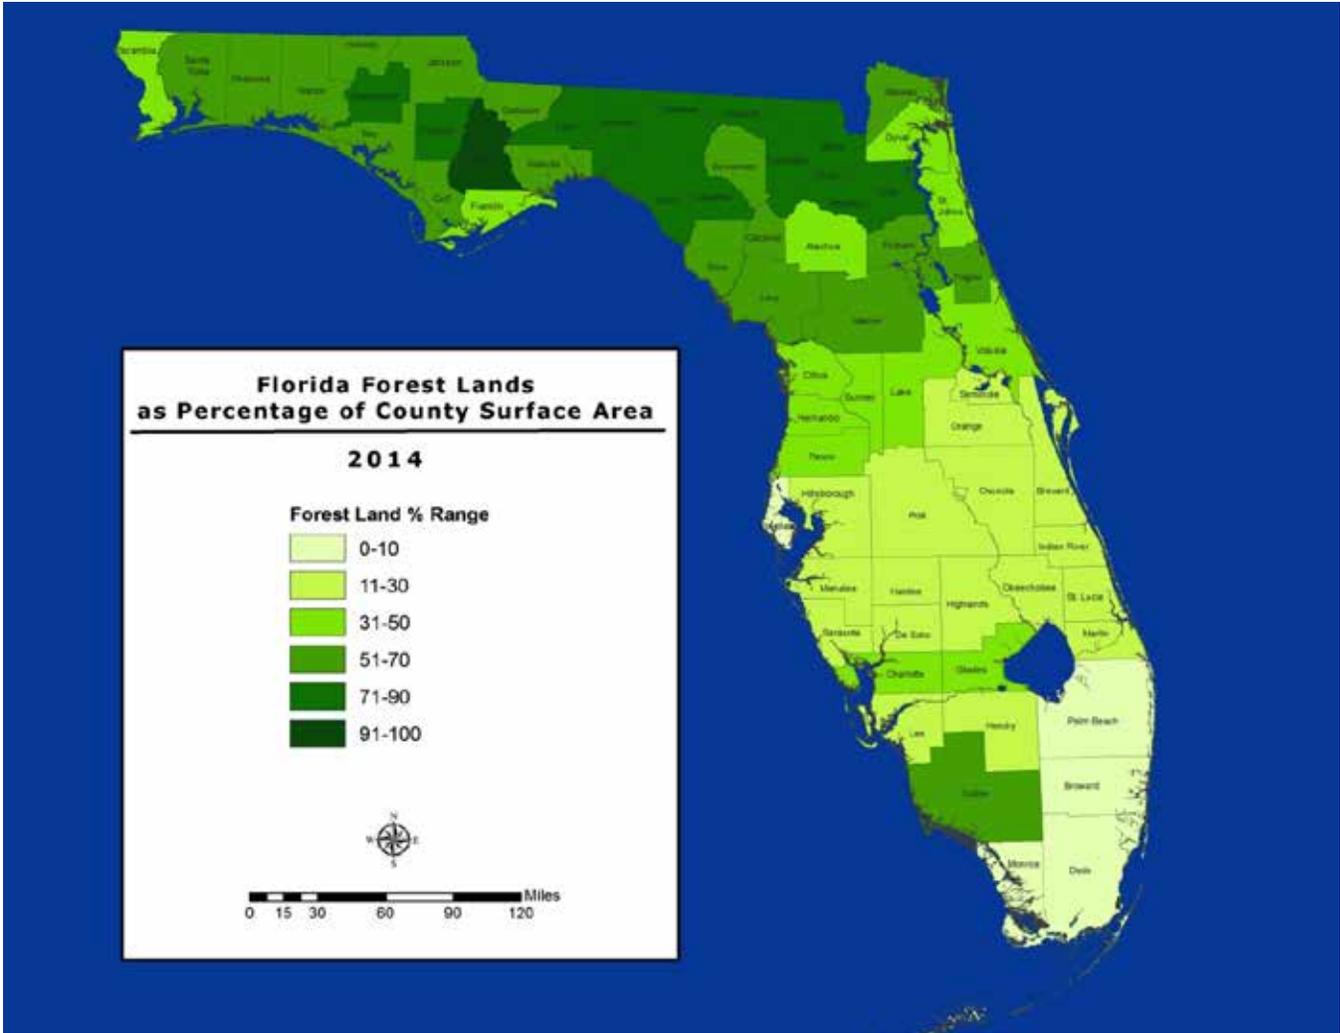

Figure 5. Florida forest lands as percentage of county surface area, 2014.

### Local Importance

In 2014, there were 73 primary wood using mills in Florida (Table 1). The local economic importance of forests depends on a number of factors including proximity to markets. Primary wood using mills in Florida are located mostly in the northern part of the state (Fig. 6) in proximity

to timberland resources. Mill type and size influence raw material needs from a 50-75 mile radius from the mill location. This close supply of wood allows for the most economical wood purchases and providing income to local timberland owners.

Figure 6. Florida primary wood processing facilities

2014

Figure 6. Florida primary wood processing facilities, 2014.

Table 1. Florida Primary Wood-using Mills, 2014

Mill Type	Number	Mill Type	Number	Mill Type	Number

Pulp, Paper	6	Chip	2	Plywood	1
Chip-n-Saw	5	Biomass power	1	Strand board	1
Pole	3	Firewood	1	Veneer	1
				<b>Total</b>	<b>73</b>

### Annual Wood Harvest

Between years 2010 and 2014, Florida on average harvested 464.8 million cubic feet of wood annually. Of that amount approximately 90% was harvested from private and 10% from publicly owned timberlands (Table 2). Of all harvested wood 65% was either slash pine

or longleaf pine. Collectively, all southern yellow pines supplied 425.0 million cubic feet, or 91.4% of all harvested wood annually. The remainder of wood harvest consisted of cypress (1.5%) and hardwood species (7.1%).

**Table 2. Florida Average Annual Harvest Removals of Growing Stock Trees (at least 5 inches d.b.h.) on Timberland**

2010-2014

Species group	Major Ownership group		
	Total (cubic feet)	Public (cubic feet)	Private (cubic feet)

# EXPORTS

# FLORIDA'S SEAPORTS

## Port Canaveral

Port Canaveral is currently home to eight year-round cruise ships from four major cruise lines. Cargo activity at Port Canaveral is expected to increase significantly with additional deep-water container cargo berths and the further development of bulk cargo facilities to serve the central Florida market. Principal exports for the port include fresh citrus and single-strength juice, juice concentrates, automobiles and heavy equipment.

- Hinterland: The central and north Florida counties of Brevard, Polk, Indian River, Orange, Osceola, Seminole, Volusia and Southeast U.S.

## Port Citrus

The effort behind Port Citrus is to establish a new public port within Citrus County to grow the economic vitality and quality of life in the area. The concept behind Port Citrus is to take full advantage of a valuable asset: the Cross Florida Barge Canal.

## Port Everglades

Port Everglades is one of the nation's leading container ports and south Florida's main seaport for receiving petroleum products including gasoline, jet fuel and alternative fuels. The total value of economic activity at Port Everglades in FY 2013 (latest data available) was approximately \$26 billion. More than 203,700 Florida jobs are impacted by the port, including almost 11,400 people who work for companies that provide direct services to Port Everglades.

- Hinterland: Primarily south and central Florida but extending into Southeastern United States. Top trading partners are Caribbean and Latin American nations.

## Port of Fernandina

The Port of Fernandina provides terminal service to numerous pulp and paper producers located throughout Florida and the Southeast. The containerized commodities moving through the port include wood pulp, automobile and truck parts, steel products, chemicals, beverages, food stuff and chilled goods, machinery, consumer goods and building materials.

- Hinterland: The southeastern U.S. and gulf states; major metropolitan areas include Tampa, Orlando, Jacksonville, Atlanta and New Orleans. As the most westerly port on the East Coast, the Midwest and the Great Lakes region can also be served efficiently.

## Port of Fort Pierce

St. Lucie County owns 20 acres at the port, adjacent to 67 acres owned privately, as well as 12 acres that house the privately owned Indian River Terminal. The port's privately-held facilities have serve bulk, containerized and other general cargo traffic moving into the Bahamian and Caribbean islands. Principal imports, through the private terminals, have been aragonite and cement.

- Hinterland: St. Lucie, Indian River, Okeechobee, Highlands, Hendry, Glades and Martin counties.

## Port of Jacksonville

The Jacksonville Port Authority (JAXPORT) is an independent agency responsible for the development of public seaport facilities in Jacksonville. It owns three cargo facilities and a cruise terminal, and supports 65,000 jobs and more than \$27 billion in annual economic impact for the northeast Florida region.

- Hinterland: Primarily defined as the U.S. Southeast and Midwest. Jacksonville's geographic location allows JAXPORT inbound cargo to reach 60 million consumers and 60 percent of the U.S. population within a 24-hour truck drive.

## Port of Key West

The Port of Key West includes cruise berths at Mallory Square, the Navy's Outer Mole Pier, and the privately owned Pier B at the Weston Resort. The port brings in almost a million total passengers per year resulting in a local business impact of approximately \$85 million. The port also provides 1,260 direct and indirect jobs to the citizens of Key West and contributes 15 percent of the city's total tax revenue.

- Hinterland: U.S. cruise homeports, Florida west coast ferry ports, city of Key West and Monroe County.

## Port Manatee

Port Manatee is a multi-purpose deepwater seaport on Tampa Bay serving bulk, break-bulk, container, heavy-lift/project and general cargo customers. Comprised of 1,100 acres, Port Manatee is supported by nearly 5,000 acres of land located just outside the port's gates.

- Hinterland: Florida counties within a 100-mile radius including Lee, Charlotte, DeSoto, Sarasota, Hardee, Polk, Hillsborough, Highlands, Pasco, Hernando, Pinellas and Manatee, as well as the U.S. Southeast, eastern U.S. and Midwest/Chicago area.

## PortMiami

PortMiami has been recognized around the globe with the dual distinction of being the Cruise Capital of the World and the Cargo Gateway of the Americas. The port continues to be a powerful economic engine contributing more than \$27 billion annually to the Florida economy and supporting more than 207,000 jobs.

- Hinterland: For east-west trade the hinterland extends from the south Florida counties of Miami-Dade, Broward, Monroe and Palm Beach throughout the state. For north-south trade it includes all of Florida and extends into the Southeast, Northeast and Midwest.

## Port of Palm Beach

The Port of Palm Beach generates approximately 2,850 jobs in its community. The 162-acre port is located 80 miles north of the city of Miami and has a 300-foot wide inlet channel. The Port of Palm Beach is an important distribution center for commodities being shipped all over the world, and especially the Caribbean Basin. Operations include containerized, dry bulk, liquid bulk, break-bulk, roll on/roll off and heavy-lift/project cargoes.

- Hinterland: Palm Beach, Martin, St. Lucie, Okeechobee, Highlands, Glades, Hendry, Brevard, Indian River, Monroe, Miami-Dade, Broward, Hillsborough and Orange counties.

## Port Panama City

Port Panama City handles more than 1.7 million tons of cargo per year including containerized cargo, copper cathodes, steel plate, steel coils, kraft paper, wood pellets and aggregates. The port provides essential support service for five major manufacturing companies, including two located on the port.

- Hinterland: Northwest Florida, Alabama, Georgia and Tennessee.

## Port of Pensacola

From its early shipments of regionally harvested lumber, locally made bricks and sailing ship masts, to the locally manufactured paper and power plant components being moved today, the Port of Pensacola has always existed, at least in part, to serve local and regional business interests.

- Hinterland: Southeastern and Midwestern U.S. roughly bounded by the Great Lakes to the north, the Mississippi River to the west, the Gulf of Mexico to the south and the Atlantic Ocean to the east.

## Port of Port St. Joe

Located in Gulf County, Florida, the Port of Port St. Joe offers a deepwater seaport with two separate bulkheads – one featuring nearly 1,900 linear feet at the ship channel turning basin and the other offering nearly 900 linear feet on the Intracoastal Waterway.

- Hinterland: North Florida, Alabama and Georgia.

## Port of St. Petersburg

The Port of St. Petersburg, located on Tampa Bay, is exploring opportunities to attract mega yachts, research and other vessels, as well as to further enhance the benefits of a new Research and Development Center on the eastern end of the port.

- Hinterland: Port users would come from other parts of Florida and from around the world as the port focuses on the mega yacht business sector.

## Port of Tampa

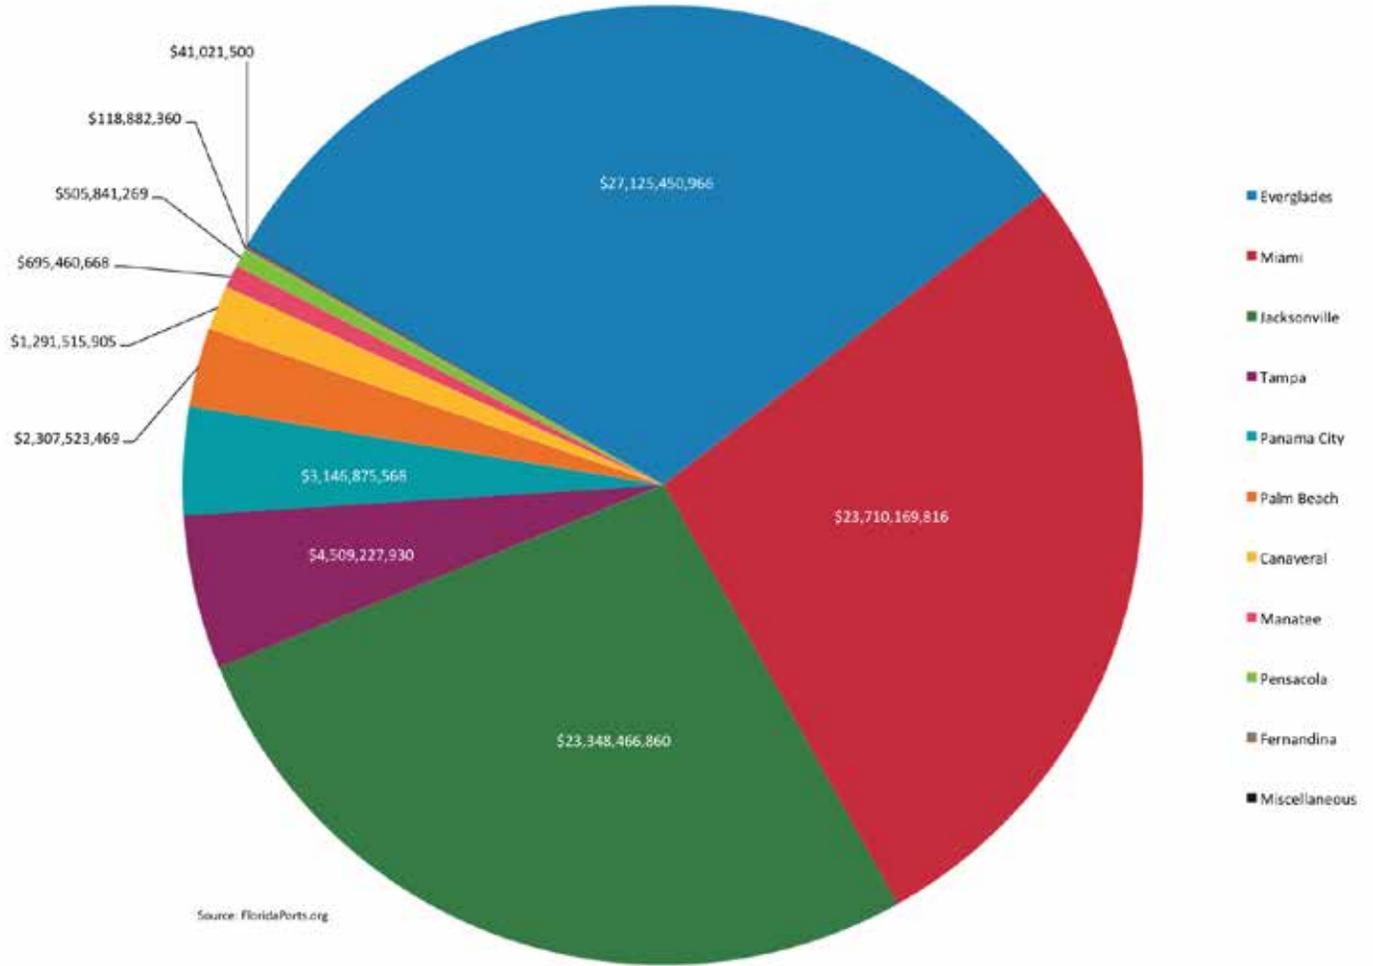

The Port of Tampa is largest of the Florida ports by tonnage and area. It is a vital energy products gateway to West Central Florida and an important global distribution point for fertilizer. The port accommodates a broad mix of bulk, break-bulk, roll on/roll off, neo-bulk and container cargo.

- Hinterland: Central Florida for energy, building, citrus and fertilizer products. As for container cargo, Florida, and through CSX, the U.S. Midwest and entire eastern seaboard.

**FLORIDA COOPERATIVE EXTENSION SERVICE AND EXTENSION IFAS/UF OFFICE LOCATIONS**

Extension service is a partnership between state, federal, and county governments to provide scientific knowledge and expertise to the public. The University of Florida (UF), together with Florida A&M University (FAMU), administers the Florida Cooperative Extension Service.

At the University of Florida, Extension service is located in the Institute of Food and Agricultural Sciences (IFAS), along with the College of Agricultural and Life Sciences (CALS) and the Florida Agricultural Research and Education Center, and is called UF/IFAS Extension.

UF/IFAS Extension encompasses thousands of Extension faculty members, scientists, educators, administrative staff, and volunteers, all working to provide solutions for your life.

[www.solutionsforyourlife.com](http://www.solutionsforyourlife.com) is the web site of University of Florida Extension Service. You can explore topics in lawn and garden care, family life and consumer choices, agriculture, community development, the environment, and youth development. Above all, our site is focused on getting you timely and relevant solutions for improving your life.

# AGRICULTURE STATISTICS AND OTHER INFORMATION

# AGRICULTURAL STATISTICS AND OTHER INFORMATION

## Internet

NASS national and state reports and data are available on the Internet.

## National Homepage

[www.nass.usda.gov](http://www.nass.usda.gov)

The national homepage has links to all agency products and services such as publications, graphics, historic data, state information, statistical research, Census of Agriculture, a search engine and a Published Estimates Data Base to query and download state or county historic data. There are also links to our Customer Service unit, a Kids Page, and all other federal statistics outside the National Agricultural Statistics Service.

For a monthly summary of USDA estimates, forecasts and projections of commodities, prices, trade issues, and world crop developments, visit:

[www.nass.usda.gov/Publications](http://www.nass.usda.gov/Publications)

## Florida Homepage

[www.nass.usda.gov/fl](http://www.nass.usda.gov/fl)

The Florida web site offers much of the same information as the national homepage but in a format designed for Florida customers. The reports contain the same statistics but offer more details about agriculture in Florida. Links are also available to other sites such as the Florida Department of Agriculture and Consumer Affairs, University of Florida and other NASS field offices.

## Printer Reports and Computer Format

All NASS reports are still printed on paper. Census reports are only available while supplies last; contact the Florida office for a copy. NASS also offers a wide variety of data on CD-ROM with national, state, and county statistics. Most of these products are in MS Excel spreadsheet format or comma separated (CSV) files.

A listing of all paper reports and computer products can be found in the Products and Services catalog issued every December. To order a free Products & Services catalog or purchase paper reports or CD-ROMs, call:

**1-800-999-6779**

Or visit:

[www.nass.usda.gov/Publications/catalog.pdf](http://www.nass.usda.gov/Publications/catalog.pdf)

## E-Mail Subscriptions

Free e-mail subscriptions are available via automated mailing lists for National and State reports. You can subscribe to individual reports and they will be sent directly to your e-mail address soon after the official release time.

## National, State and News Reports via E-mail

National reports contain statistics from all states and are the most timely source of data.

State reports are distributed after national reports but they usually contain more local information. For more information, visit:

[www.nass.usda.gov/Publications/index.asp](http://www.nass.usda.gov/Publications/index.asp)

## Follow NASS

or for State

[www.nass.usda.gov/Statistics\\_by\\_State/index.asp](http://www.nass.usda.gov/Statistics_by_State/index.asp)

Select a State, In the [I Want to... box], select Subscribe to ?? reports

## Auto-Fax

Selected NASS reports and information items are available from a free fax service called NASS-Fax. To receive the items, use a touch tone telephone connected to your FAX machine to call:

**202-720-2000**

Voice prompts will guide you to selected items of interest. The first time you access the system, request Document **number 0411** which will provide a listing of the information that is available in reports.

# JOIN THE “FRESH FROM FLORIDA” PROGRAM

“Fresh From Florida” is a program administered by the Florida Department of Agriculture and Consumer Services. It is designed to connect distributors and retail buyers with Florida growers to increase sales of Florida products.

To learn more about the program benefits, visit [FreshFromFlorida.com/Join](http://FreshFromFlorida.com/Join) or call 850-617-7399.

Visit  
[FreshFromFlorida.com/Join](http://FreshFromFlorida.com/Join)

# FLORIDA STATE FARMERS MARKETS

## Providing Essential Marketing Infrastructure

State Farmers' Markets assist in the marketing of farm products by providing modern marketing facilities to move products from the farm to the consumer. There are 12 state Farmer's Markets that offer attendant services such as refrigeration, truck weigh scales, packing houses, coolers, offices, farm supplies, restaurants, produce brokerage sales, and produce and freight shipping companies. Through volume production and marketing, effective competition is assured for both small and large growers and buyers.

## AGRI BUSINESS IS GROWING
