General

According to the National Agricultural Statistics Service in Georgia, there were 6.4 days suitable for fieldwork for the week ending Sunday, November 21, 2021. Precipitation ranged from no rain to 0.5 inches. Average high temperatures ranged from the high 50s to the low 70s. Average low temperatures ranged from the low 30s to the high 40s.

Crops

Dry weather across the state allowed for ideal harvest conditions and many days of fieldwork. Multiple freezes were noted around the state as temperatures continued to drop. Cotton, peanut and soybean harvest continued to progress well given the lack of rain. Pecan harvest continued; however, some producers are planning to harvest after the next freeze so they can go over their orchards once due to the light crop. Small grains continued to be planted and in many fields are beginning to emerge. The lack of rain was noted to be delaying the planting of small grains in some areas.

Livestock and Pastures

Livestock remained in generally good condition throughout the state. Producers continued feeding hay and stockpiling forages for livestock in addition to planting winter grazing. **Crop Progress for Week Ending 11/21/21**
