FREQUENCY: Annual

RELEASED: May 31, 2005

## GUAVA OUTPUT REBOUNDS AFTER A THREE - YEAR DECLINE

**Inside this issue:**

2004 Summary .....	1
Five-Year Statistics .....	2
Historical Data Series .....	3
U.S. Selected Guava Imports ..	4

**GUAVA PRODUCTION UTILIZED FOR PROCESSING TOTALED 8.1 MILLION POUNDS IN 2004**, and rebounding after three years of continuous decline according to the Hawaii Agricultural Statistics (HAS). Weather had mixed results on production during 2004. Statewide farm value totaled \$1.2 million for 2004, up 26 percent from 2003.

**TOTAL ACREAGE WAS DOWN**

**20 ACRES TO 590**, and the lowest since 1976. Harvested acreage totaled 500 acres, 30 acres less than 2003. In the past years, most of the acreage reduction has been occurring on Hawaii island and dropping 200 acres since 2000. Some growers cited low prices as a factor in discontinuing growing guava. Kauai's acreage has remained steady.

**U.S. IMPORTS OF SELECTED GUAVA PRODUCTS IN 2004** were up from a year ago (see page 4). Guava paste and puree were up 6 percent to 9.6 million pounds (4.4 thousand metric tons). Brazil, accounted for just over 42 percent of the imports.

Guava prepared or preserved imports increased 12 percent from the previous year to 11.9 million pounds. Ecuador and Dominican Republic supplied about 55 percent of the imports into the U.S.

Guava jam imports were up 9 percent to 1.6 million pounds (713 metric tons). Costa Rica and Brazil accounted for 90 percent of the total.
