Weather Review

On November 20, the U.S. Drought Monitor reported mostly normal conditions for the entire state.

No change was made to the depiction in Hawaii. The last seven days have been drier than normal across Hawaii, but widespread wet conditions were the rule at longer time scales, from 30 days to 12 months, due to tropical and frontal rains that have fallen in recent months. Complete information provided by the Drought Monitor can be found on their website at <http://droughtmonitor.unl.edu>. For the week ending on November 20, 2018, the state rainfall averaged 0.72 inches.
