Wage Rates and Number of Hired Agricultural Workers Down

In cooperation with

Inside this issue:

Labor 1-3

Hawaii’s hired agricultural work force was estimated at 6,200 workers during the week of January 6-12, 2013, and 6,000 workers during the reference week of April 7-13, 2013. These totals correspond to a decrease of 100 workers in January, and 500 workers in April from the estimated number of agriculture workers in Hawaii during the respective reference weeks a year ago. The estimated number of sugarcane and pineapple workers in January 2013 was estimated at 800 workers, up 50 workers or 7 percent as compared to the previous January. This number of sugarcane and pineapple workers remained steady at 800 workers through April 2013. In January 2013, all other (diversified agriculture) hired workers decreased by 150 workers or 3 percent compared to January a year ago. During the second quarter of 2013, the number of workers hired in diversified agriculture industries declined by 200 workers or 4 percent compared to January 2013.

Weather was mostly dry leading up to January, with few isolated rain showers occurring during the labor survey reference week. Despite the showers, conditions remained favorable for performing agriculture activities and functions. During the reference week in April, approximately 85 percent of the state was classified with a drought rating of abnormally dry or drier. These drought conditions were spread across all four counties of Hawaii, and were most severe on leeward areas of the islands.

The average wage paid to all hired workers during the reference week of January 6-12, 2013 was estimated at \$14.84 an hour; down \$0.21 from the estimated wage rate in January 2012. In the second quarter of 2013, the wage rate decreased to an average of \$14.72 an hour. The drop in wage rates and hired workers can be attributed to the current status of the job market, and agricultural producers opting to hire more contract labor instead of maintaining workers on their payroll. ■

Farm Labor:

FARM LABOR: Number of Workers on Farms, Quarterly and Annual Averages, State of Hawaii, 2012 and 2013 ^{1/}

Quarter	Hired Workers		
	Total	Sugarcane and Pineapple ^{2/}	Other
2012			
January	6,300	750	5,550
