## USDA to Gather Data about Hemp

**October 14, 2021** – On October 18, USDA's National Agricultural Statistics Service (NASS) will mail its first Hemp Acreage and Production Survey. The survey will collect information on the total planted and harvested area, yield, production, and value of hemp in Hawaii and across the United States.

"The Hemp Acreage and Production Survey will provide critical data about the hemp industry to assist producers, regulatory agencies, state governments, processors, and other key industry entities," said Shawn Clark, NASS Hawaii State Statistician.

Survey recipients are asked to respond securely online at [agcounts.usda.gov](https://agcounts.usda.gov), using the 12-digit survey code mailed with the survey, or to mail completed questionnaires back in the prepaid envelope provided, by Oct. 25.

As defined in the Agriculture Improvement Act of 2018 (2018 Farm Bill), the term "hemp" means the plant species *Cannabis sativa* L. and any part of that plant such as the seeds, all derivatives, and extracts, whether growing or not, with a delta-9 tetrahydrocannabinol concentration of not more than 0.3% on a dry weight basis. The [Domestic Hemp Production Program](#) established in the Agriculture Improvement Act of 2018 (2018 Farm Bill) allows for the cultivation of hemp under certain conditions.

All information reported by individuals will be kept confidential, as required by federal law. NASS will publish the survey results Feb. 17, 2022 on the NASS website and in the NASS Quick Stats searchable database. For more information about the 2021 Hemp Acreage and Production Survey, [visit the hemp survey web page](#). For assistance with the survey, producers are encouraged to call the NASS Hawaii Field Office at (808) 522-8080.
