USDA gathers cash rents data

HONOLULU, HI, – Feb. 24, 2021 – The U.S. Department of Agriculture’s National Agricultural Statistics Service (NASS) is conducting the *Cash Rents and Leases* survey. The survey provides the basis for estimates of the current year’s cash rents paid for irrigated cropland, non-irrigated cropland, and permanent pasture. Survey recipients are encouraged to complete their *Cash Rents and Leases* survey by June 21. This survey can be completed and returned by mail, over the phone, or at agcounts.usda.gov.

“Survey responses from as many farm operations as possible help calculate more accurate rental rates. Completion of this survey ensures cash rental rates accurately represent your locality,” said NASS Hawaii State Statistician Shawn Clark. “Results from the *Cash Rents and Leases* survey will also give landowners a useful tool in negotiating rental agreements, and financial planning for your agricultural operation.”

Information from this survey is also used in the Farm Service Agency (FSA) Conservation Reserve Program (CRP) as an alternative soil rental rate prior to finalizing new rates each year.

In accordance with federal law, survey responses are kept confidential. Survey results will be available in aggregate form only to ensure that no individual producer or operation can be identified. NASS will publish the survey results on August 27 at

quickstats.nass.usda.gov/. For more information on NASS surveys and reports, call the NASS Hawaii Field Office at (808) 522-8080 or visit:

https://www.nass.usda.gov/Surveys/Guide_to_NASS_Surveys/Cash_Rents_by_County/index.php.

###

NASS is the federal statistical agency responsible for producing official data about U.S. agriculture and is committed to providing timely, accurate and useful statistics in service to U.S. agriculture.

USDA is an equal opportunity provider, employer, and lender.
