USDA SURVEYING SHEEP AND GOAT OPERATIONS

HONOLULU, HI, – December 16, 2022 – Starting in late December, the U.S. Department of Agriculture’s National Agricultural Statistics Service (NASS) will measure sheep and goat inventories and wool and mohair production through a nationwide survey.

“Interest in sheep and goat data continues to grow with increased diversification in agriculture and consumer demands,” said Gary R. Keough, director of the NASS Pacific Regional Office. “The Sheep and Goat Survey gives producers the opportunity to report the latest information on conditions and trends in the industry.”

Hawaii operators surveyed will be asked to provide information about their sheep and goat inventories, counts of lambs and kids born during 2022, and production and prices received for wool and mohair. In Hawaii, NASS will contact about 200 operations to request their responses to the survey.

“Accurate data on sheep and goat inventory and production is a significant decision-making tool for USDA and the industry to be more responsive to domestic and international markets and consumer needs. The information can also help create public appreciation for the many benefits of U.S. sheep and goats and their needed products,” added Keough.

To make it as easy as possible for producers to participate in the survey, NASS offers the option of responding online, by telephone or by mail. The results of this survey will be available in aggregate form only, ensuring that no individual operation or producer can be identified, as required by federal law.

NASS will publish the survey results January 31, 2023 in the *Sheep and Goats* report. This and all NASS reports are available online at www.nass.usda.gov/Publications. For more information, call the NASS Pacific Regional Field Office at (916) 738-6600.
