

Indiana Agriculture Report

March Agricultural Prices

Prices received by Indiana farmers for the full month of March 2015 are listed in the table below.

Some Indiana highlights were: March corn, at \$3.94 per bushel, increased \$0.01 from February and decreased \$0.74 from last year; March soybeans, at \$10.10 per bushel, decreased \$0.10 from last month and decreased \$3.80 from last year; March wheat, at \$5.47 per bushel, decreased \$0.01 from February and decreased \$0.60 from last year; March milk, at \$16.70 per cwt., decreased \$0.40 from last month, and decreased \$8.70 from last year.

The March Prices Received Index (Agricultural Production), at 102, based on 2011=100, increased 3 points (3.0 percent) from February. At 86, the March Crop Production Index is up 1 point (1.2 percent). At 117, the Livestock Production Index increased 3 points (2.6 percent). Producers received higher prices for broilers, eggs, cattle, and oranges but lower prices for milk, wheat, soybeans, and apples. In addition to prices, the indexes are impacted by the five-year average monthly mix of commodities producers market. Increased monthly movement of cattle, strawberries, calves, and milk offset the decreased marketing of cotton, soybeans, and hay.

The Prices Received Index is down 9 points (8.1 percent) from March 2014. The Food Commodities Index, at 110, increased 3 points (2.8 percent) from the previous month but decreased 12 points (9.8 percent) from March 2014.

USDA Surveys to Provide Insight on 2015 Agriculture

A sample of Indiana farm operators will have an opportunity to provide farm information during the upcoming June Agricultural Survey period. These surveys are among the largest and most important conducted by the USDA, NASS, Great Lakes Regional Field Office and they serve as a primary source of agricultural information. These surveys will provide accurate and reliable data about 2015 planted acreages of major crops, grain stocks, and livestock in Indiana and the U.S.

Producers rely on the survey results to make valid production, marketing, and investment decisions. Congress uses the information to design better regulations and farm programs. Industry analysts, extension agents, farm organizations, and agricultural lenders use the data in a variety of ways to directly benefit the grower.

Growers across Indiana will be contacted during the coming weeks to obtain data regarding their operations. This data will be collected by mail, phone, and personal interviews. Growers will also be given the opportunity to report on the Internet. All survey responses are protected by law and remain strictly confidential. Information from individual operations will not be disclosed but will be combined with others to make reliable state, regional, and national estimates.

Results will be released soon after the survey is complete. The Quarterly Hogs and Pigs Report will be released on Friday, June 26, 2015 at 3:00 p.m. and the Acreage and Grain Stocks Reports will be released on Tuesday, June 30, 2015 at 12:00 p.m. Survey results can be obtained at www.nass.usda.gov or by calling the Great Lakes Regional Field Office at 1-800-453-7501.

Prices Received by Farmers¹, March 2015

Meat Animal Cash Receipts

Indiana cattle and calves cash receipts totaled \$437.5 million in 2014, up 47 percent from 2013, according to Greg Matli, State Statistician of the USDA, NASS, Indiana Field Office. Cattle and calf marketings totaled 289.2 million pounds, up 13 percent from 2013.

Indiana hog cash receipts totaled \$1.3 billion in 2014, up 14 percent from 2013. All hog and pig marketings totaled 1.70 billion pounds, down slightly from 2013.

Nationally, Cash receipts from marketings of cattle and calves increased 20 percent from \$67.5 billion in 2013 to \$81.3 billion in 2014. All cattle and calf marketings totaled 52.1 billion pounds in 2014, down 5 percent from 2013.

Nationally, Cash receipts from hogs and pigs totaled \$26.4 billion during 2014, up 11 percent from 2013. Marketings totaled 33.0 billion pounds in 2014, down 3 percent from 2013.

Indiana Livestock Marketing and Receipts, 2013-2014

Item	2013	2014	Change
	<i>1,000 pounds</i>	<i>1,000 pounds</i>	<i>Percent</i>

Cattle and calves	298,408	437,502	47
Hogs and pigs	1,186,509	1,347,350	14

March Milk Production

Dairy herds in Indiana produced 343 million pounds of milk during March, up 3.9 percent from a year ago, according to Greg Matli, State Statistician of the USDA, NASS, Indiana Field Office. The daily rate per cow was 61.1 pounds, up 0.6 pound from March 2014. The dairy herd was estimated at 181,000 head for March, up 5,000 head from a year earlier.

Indiana Dairy Summary, March 2015

² Due to sequestration, only total milk production was published.

Chickens and Eggs

All layers in Indiana totaled 26.3 million during March down 4 percent from a year ago. Egg production totaled 620 million eggs, down 8 percent from last year. The rate of lay during March was 2,355 eggs per 100 layers. On April 1, in the East North Central Region, which includes Michigan, Illinois, Indiana, Ohio, and Wisconsin, there were 10.7 million egg-type eggs in incubators, up 6 percent from a year earlier. In the same region, there were 14.3 million broiler-type eggs in incubators, up 2 percent from the previous year. There were 24.2 million turkey poults hatched in the U.S. in March, up 8 percent from the previous year.

Egg and Hatchery Production, March 2015

Item	Unit	2014	2015	Percent change

Turkey Eggs in incubators, Apr 1	Thou	27,195	28,627	5
Turkey Poults hatched, Mar	Thou	22,380	24,152	8

Winter Wheat Production and Hay Stocks

Indiana Wheat growers expect a slightly lower wheat yield than last year, with delayed plantings and large variations in temperature leading concerns, according to the USDA NASS Great Lakes Regional Office. Indiana wheat growers expect to harvest 305,000 acres, down 30,000 acres from last year. Wheat production in the State is expected to be 22.6 million bushels. The yield forecast of 74 bushels would be 2 bushels below the previous year.

U.S. Winter wheat production is forecast at 1.47 billion bushels, up 7 percent from 2014. As of May 1, the United States yield is forecast at 43.5 bushels per acre, up 0.9 bushels from last year.

Hay stocks on Indiana farms on May 1, 2015 were 320,000 tons, up 60% from this time last year. May 1, 2015 stocks were higher this year due to the good growing season that boosted hay production in 2014.

All hay stored on United States farms May 1, 2015 totaled 24.5 million tons, up 28 percent from a year ago. Disappearance from December 1, 2014 - May 1, 2015 totaled 67.5 million tons, compared with 70.1 million tons for the same period a year earlier.

Crop Summary, May 2015

Commodity	Indiana			United States		
	2013	2014	2015	2013	2014	2015
Wheat, winter

Thank You to our Data Providers

The USDA, NASS, Great Lakes Region, Indiana Field Office and enumerator staff are pleased to provide you and the Indiana agricultural industry with current, reliable information as summarized in the following articles. This service is possible because you and other respondents provided us with timely survey responses. Thank you!
