¹ While a State's actual agricultural export value cannot be measured directly, ERS has developed methods that provide indirect estimates of exports using State export shares. Data is provided using a calendar year series of export estimates based on U.S. farm cash receipts.

² Methodology for dairy revised starting in 2007 to estimate shares based on state production of cheese, butter, dry whey, ice cream, and sherbet.

³ Includes live animals, other meats, animal parts, eggs, wine, beer, other beverages, coffee, cocoa, hops, nursery crops, inedible materials, and prepared foods.
