

Indiana Crop Weather

IN-CW2916

July 18, 2016

Wheat Harvest Wraps Up

Light showers across the State were beneficial for dry areas and a burden for the oversaturated southern region, according to Greg Matli, Indiana State Statistician for the USDA's National Agricultural Statistics Service. Most of the State received some precipitation during the week, but there are portions that continued to be dry. Statewide precipitation was slightly above average at 0.92 inches. Temperatures continued to be hot and humid across the state, leaving some crops stressed. The statewide average temperature was 75.1 degrees, 0.2 degrees above normal. There were 5.0 days available for fieldwork for the week ending July 17, up 0.4 days from the previous week.

Winter wheat harvest has wrapped up for most of the State. Hay and pasture fields are beginning to pick up in growth from the increased precipitation and remained in good condition. Some farmers had to delay their second cutting of hay due to the rain showers, but remain far ahead of last year and the five year average. Livestock were reported to be in good condition as many were being prepared to be taken to county fairs. Blueberry harvest continued on strong while watermelon, cantaloupe, tomato, and pepper harvest have begun. Other activities for the week included hauling grain, running irrigation systems, mowing roadsides, and making the deadline for certifying crops with FSA.

Soil Moisture: Week Ending 07/17/16

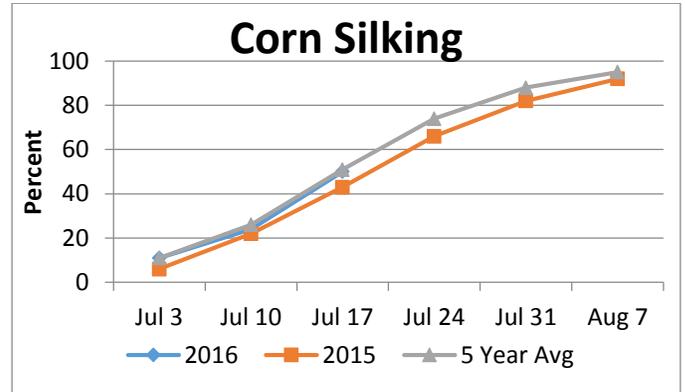

Item	Very short	Short	Adequate	Surplus
	(percent)	(percent)	(percent)	(percent)
Topsoil moisture	5	14	67	14
Subsoil moisture	5	16	71	8

Crop Condition: Week Ending 07/17/16

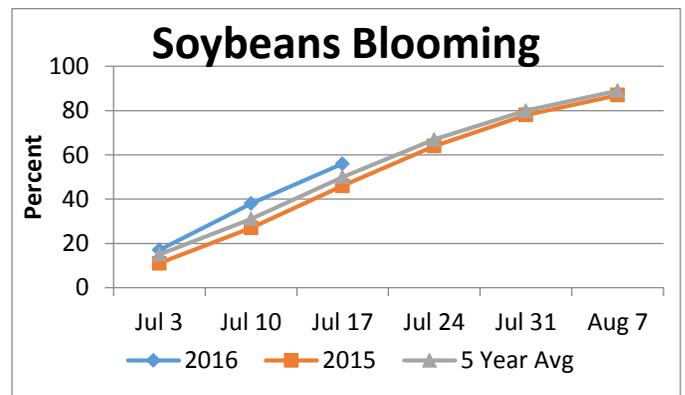

Crop	Very poor	Poor	Fair	Good	Excellent
	(percent)	(percent)	(percent)	(percent)	(percent)
Corn	3	5	18	53	21
Soybeans	2	5	21	53	19
Range and Pasture....	2	5	21	59	13

Crop Progress: Week Ending 07/17/16

Crop/Activity	Percent Completed			
	This week	Last week	Last year	5 Year average
Days Suitable for Fieldwork	5.0	4.6	NA	NA
Corn Silking.....	50	24	43	51
Corn Doughed.....	1	0	0	2
Soybeans Blooming	56	38	46	50
Soybeans Setting Pods	19	2	14	13
Winter Wheat Harvested.....	96	83	68	86
Alfalfa Hay 2nd Cutting	79	65	33	65
Other Hay 2nd Cutting.....	55	42	33	NA

Corn dough was 1% in the North, 1% in Central and 2% in the South. Corn rated in good to excellent condition was 74% in the North, 81% in Central, and 61% in the South. Corn has silked evenly so far in all regions in the State at 50%. Corn continues to progress quickly with the warm temperatures. Wind damage from storms are still present in corn fields.

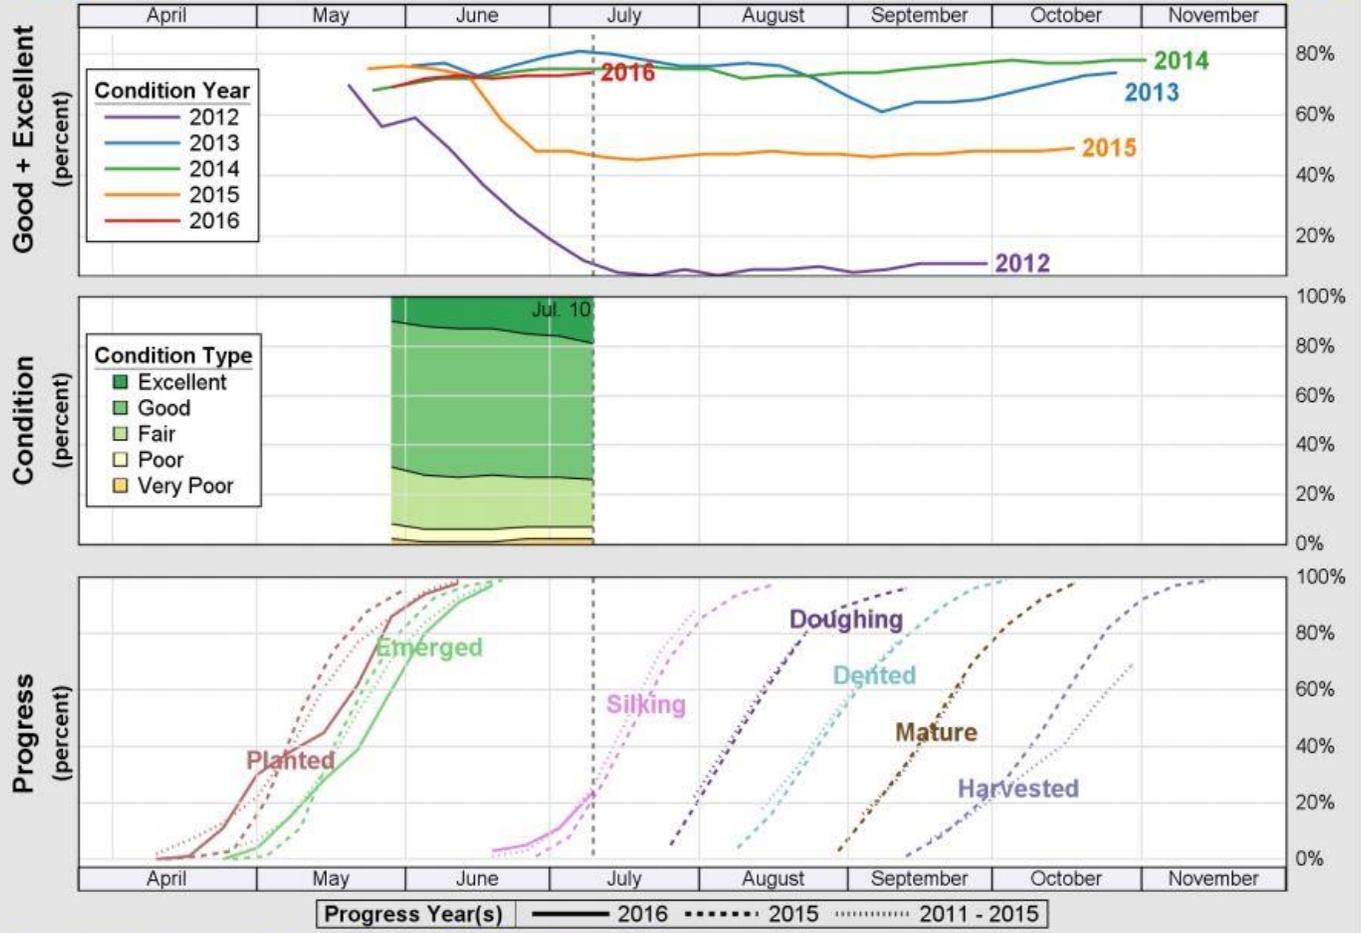

By region, soybeans blooming were 62% in the North, 61% in Central, and 38% in the South. Soybeans setting pods were 17% complete in the North, 23% in Central, and 12% in the South. Soybeans rated in good to excellent condition were 70% in the North, 80% in Central, and 60% in the South. Some double-cropped soybean fields have emerged unevenly from either being in extremely dry or wet soils. Fungicide and pesticide applications have wrapped up for most farmers.
