Good Weather Conditions

Good weather conditions made for a great work week for farmers, according to Greg Matli, Indiana State Statistician for the USDA's National Agricultural Statistics Service. Conditions were favorable for drying saturated soils. There were 5.4 days available for fieldwork for the week ending September 4, up 1.7 days from the previous week.

Weather conditions put cutting and baling hay into full swing. Livestock were reported in good condition. Other activities this week included seeding cover crops, mowing weeds, harvest equipment preparation, grain bin maintenance, harvesting potatoes, pumpkins, tomatoes, second crop cucumbers, and mint.

Corn dented was 76% in the North, 79% in Central, and 77% in the South. **Corn** is maturing faster than anticipated. **Corn** mature was 14% in the North, 23% in Central, and 25% in the South. **Corn** silage harvest continued. Seed **corn** harvest got underway after a wet August forced some growers to use fungicides and desiccants. A few growers began harvesting grain **corn**. Concerns persisted over molds and rust as well as stalk rots, mainly in the southern portion of the state. **Corn** rated in good to excellent condition was 72% in the North, 79% in Central, and 65% in the South.
