

Indiana Crop Weather

IN-CW2320

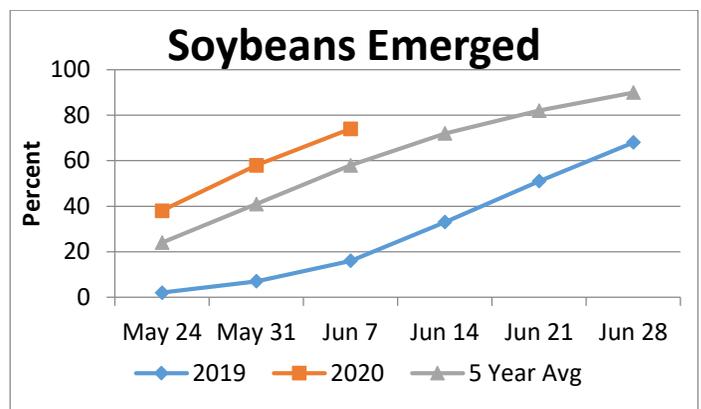

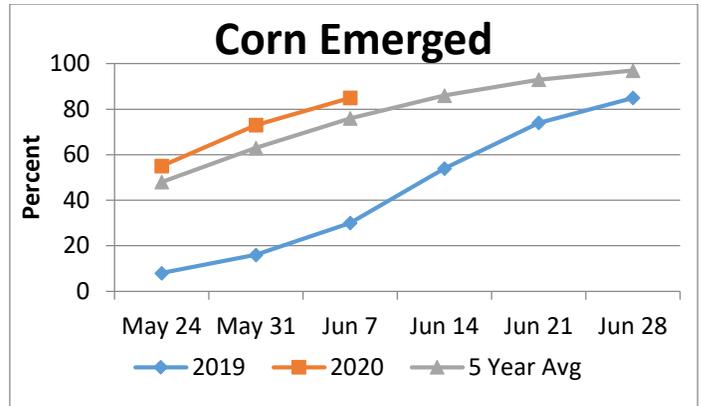

June 8, 2020

Hot, Dry Weather Spurs Progress

Hot and dry weather throughout the week allowed for significant fieldwork, according to USDA NASS, Great Lakes Regional Field Office. Soil moisture levels decreased again from the previous week.

The average temperature for the week was 72.7 degrees Fahrenheit, 5.0 degrees above normal for the State. The amount of rainfall varied from none to 2.17 inches over the week. The statewide average precipitation was 0.40 inches. There were 5.6 days suitable for fieldwork for the week ending June 7.

Ideal conditions last week allowed growers to all but wrap up **corn** planting and replanting, with **soybeans** not far behind. **Winter wheat** conditions improved slightly, and progress was in line with the five-year average. Growers took advantage of the dry weather to make major progress with hay cutting throughout the State. Cattle and other livestock were reported to be in good condition and enjoying pasture growth. Other activities for the week included sidedressing corn, herbicide applications, mowing ditches, and submitting plant samples.

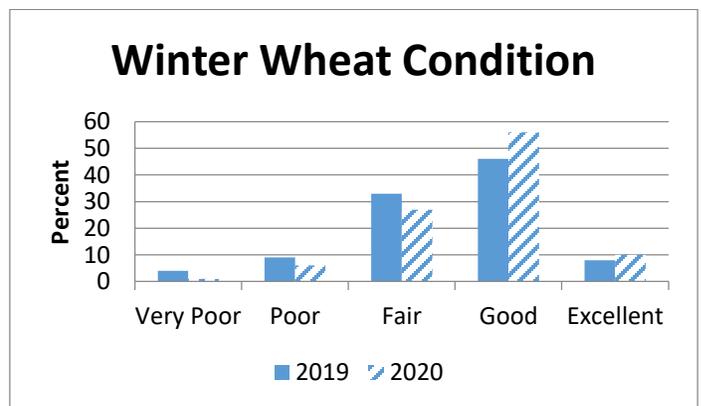

Soil Moisture: Week Ending 06/07/20

Item	Very short	Short	Adequate	Surplus
	(percent)	(percent)	(percent)	(percent)
Topsoil moisture	2	12	76	10
Subsoil moisture	1	9	77	13

Crop Condition: Week Ending 06/07/20

Crop	Very poor	Poor	Fair	Good	Excellent
	(percent)	(percent)	(percent)	(percent)	(percent)
Corn	2	5	25	58	10
