

Indiana Crop Weather

IN-CW3220

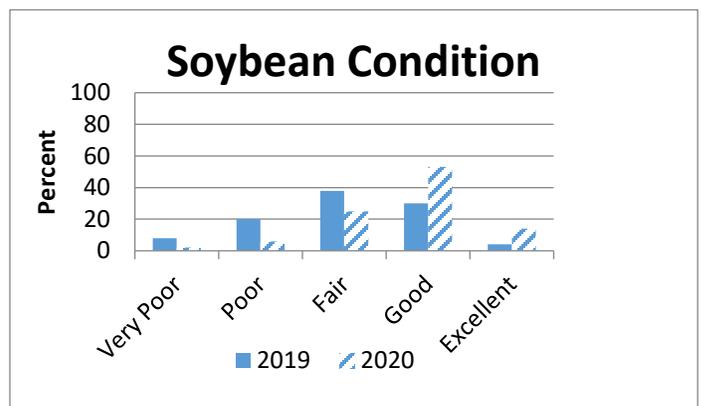

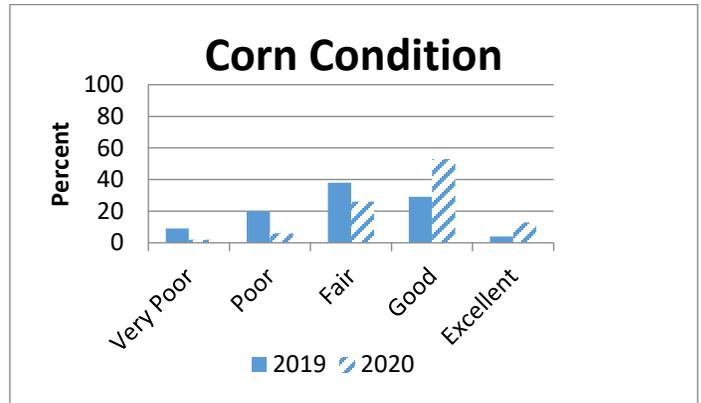

August 10, 2020

Cooler Temperatures Prevailed

The temperatures were cooler than normal last week, with variable rain showers early in the week, according to USDA NASS, Great Lakes Regional Field Office. While the cool temperatures slowed the depletion of soil moisture, some areas were in the need of more rain by week's end. Overall, State level topsoil and subsoil moisture levels decreased slightly from the previous week.

The average temperature for the week was 68.2 degrees Fahrenheit, 4.7 degrees below normal for the State. The amount of rainfall varied from none to 2.61 inches over the week. The statewide average precipitation was 0.33 inches. There were 5.8 days suitable for fieldwork for the week ending August 9.

Rainfall during the early part of the week allowed crops to continue to advance towards maturity. **Corn** and **soybean** crop development remained ahead of the five-year average, while crop conditions remaining mostly stable. Drier conditions during the latter part of the week allowed second cutting of hay to proceed. Livestock were reportedly in good condition and benefitting from good pasture growth and the Spring-like conditions early in the week. Other activities for the week included mowing roadsides, spraying fungicides, harvesting vegetables, and attending extension webinars.

Soil Moisture: Week Ending 08/09/20

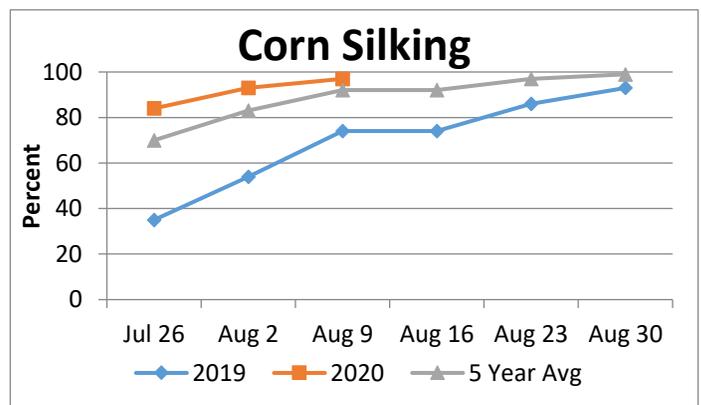

Item	Very short	Short	Adequate	Surplus
	(percent)	(percent)	(percent)	(percent)
Topsoil moisture	3	17	74	6
Subsoil moisture	3	21	71	5

Crop Condition: Week Ending 08/09/20

Crop	Very poor	Poor	Fair	Good	Excellent
	(percent)	(percent)	(percent)	(percent)	(percent)
Corn	2	6	26	53	13
Soybeans	2	6	25	53	14
Range and Pasture...	4	9	36	44	7

Crop Progress: Week Ending 08/09/20

Crop/Activity	Percent Completed			
	This week	Last week	Last year	5 Year average
Days Suitable for Fieldwork	5.8	4.3	NA	NA
Corn Silking	97	93	74	92
Corn Dough	56	37	25	49
