

Indiana Crop Weather

IN-CW2422

June 13, 2022

Much Needed Rain Received

Corn and soybean planting began to wrap up, according to Nathaniel Warenski, State Statistician, USDA NASS, Indiana Field Office. Soil moisture levels increased from the previous week, with 93 percent of topsoil moisture reported as adequate or surplus.

The average temperature for the week was 67.9 degrees Fahrenheit, 1.6 degrees below normal for the State. The amount of rainfall varied from 0.10 to 2.94 inches over the week. The statewide average precipitation was 1.40 inches, 0.36 inches above normal. There were 4.4 days suitable for fieldwork for the week ending June 12.

Corn planting progress was all but finished last week. Both corn and soybean emergence progressed ahead of their respective five-year averages with 74 percent of corn and 73 percent of soybeans rated in good to excellent condition. Nearly all winter wheat across the State had headed. Some counties experienced heavier rain showers that hindered hay production processes. Livestock throughout much of the State enjoyed the vegetative regrowth brought on by rain and pasture conditions improved slightly from the previous week. Other activities for the week included side dressing, fungicide applications, and replanting crops in damaged field areas as needed.

Crop Progress: Week Ending 06/12/22

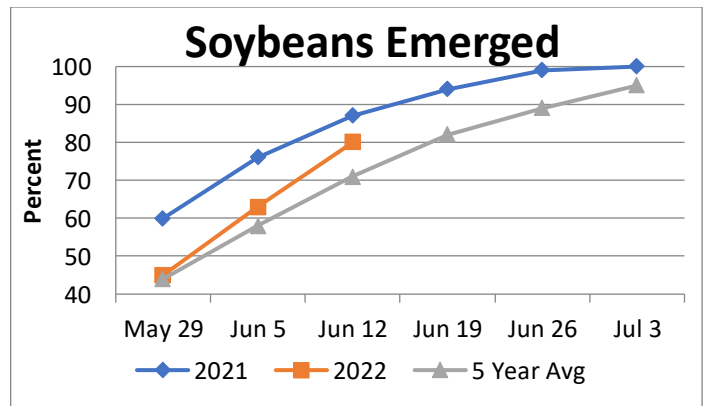

Crop/Activity	Percent Completed			
	This week	Last week	Last year	5 Year average
Days Suitable for Fieldwork.....	4.4	5.5	NA	NA
