November 14, 2022

Dry Weather Aids Harvest Progress

A mostly warm and dry week pushed harvest closer to completion, according to Nathaniel Warenski, State Statistician, USDA NASS, Indiana Field Office. Soil moisture levels increased slightly from the previous week, with 50 percent of topsoil moisture reported as adequate or surplus.

The average temperature for the week was 47.5 degrees Fahrenheit, 4.5 degrees above normal for the State. The amount of rainfall varied from none to 0.34 inches over the week. The statewide average precipitation was 0.26 inches, 0.57 inches below normal. There were 5.6 days suitable for fieldwork for the week ending November 13.

Corn and soybean harvests were starting to wrap up throughout the State last week, aided by unusually warm and dry weather, before colder temperatures and snowfall arrived over the weekend. Corn and soybean harvests both finished the week ahead of their respective five-year averages. Winter wheat planting also neared completion last week, with emergence just slightly behind the five-year average. Winter wheat conditions declined slightly amid a notable lack of moisture this week. Other activities for the week included fall tillage and fertilizer and lime applications.

Crop Moisture Content: Week Ending 11/13/22

Crop	This week	Last week	Last year	5 Year average
	(percent)	(percent)	(percent)	(percent)
Field corn harvested for grain	17	18	17	18
Soybeans harvested	12	12	14	13

Crop Progress: Week Ending 11/13/22

Crop/Activity	Percent Completed			
	This week	Last week	Last year	5 Year average
Days Suitable for Fieldwork	5.6	5.4	NA	NA
Corn Harvested for Grain	91	83	84	84
Soybeans Harvested	96	93	86	91
Winter Wheat Planted	96	90	91	93
Winter Wheat Emerged.....	77	63	74	79

Soil Moisture: Week Ending 11/13/22

Item	Very short	Short	Adequate	Surplus
	(percent)	(percent)	(percent)	(percent)
Topsoil moisture	12	38	49	1
Subsoil moisture	17	40	42	1

Crop Condition: Week Ending 11/13/22
