

## Biotechnology Varieties, Iowa and U.S.

USDA, National Agricultural Statistics Service conducts the June Agricultural Survey each year. Randomly selected farmers across Iowa are asked if they planted corn seeds that, through biotechnology, are resistant to herbicides, insects, or both. Conventionally bred herbicide resistant varieties were excluded. Insect resistant varieties include only those containing bacillus thuringiensis (Bt). Stacked gene varieties include those containing biotech traits for both herbicide and insect resistance.

### Corn Biotechnology Varieties, Iowa and U.S., Percent of All Planted Acres

Year	Acres Planted (1,000 acres)	Insect Resistant (Bt) (percent)	Herbicide Resistant (percent)	Stacked Gene Varieties (percent)	All Biotech Varieties (percent)
<b>IOWA</b>					
2002	12,200	31	7	3	41
2008	13,300	16	15	53	84
2009	13,600	14	15	57	86
2010	13,400	15	14	61	90
2011	14,100	13	16	61	90
2012	14,000	12	15	64	91
<b>UNITED STATES</b>					
2002	78,894	22	9	2	34
2008	85,982	17	23	40	80
2009	86,382	17	22	46	85
2010	88,192	16	23	47	86
2011	91,921	16	23	49	88
2012	96,405	15	21	52	88
