Volume 07 No. 29

Agricultural Summary: The State received scattered showers last week with some areas accumulating over 3 inches. Temperatures were average. Harvesting wheat and hay were the primary activities. There were reports of flood damage to row crops in the southeast district. Producers averaged 5.2 days suitable for fieldwork. Topsoil moisture was rated 6 percent very short, 25 percent short, 61 percent adequate, and 8 percent surplus. Subsoil moisture was rated 2 percent very short, 23 percent short, 66 percent adequate, and 9 percent surplus.

Field Crop Report: Ninety-one percent of the **wheat** has been harvested, compared to 100 percent last year and 99 percent for the 5-year average. Sixty-nine percent of the **corn** has silked, compared to 72 percent last year and 62 percent for the 5-year average. Ten percent is in the dough stage, eight points behind last year and 2 points behind the 5-year average. Corn condition was rated 2 percent very poor, 7 percent poor, 20 percent fair, 53 percent good, and 18 percent excellent. Ninety-five percent of the **soybeans** have emerged, compared to 100 percent last year and 99 percent for the 5-year average. Thirty-eight percent of the soybeans have bloomed, compared to 63 percent last year and 46 percent for the 5-year average. Seven percent is setting pods, compared to 8 percent for both last year and the 5-year average. Soybean condition was rated 2 percent very poor, 4 percent poor, 28 percent fair, 56 percent good, and 10 percent excellent. Ninety-eight percent of the **sorghum** has emerged, compared to 99 percent last year and 98 percent for the 5-year average. One percent of the sorghum has headed, compared to 7 percent last year and 8 percent for the 5-year average. Sorghum condition was rated 1 percent very poor, 4 percent poor, 16 percent fair, 67 percent good, and 12 percent excellent. Eight-five percent of the second cutting **alfalfa** has been harvested, compared to 94 percent last year and 93 percent for the 5-year average. Seven percent of the third cutting alfalfa has been harvested, compared to 25 percent last year and 19 percent for the 5-year average. Ninety-five percent of the **sunflowers** have emerged, compared to 97 percent last year and 94 percent for the 5-year average. Three percent of the sunflowers have bloomed. Sunflower condition was rated 20 percent fair, 64 percent good, and 16 percent excellent. One-hundred percent of the **cotton** is squaring, compared to 42 percent last year and 37 percent for the 5-year average. Five percent of the cotton is setting bolls. Cotton condition was rated 20 percent fair, 65 percent good, and 15 percent excellent.

Feed Supplies Report: Range and pasture conditions were rated 3 percent very poor, 8 percent poor, 24 percent fair, 49 percent good, and 16 percent excellent. Feed grain supplies were rated 5 percent very short, 10 percent short, 84 percent adequate, and 1 percent surplus. Hay and forage supplies were rated 3 percent very short, 16 percent short, 77 percent adequate, and 4 percent surplus. Stock water supplies were rated 1 percent very short, 8 percent short, 83 percent adequate, and 8 percent surplus.

This is a cooperative effort with Kansas State Research & Extension Service
the KSU Weather Data Library, and Kansas Agriculture Statistics
