Volume 09 No. 26

Agricultural Summary: Precipitation this past week was light across the Northern and Eastern counties with a handful of counties receiving greater than 1 inch of moisture. Temperatures were hot across Kansas reaching over 100 degrees in most areas. Producers averaged 5.9 days suitable for fieldwork. Topsoil moisture is rated as 1 percent very short, 14 percent short, 78 percent adequate, and 7 percent surplus. Subsoil moisture is rated as 1 percent very short, 12 percent short, 82 percent adequate, and 5 percent surplus. Fieldwork activities included wheat harvest, cutting alfalfa, pesticide application, and planting remaining row crops.

Field Crop Report: Eighty-seven percent of the **wheat** is ripe, compared to 81 percent last year and 93 percent for the 5-year average. Forty-seven percent has been harvested, compared to 32 percent the previous year and 61 percent for the 5-year average. The wheat condition is rated as 4 percent very poor, 13 percent poor, 31 percent fair, 39 percent good, and 13 percent excellent. Six percent of the **corn** is silked, compared to 11 percent in 2008 and 19 percent for the 5-year average. Corn condition is rated as 1 percent very poor, 4 percent poor, 28 percent fair, 53 percent good, and 14 percent excellent. Ninety-three percent of the **sorghum** has been planted, ahead of the previous year at 88 percent but the same as the 5-year average. Seventy-nine percent has emerged, compared to 69 percent for last year and 81 percent for the 5-year average. Sorghum condition is rated as 1 percent very poor, 2 percent poor, 19 percent fair, 74 percent good, and 4 percent excellent. Ninety-five percent of the **soybeans** have been planted, compared to 83 percent in 2008 and 92 percent for the 5-year average. Eighty-nine percent have emerged, compared to 76 percent the previous year and 86 percent for the 5-year average. Soybean condition is rated as 3 percent poor, 28 percent fair, 58 percent good, and 11 percent excellent. Ninety-five percent of the **cotton** is planted, compared to 100 percent the previous year and 97 percent for the 5-year average. Fourteen percent is squaring, the same as last year and ahead of the 5-year average of 12 percent. Cotton condition is rated as 4 percent poor, 25 percent fair, 55 percent good, and 16 percent excellent. Seventy-five percent of the **sunflowers** have been planted, compared to 73 percent the previous year and 85 percent for the 5-year average. Fifty-five percent have emerged, compared to 57 percent for 2008 and 68 percent for the 5-year average. Sunflower condition is rated 2 percent very poor, 1 percent poor, 13 percent fair, 80 percent good, and 4 percent excellent. Forty-three percent of the second cutting of **alfalfa** has been completed, compared to 38 percent the previous year and 53 percent for the 5-year average.

Feed Supplies Report: Range and pasture condition is rated as 1 percent very poor, 5 percent poor, 22 percent fair, 61 percent good, and 11 percent excellent. Feed grain supplies were rated as 4 percent short, 94 percent adequate, and 2 percent surplus. Hay and forage supplies were rated as 4 percent short, 87 percent adequate, and 9 percent surplus. Stock water supplies were rated as 1 percent very short, 4 percent short, 87 percent adequate, and 8 percent surplus.

This is a cooperative effort with Kansas State Research & Extension Service,
the KSU Weather Data Library, and Kansas Agriculture Statistics
