## SPECIAL PRESS RELEASE

Released: July 21, 2006

### KANSAS RANKED 7TH IN AGRICULTURAL EXPORTS

Kansas dropped to seventh among the 50 states as an exporter of agricultural products during fiscal year (FY) 2005, according to data released by the Economics Research Service and Kansas Agricultural Statistics, USDA. Exports from five out of the top ten states increased. The total value of Kansas exports, at \$2.8 billion, is down 16 percent from the previous fiscal year and is the lowest since 1994. Most of the value decrease came from the Wheat & Products and Live Animals & Meat categories. Kansas accounted for 4.4 percent of the \$62.4 billion U.S. agricultural exports in FY 2005.

Kansas ranked first in the Nation for Wheat & Products and Feed & Fodders. The export numbers show Kansas ranking second in Hides & Skins, and Animal Fats. Other top ten rankings for Kansas were Sunflower Seed & Oil (third place with \$16.1 million), Seed (fourth place with \$51.7 million), Live Animals & Meat (sixth place with \$283.5 million), Feed Grains & Products (sixth place with \$496.7 million), Soybean & Products (tenth place with \$302.1 million), and Tree Nuts

(tenth place with \$1.1 million). Wheat & Products accounted for 27 percent of the State total and 13 percent of the National All Wheat & Products exports. Feed Grains & Products comprised 18 percent of the total Kansas exports and 7 percent of all U.S. Feed Grains & Products exports. Feed & Fodders tallied 14 and 18 percent of the State and National exports, respectively.

### U.S. AGRICULTURAL EXPORTS VIRTUALLY UNCHANGED

The United States exported \$62.4 billion of agricultural commodities in FY 2005, virtually unchanged from 2004. California continued to lead the Nation in agricultural exports at \$10.2 billion. Iowa ranked second, followed by Texas, Illinois, Minnesota, Nebraska, Kansas, Washington, North Dakota, and Indiana. Agricultural export estimates by State are based on the assumption that if a State contributes a certain percentage of U.S. production, it contributes a similar percentage of export revenues. When appropriate, however, supplemental data (Customs district data, domestic use data, and the Census of Agriculture data, for example) were used to adjust the export share.
