SPECIAL PRESS RELEASE

Released: December 7, 2012

KANSAS RANKED 7th IN VALUE OF AGRICULTURAL EXPORTS

Kansas ranked seventh among the 50 states as an exporter of agricultural products during the calendar year 2011 according to USDA's Economic Research Service. The total value of Kansas exports, at \$5.3 billion, was up 7 percent from a year earlier and accounted for 3.9 percent of the \$136.4 billion of U.S. agricultural exports. The value of exports increased from 2010 for Pork, Wheat, Beef and Veal, Hides and Skins, and Corn while declining for all other categories.

Wheat was the leading Kansas agricultural export, accounting for 29 percent of the State total and 14 percent of the National All Wheat exports. Beef and Veal was second, accounting for 12 percent of both the Kansas and U.S. exports while Soybeans was third, with slightly less than 12 percent of the State total. Feeds and Fodder ranked fourth with 11 percent, followed by Corn with 10 percent, and Hides and Skins with 6 percent.

Kansas ranked second in the Nation for Wheat and Feed and Fodders exports and third for Beef and Veal and Hides and Skins exports. Other top ten rankings for Kansas were sixth for Grain Products, eighth for Corn, and tenth for Pork.

The methodology that USDA's Economic Research Service (ERS) uses to arrive at the value of exports by State has changed, making the data in this release incompatible with previous year's releases. More details on the methodology can be found at:
