# SOMETHING ABOUT NASS

The **National Agricultural Statistics Service (NASS)** serves as the “fact finders for agriculture” for the agricultural producers, farm organizations, policymakers, community groups, researchers, government agencies, agribusinesses, and a host of related industries needing consistent, reliable data on U.S. agriculture. NASS conducts hundreds of surveys each year and prepares reports on virtually every aspect of U.S. agriculture. Every five years NASS also conducts a detailed census of every farm and agricultural producer in the country.

## Surveys, Estimates and Forecasts

Every year, NASS conducts hundreds of surveys using a statistically valid sample of the target population. In these surveys, NASS collects information from a cross-section of a specific group (corn growers, feedlot managers, dairy producers, etc.). Depending upon the particular crop, livestock, or topic of concern, surveys vary in size (from a few hundred to tens of thousands), frequency (weekly, monthly, quarterly, or annually), and coverage (the number of states involved).

After the data are collected, statisticians analyze the information to prepare estimates and forecasts. At NASS, an *estimate* is a determination of size or value and refers to what has already occurred, such as last year’s wheat harvest or cattle inventory. A *forecast* is an approximation of what may occur by the end of the season, such as average corn yield or total production for the current harvest year.

For current survey reports visit [www.nass.usda.gov](http://www.nass.usda.gov).

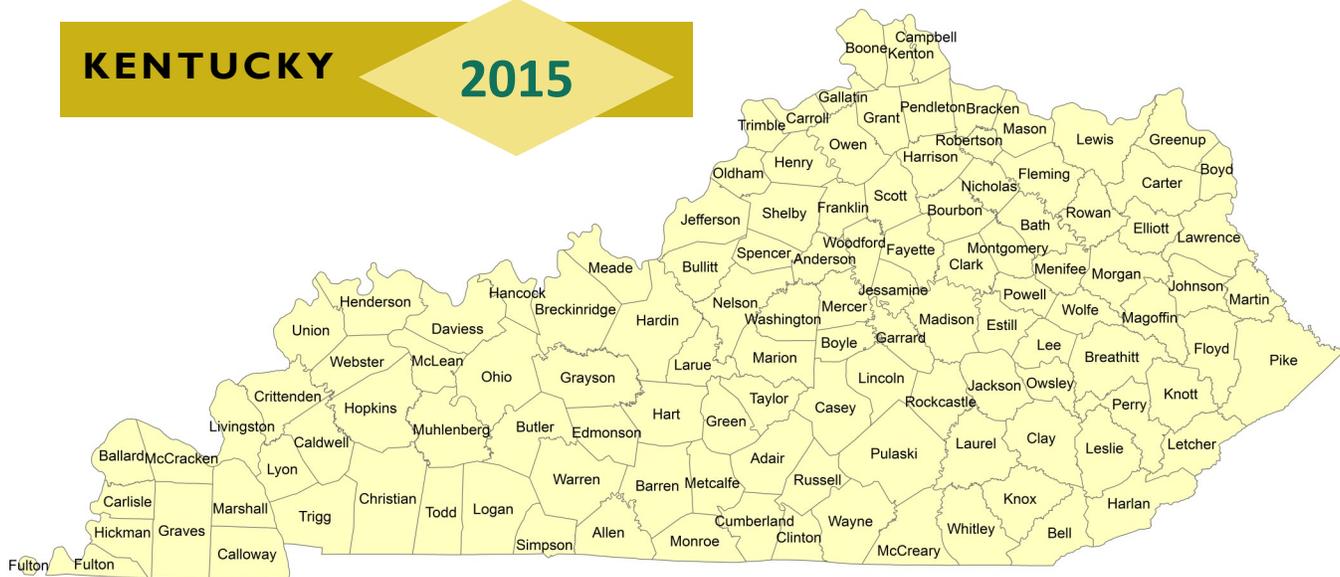

## Census of Agriculture

Every five years, NASS conducts the Census of Agriculture. Similar to the population census that attempts to count and collect data on every man, woman, and child in the United States, the Census of Agriculture takes a complete count of farms, ranches, and agricultural production in the entire country. Participation by every farmer and rancher, regardless of the size or type of operation, is vitally important. Census data are the only source of uniform agricultural statistics for each county in the United States.

For 2012 Census of Agriculture results, visit [www.agcensus.usda.gov](http://www.agcensus.usda.gov).

# Quick Facts!

## FARM OPERATIONS

Farm Operations - Area Operated, Measured in Acres / Operation	170
Farm Operations - Number of Operations	76,400
Farm Operations - Acres Operated	13,000,000

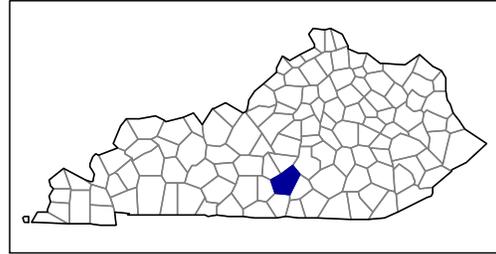

## LIVESTOCK INVENTORY

Cattle, Cows, Beef - Inventory ( First of Jan. 2016 )	1,021,000
Cattle, Cows, Milk - Inventory ( First of Jan. 2016 )	59,000
Cattle, Incl Calves - Inventory ( First of Jan. 2016 )	2,170,000
Cattle, On Feed - Inventory ( First of Jan. 2016 )	17,000
Goats, Meat & Other - Inventory ( First of Jan. 2016 )	59,000
Goats, Milk - Inventory ( First of Jan. 2016 )	5,000
Sheep, Incl Lambs - Inventory ( First of Jan. 2016 )	53,000
Hogs - Inventory ( First of Dec. 2015)	415,000

## MILK PRODUCTION

Milk - Production, Measured in Lb / Head	17,607
Milk - Production, Measured in \$	201,912,000
Milk - Production, Measured in Lb	1,074,000,000
