

Louisiana Crop Progress and Condition

Delta Region - Louisiana Field Office
5825 Florida Blvd Baton Rouge, LA 70806
(225) 922-1362 · FAX (855) 270-2705 · www.nass.usda.gov

Cooperating with Louisiana Department of Agriculture and Forestry

This report contains the results from the **Crop Progress and Condition** weekly survey. The survey is completed by parish extension agents' visual observations and contact with producers in their parish. These data are also posted on our web site at <https://www.nass.usda.gov/la> and in a more detailed report at <https://www.nass.usda.gov>. Thanks to all of the parish extension agents who responded to this survey.

Week Ending: November 20, 2022

Released: November 21, 2022

According to the National Agricultural Statistics Service in Louisiana, there were 3.8 days suitable for fieldwork for the **week ending Sunday, November 20, 2022**. Topsoil moisture supplies were 13 percent very short, 34 percent short, 50 percent adequate, and 3 percent surplus. Subsoil moisture supplies were 9 percent very short, 37 percent short, 51 percent adequate, and 3 percent surplus.

Crop Progress for Week Ending November 20, 2022

Crop	This week	Last week	Last year	5-year average
	(percent)	(percent)	(percent)	(percent)

Louisiana Subsoil Moisture Map for the week of November 7 – November 13, 2022

The Soil Moisture Active Passive (SMAP) provides measurements of soil moisture in the root zone as a weekly average, represented by pixels. Each pixel represents 9 by 9 kilometer plot or about 20,000 acres. The SMAP data measures soil moisture in cubic centimeters of water/cubic centimeters of soil. The scale represents the percent of water in a given volume of soil. More information and additional mapping is available at <https://nassgeo.csiss.gmu.edu/CropCASMA/>.
