For the week ending October 25, 2014, growers placed 11.5 million broiler chicks in Delmarva growing houses, according to the Maryland Field Office of USDA’s National Agricultural Statistics Service. These placements were 9.9% above the comparable week a year earlier. Broiler-type chicks hatched (10.8 million) increased 2.3% from the comparable week in 2013. Eggs set in incubators during the week totaled 13.8 million, an increase of 4.2% from the same week a year earlier. Federally inspected slaughter on Delmarva was 11.0 million for the week ending October 18, 2014 compared to 10.2 million slaughtered during the same week in 2013.

Hatcheries in the United States weekly program set 206 million eggs in incubators during the week ending October 25, 2014, up 2 percent from a year ago. Hatcheries in the 19 State weekly program set 199 million eggs in incubators during the week ending October 25, 2014, up 2 percent from the year earlier. Average hatchability for chicks hatched during the week in the United States was 83 percent. Average hatchability is calculated by dividing chicks hatched during the week by eggs set three weeks earlier.
