Dry conditions allowed farmers 5.3 days suitable for fieldwork during the week ending November 28, 2021, according to the USDA, National Agricultural Statistics Service. Field activities for the week included fall tillage.

Topsoil moisture supplies were rated 2 percent very short, 11 percent short, 80 percent adequate and 7 percent surplus. Subsoil moisture supplies were rated 5 percent very short, 17 percent short, 73 percent adequate and 5 percent surplus.

This is the final weekly Minnesota Crop Progress and Condition of the season. The USDA’s National Agriculture Statistics Service would like to thank the many farmers and FSA, NRCS, Extension, and agribusiness personnel who provided the information for this report each week. The new season of Minnesota Crop Progress and Condition is scheduled to begin April 4, 2022.
