Cooperating with the Minnesota Department of Agriculture

April 4, 2022

Media Contact: Dan Lofthus

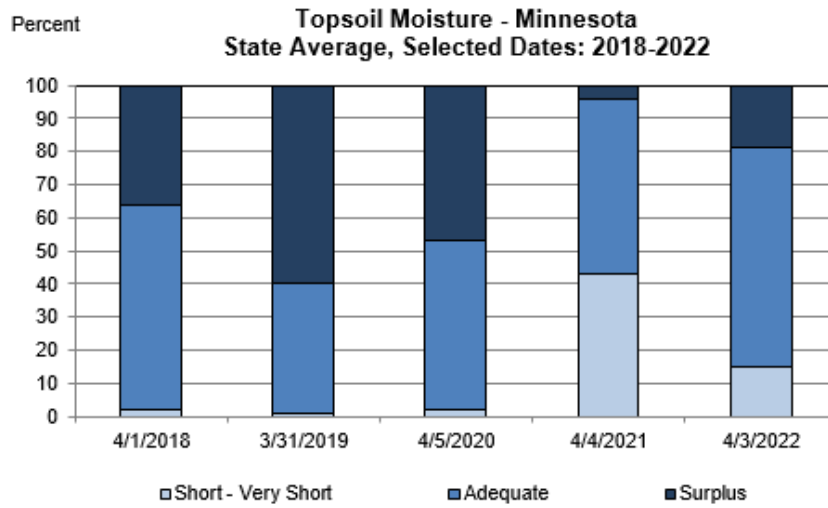

Cool and damp conditions in Minnesota prevented fieldwork over much of the state, with **0 days suitable for fieldwork** during the week ending April 3, 2022, according to USDA’s National Agricultural Statistics Service. There were scattered reports of manure and fertilizer application on dry land.

**Topsoil moisture** supplies were rated 4% very short, 11% short, 66% adequate, and 19% surplus. **Subsoil moisture** supplies were rated 6% very short, 20% short, 69% adequate, and 5% surplus. Many reports mentioned frozen ground and snow cover.

No issues were reported with calving and livestock. Farmers are working on getting field equipment ready for the upcoming planting season.

### Days Suitable for Fieldwork and Soil Moisture Condition as of April 3, 2022

Item	This week	Last week	Last year
	(days)	(days)	(days)
Days suitable .....	0	(NA)	3.9
	(percent)	(percent)	(percent)
Topsoil moisture			
Very short .....	4	(NA)	12
Short .....	11	(NA)	31
Adequate .....	66	(NA)	53
Surplus .....	19	(NA)	4
Subsoil moisture			
Very short .....	6	(NA)	6
Short .....	20	(NA)	37
Adequate .....	69	(NA)	54
Surplus .....	5	(NA)	3
