## Hay Stocks on Farms – Minnesota and United States: December 1 and May 1, 2016-2018

	December 1		May 1	
	2016	2017	2017	2018
	(1,000 tons)	(1,000 tons)	(1,000 tons)	(1,000 tons)
Minnesota .....	3,200	2,590	860	560
United States .....	95,837	86,246	24,388	15,669

## UNITED STATES HIGHLIGHTS

All hay stored on United States farms May 1, 2018, totaled 15.7 million tons, down 36 percent from a year ago. Disappearance from December 1, 2017 - May 1, 2018, totaled 70.6 million tons, compared with 71.4 million tons for the same period a year earlier.

Lower production in 2017, coupled with a higher cattle inventory as of January 1, 2018, has reduced the available hay stocks on May 1, 2018, compared to the same time last year. April snow in the Northern Plains, and dry pasture conditions stretching from the Southwest to the Southern Plains, have extended supplemental feeding, further reducing available hay stocks.
