Minnesota **corn** production is forecast at 1.27 billion bushels, down 7 percent from last year, according to the latest USDA, National Agricultural Statistics Service - *Crop Production* report. Based on conditions as of September 1, yields are expected to average 171 bushels per acre, down 2 bushels from the August 1 forecast and a decrease of 11 bushels per acre from last year. Corn planted acreage is estimated at 7.90 million acres. An estimated 7.40 million of the acres planted will be harvested for grain.

Soybean production is forecast at 307 million bushels, down 21 percent from last year. The yield is forecast at 45.0 bushels per acre, down 1 bushel from the August 1 forecast and 5.5 bushels below 2018. Soybean planted acreage is estimated at 6.90 million acres with 6.82 million acres to be harvested.

Sugarbeet production is estimated at 11.2 million tons, up 7 percent from last year. Yield is forecast at 26.7 tons per acre, down 0.8 ton from the August 1 forecast but up 1.0 ton from last year.

The forecasts in this report are based on September 1 conditions and do not reflect weather effects since that time. The next crop production forecasts, based on conditions as of October 1, will be released on October 10.

Area Harvested, Yield, and Production Summary – Minnesota and United States: 2018 and Forecasted September 1, 2019

Crop	Area Harvested		Yield per acre		Production	
	2018 (1,000 acres)	2019 (1,000 acres)	2018	2019	2018 (1,000)	2019 (1,000)
MINNESOTA						
Corn bushels	7,490	7,400	182.0	171.0	1,363,180	1,265,400
Soybeans bushels	7,710	6,820	50.5	45.0	389,355	306,900

United States Summary

Corn production for grain is forecast at 13.8 billion bushels, down 1 percent from the previous forecast and down 4 percent from last year. Based on conditions as of September 1, yields are expected to average 168.2 bushels per harvested acre, down 1.3 bushels from the previous forecast and down 8.2 bushels from 2018. Area harvested for grain is forecast at 82.0 million acres, unchanged from the previous forecast but up less than 1 percent from 2018.

Soybean production for beans is forecast at 3.63 billion bushels, down 1 percent from the previous forecast and down 20 percent from last year. Based on conditions as of September 1, yields are expected to average 47.9 bushels per harvested acre, down 0.6 bushel from the previous forecast and down 3.7 bushels from 2018. Area harvested for beans is forecast at 75.9 million acres, unchanged from the previous forecast but down 14 percent from 2018.
