Minnesota **corn** production is forecast at 1.43 billion bushels, up 3 percent from the previous year, according to the latest USDA, National Agricultural Statistics Service – *Crop Production* report. Based on conditions as of September 1, yields are expected to average 190.0 bushels per acre, down 3.0 bushels from the August 1 forecast but up 12.0 bushels from last year. Corn planted acreage is estimated at 8.05 million acres. An estimated 7.55 million of the acres planted will be harvested for grain, down 150,000 acres from the previous forecast. Acreage updates were made based on a thorough review of all available data.

Soybean production is forecast at 369 million bushels, up 4 percent from 2021. The yield is forecast at 50.0 bushels per acre, unchanged from the August forecast but 3.0 bushels higher than 2021. Soybean planted acreage is estimated at 7.45 million acres. An estimated 7.38 million of the acres planted will be harvested, down 50,000 acres from the previous forecast. Acreage updates were made based on a thorough review of all available data.

Sugarbeet production is forecast at 11.3 million tons, down 8 percent from the previous year. The yield is forecast at 25.8 tons per acre, 0.4 ton above the August forecast but 5.2 tons below 2021. Sugarbeet planted acreage is estimated at 440,000 acres. An estimated 438,000 of the acres planted will be harvested, down 3,000 acres from the previous forecast. Acreage updates were made based on a thorough review of all available data.

The forecasts in this report are based on September 1 conditions and do not reflect weather effects since that time. The next crop production forecasts, based on conditions as of October 1, will be released on October 12.

Corn Production – Minnesota: 2008-2022

Soybean Production – Minnesota: 2008-2022

Area Harvested, Yield, and Production Summary – Minnesota and United States: 2021 and Forecasted September 1, 2022

United States Summary

Corn production for grain is forecast at 13.9 billion bushels, down 3 percent from the previous forecast and down 8 percent from 2021. Based on conditions as of September 1, yields are expected to average 172.5 bushels per harvested acre, down 2.9 bushels from the previous forecast and down 4.5 bushels from last year. Acreage updates were made in several States based on a thorough review of all available data. Total planted area, at 88.6 million acres, is down 1 percent from the previous estimate and down 5 percent from the previous year. Area harvested for grain is forecast at 80.8 million acres, down 1 percent from the previous forecast and down 5 percent from the previous year.

Soybean production for beans is forecast at 4.38 billion bushels, down 3 percent from the previous forecast and down 1 percent from 2021. Based on conditions as of September 1, yields are expected to average 50.5 bushels per acre, down 1.4 bushels from the previous forecast and down 0.9 bushel from 2021. Total planted area, at 87.5 million acres, is down 1 percent from the previous estimate but up less than 1 percent from the previous year. Area harvested for beans in the United States is forecast at 86.6 million acres, down 1 percent from the previous forecast but up less than 1 percent from 2021. Acreage updates were made in several States based on a thorough review of all available data.
