Minnesota Egg production during February 2015 was 259 million eggs, down 10 percent from last month, but up 13 percent from last year, and the largest February production on record for the state of Minnesota, according to the latest *Chickens and Eggs* release from USDA's National Agricultural Statistics Service.

The total number of layers (on hand during February) was 11.8 million, down slightly from last month, but up 12 percent from last year, and the largest February inventory on record for the State of Minnesota. Eggs per 100 layers for the month of February were 2,190, down 10 percent from January, mostly due to the short month, but up 1 percent from 2,170 last year.

Layers on Hand and Eggs Produced – States and United States, February 2014 and 2015

[Data may not add to totals due to rounding. Data by type of flock not shown for some states to avoid disclosing individual operations, data included in United States totals.]

United States Chickens & Eggs

United States egg production totaled 7.62 billion during February 2015, up 1 percent from last year. Production included 6.61 billion table eggs, and 1.01 billion hatching eggs, of which 928 million were broiler-type and 80 million were egg-type. The total number of layers during February 2015 averaged 362 million, up 1 percent from last year. February egg production per 100 layers was 2,104 eggs, unchanged from February 2014.

All layers in the United States on March 1, 2015 totaled 362 million, up 1 percent from last year. The 362 million layers consisted of 305 million layers producing table or market type eggs, 53.9 million layers producing broiler-type hatching eggs, and 3.56 million layers producing egg-type hatching eggs. Rate of lay per day on March 1, 2015, averaged 75.3 eggs per 100 layers, unchanged from March 1, 2014.

Egg-type chicks hatched during February 2015 totaled 42.8 million, up 6 percent from February 2014. Eggs in incubators totaled 44.5 million on March 1, 2015, up 14 percent from a year ago.

Domestic placements of egg-type pullet chicks for future hatchery supply flocks by leading breeders totaled 309 thousand during February 2015, up 27 percent from February 2014.

Broiler-type chicks hatched during February 2015 totaled 711 million, up 3 percent from February 2014. Eggs in incubators totaled 647 million on March 1, 2015, up 3 percent from a year ago.

Leading breeders placed 7.92 million broiler-type pullet chicks for future domestic hatchery supply flocks during February 2015, up 9 percent from February 2014.
